numerous actual provisions from the various documents corporate lawyers draft and review, so that students gain a sense for what corporate lawyers do in practice. With content selected through a corporate lawyer lens, and emphasis on real-world provisions, this is the only Business Organizations casebook on the market allowing students to work with complete transactional documents (e.g., limited liability partnership agreements, LLC operating agreements, certificates of designation, warrant agreements, and shareholders agreements). Featuring numerous exercises, designed to reinforce the covered material and help students develop the planning and problem-solving skills of a corporate lawyer as well as expose students to the documents and issues at the heart of a transactional practice, the book also contains more narrative and fewer cases--legal concepts are covered in concise explanatory text instead of judicial opinions.

This book provides a clear and concise explanation of corporations, agency and partnership, and the other subjects addressed in most Business Associations courses. To accompany its explanations, the guide utilizes a checklist format to lead students through questions they need to ask and issues they need to address, to fully evaluate the agency, partnership or corporations, problems they will face when studying this subject. It also synthesizes the material in a way that most students are unable to do on their own, and organizes the critical issues, presenting a clear guide to analyze business associations issues that students can draw upon when writing their exams. Other study aids provide sample problems, but this book offers a systematic approach to problem solving.
