Dear Google Customer, As founder of Startup Distillery (and like any seasoned entrepreneur), before creating this all-in-one Business Plan Kit I did my due diligence. Bookstores are filled with \$20 options that describe themselves as step-by-step and easy to use, just as I do. Having bought and read many of them myself, I respectfully disagree. I designed Distilling Your Dream to offer more, which is why it costs more. HERE'S WHAT I OFFER That No One Else Does: • Concise. This kit is as distilled as it gets. I've spent years boiling down the process to its essence – no fillers, artificial flavors or unnecessary extras. • Step-By-Step. Distilling Your Dream is the most easy-to-follow, sequential and streamlined option on the market. • Conversational. This kit was designed to recreate the experience I give my clients. It will feel like I'm sitting right next to you, explaining every step in plain English. • Real Life Examples. Distilling Your Dream is chock-full of real examples that clearly explain the HOWs and WHYs behind every step, so you can arrive at the answers that help you build a thriving business. • I'm Accessible. I'm a real live person who's available to you by the hour for one-on-one guidance if you need it. In short, you've probably shopped at both discount stores and specialty boutiques. Sometimes the discount store is the best choice to fit your modest needs, but sometimes you're looking for something that will last forever. The great news is, there's a business plan solution for everyone. If you're looking for the best long-term solution, Distilling Your Dream is the one for you. But if you're not sure, I recommend you buy a less expensive book to start. You'll only be out \$20, and then you'll be able to see what I'm talking about. The great news is, when you're ready Distilling Your Dream will be here waiting for you. So... what are you waiting for? Let's do this. -Diane WHAT YOU GET Whether you're bootstrapping or looking for investors, you'll get everything you need, including: 1. An eBook that explains the WHATs, WHYs and HOWs of a powerful business plan for any industry. 2. Worksheets that guide you through each step of the words and the numbers. 3. Templates\* that help you build a strong narrative, realistic financial projections and persuasive executive summary. 4. A FREE ½ hour of one-on-one time with startup expert Diane Tarshis! \*Download Word & Excel templates FREE after purchase (the last page explains how). Excel templates have formulas built right in! Plus you'll get a PDF copy of the worksheets so you can type and save your work right in the document. Business Vocabulary in Use includes 66 easy-to-use units, with vocabulary items presented and explained on the left-hand pages and a range of practice exercises on the right-hand pages. It also includes a comprehensive answer key. The book covers a huge range of business topics including jobs; people and organisations; production; marketing; finance and the economy, and business culture. Learners will develop essential business communication skills, focusing on the language used for meetings, negotiations and presentations. [Source : 4e de couv.]

The urge to understand all aspects of human experience more and better seems to be one of the motives underlying cognitive development in many domains of human existence. Understanding more and better is at the basis of knowledge creation and extension. One way of getting access to how understanding comes about and how knowledge is the result of a continuous dynamics of understanding and misunderstanding is by studying the cognitive potential and

the development of natural language(s) and more particularly of terminology, in specialized domains. In this volume on dynamics and terminology, thirteen contributors illustrate that human cognition is a dynamic process in a variety of socio-cognitive and cultural settings. The case studies encompass a panoply of methodologies and deal with subjects ranging from the dynamics of legal understanding in multilingual Europe, over financial, economic and scientific terminology in several cultural and linguistic settings, to language policy issues in multilingual environments. All thirteen contributors link the dynamics of cognition to the creative potential of language as a repository of past and present experience in cultural settings and to the creation of neologisms in domain-specific languages. Attention is given to the functionality of indeterminacy, vagueness, polysemy, ambiguity, synonymy, metaphor and phraseology. In this volume terminology is researched and discussed from an interdisciplinary perspective, combining insights developed over the last decades in communicative terminology, socio-terminology, socio-cognitive terminology, cultural terminology, with tools and methods from cognitive linguistics, corpus linguistics, sociolinguistics, frame semantics, semiotics, knowledge engineering and statistics.

First published in 2002. The German Dictionary of Business, Commerce and

Finance is the second dictionary to be published in Routledge's programme of bilingual business dictionaries. The series was launched in December 1995 with the French Dictionary of Business, Commerce and Finance. It would not have been possible to compile this dictionary within a relatively short timescale, and to the standard achieved, without the use of a highly sophisticated, custom-designed database. The database's most significant feature is that it is designed as a relational database: term records for each language are held in separate files, with further files consisting only of link records. Links between terms in different language files represent translations, enabling us to handle various types of one-to-many and many-to-one equivalences. Links between terms within a single language file represent crossreferences between geographical variants and abbreviations. The content of the database for this dictionary was created in three principal phases. A considerable proportion of the English term list was already available following the publication of the French Dictionary of Business, Commerce and Finance. The term list was then sent out to specialist translators - with current practical experience of business translation - who supplied German equivalences and expanded the English and German term lists to include the main relevant terminology in their particular spheres of work.

This authoritative dictionary covers every aspect of personal and international finance. It has been fully revised and updated, particularly with regards to terminology relating to the financial crash of 2008-9. With clear definitions for over 5,200 entries, it is an indispensable guide for anyone involved in finance and banking.

This book constitutes the thoroughly refereed post-workshop proceedings of the Third International Symposium, SETE 2018, held in conjunction with ICWL 2018, Chiang Mai, Thailand, in August 2018. The 23 full and 3 short papers were carefully reviewed and selected from 51 submissions. The papers have been organized in the following topical sections: Emerging Technologies of Design, Model and Framework of Learning Systems; Emerging Technologies Support for Intelligent Tutoring; Emerging Technologies Support for Game-Based and Joyful Learning; Emerging Technologies of Pedagogical Issues; UMLL (International Symposium on User Modeling and Language Learning); ETLTL (International Workshop on Educational Technology for Language and Translation Learning)

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, *The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution* includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote

greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at [www.worldbank.org/globalindex](http://www.worldbank.org/globalindex).
