The key to teaching business ethics successfully, says Sims, is to start with clear goals and a sensible expectation of outcomes, and with a true knowledge and appreciation of how people actually learn. Proceeding with the conviction that open communications between teacher and student before, during, and after the teaching experience is vital, Sims identifies key teaching processes, gives practical advice on designing and planning the curriculum, and offers guidance on how to develop a climate conducive to effective learning. He also emphasizes learning styles and experiential learning theory as cornerstones of teaching business ethics, an approach unlike any in the literature. An important guide for those who are new to teaching this essential subject, Sims' book will also help more experienced teachers who wonder why their own methods do not always work, or do not work as well as they think they should.

This book integrates a stakeholder perspective with an issues-oriented approach so students look at how a business's actions affect not just share price and profit but the well-being of employees, customers, suppliers, the local community, the larger society, other nations, and the environment. Fourteen of the twenty-three cases are brand new to this edition, touching on issues such as cyberbullying, fracking, neuromarketing, and for-profit education and involve institutions like Goldman Sachs, Google, Kaiser Permanente, Walmart, Ford, and Facebook. The text has been updated with the latest research, including new national ethics survey data, perspectives on generational differences, and global and international issues. Each chapter includes recent business press stories touching on ethical issues. Several chapters now feature a Point/Counterpoint exercise that challenges students to argue both sides of a contemporary issue, such as too-big-to-fail institutions, the Boston bomber Rolling Stone cover, student loan debt, online file sharing, and questions raised by social media. --

The Political Economy of Business Ethics in East Asia: A Historical and Comparative Perspective deals with modes of ethical persuasion in both public and private sectors of the national economy in East Asia, from the periods of the fourteenth century, to the modern era. Authors in this volume ask how, and why, governments in pre-modern Joseon Korea, modern Korea, and modern Japan used moral persuasion of different kinds in designing national economic institutions. Case studies demonstrate that the concept of modes of exchange first developed by John Lie (1992) provides a more convincing explanation on the evolution of pre-modern and modern economic institutions compared with Marx's modes of production as historically-specific social relations, or Smith's free market as a terminal stage of human economic development. The pre-modern and modern cases presented in this volume reveal that different modes of exchange have coexisted throughout human history. Furthermore, business ethics or corporate social responsibility is not a purely European economic ideology because manorial, market, entrepreneurial, and mercantilist moral persuasions had widely been used by state rulers and policymakers in East Asia for their programs of advancing dissimilar modes of exchange. In a similar vein, the domination of the market and entrepreneurial modes in the twenty-first century world is also complemented by other competing modes of change, such as state welfarism, public sector economies, and protectionism. Compares Chinese, Japanese, and Korean business ethics from a comparative and historical context Explores recent theoretical approaches to capitalist development in modern history in non-Western regions Discusses the theoretical usefulness of new institutionalism, modes of exchange, and neoclassical discussions of business ethics Evaluates historical texts in their own languages in its attempt to compare Chinese, Japanese, and Korean business ethics in the pre-modern and modern times

Toward Assessing Business Ethics Education, edited by Diane L. Swanson and Dann G. Fisher of Kansas State University, is a sequel to their book Advancing Business Ethics Education in the Ethics in Practice IAP book series. The focus on assessment in this second book is a timely response to the urgent search among business schools for ways to teach and assess ethics at a time when the public's faith in corporations and business schools has been undermined greatly by the failure of both to respond to widespread corruption and scandals in the business sector. Although no one expects business education alone to resolve these problems, the distinguished scholars represented in this book advocate that business schools should at least do their part by exposing their students to decision models that incorporate ethical dimensions on behalf of corporate stakeholders and society at large. As the book's title conveys, it is then important to assess key learning objectives to insure that business students graduate knowing ethics fundamentals and armed with the ability to recognize ethical dilemmas and possible solutions during the course of their careers. This book will speak to all who are interested in accountability for business ethics education, especially business school deans, university administrators, faculty members, students, and prospective employers. This audience will find that the enterprise of assessing business ethics education is advanced in three ways. First, the book functions as a venue for distinguished scholars to share the innovative ways that they are assessing ethics coverage in courses and degree programs. Second, these authors identify what needs to be assessed and the means for doing so. Third, the book serves not only as a guide to assessment, but also as a platform for expanding and improving ethics coverage in business schools. Moreover, an important take away for readers is the provision of a simple formula, first advocated by Diane L. Swanson and William C. Frederick (University of Pittsburgh) in 2005, for delivering ethics education that minimizes assessment errors. By following this formula, business schools can provide assurances that ethics will not be assessed as being sufficient when it is woefully inadequate or even missing in the curriculum and that it cannot be distorted, diluted, or trivialized by uninformed coverage and still pass inspection. Avoiding these assessment errors is critical in an educational environment in which weak accrediting standards for ethics go hand in hand with spotty, uniformed coverage that would not be tolerated for other business disciplines.

Dr. Ruddell makes the case for why faith applies to business; indeed why it must apply. Throughout, he encourages the reader to identify and apply his/her own belief, but then articulates his christian view as an example of how faith works with work. Along the way, Dr. Ruddell gives the foundations for an entire business ethics program for people of all nationalities that will prove useful to businesses, non-profits, students, and professors.

There are two ways in which a Business Ethics Study Guide can help. The first is in preparing for an exam. The second is in answering questions and resolving dilemmas when you are out working. A Business Ethics Study is not an all-inclusive guide to business ethics, but it encapsulates the highlights of ethical practice that are commonly studied. It can serve as a resource for exam preparation, allowing you to focus on the context and framework of ethics covered during your study. It can also act as a resource to guide later decisions in your career by being a quick reference to ethical practices.

How can you effectively stand up for your values when pressured by your boss, customers, or shareholders to do the opposite? Drawing on actual business experiences as well as on social science research, Babson College business educator and consultant Mary Gentile challenges the assumptions about business ethics at companies and business schools. She gives business leaders, managers, and students the tools not just to recognize what is right, but also to ensure that the right things happen. The book is inspired by a program Gentile launched at the Aspen Institute with Yale School of Management, and now housed at Babson College, with pilot programs in over one hundred schools and organizations, including INSEAD and MIT Sloan School of Management. She explains why past attempts at preparing business leaders to act ethically too often failed, arguing that the issue isn't distinguishing what is right or wrong, but knowing how to act on your values despite opposing pressure. Through research-based advice, practical exercises, and scripts for handling a wide range of ethical dilemmas, Gentile empowers business leaders with the skills to voice and act on their values, and align their professional path with their principles. Giving Voice to Values is an engaging, innovative, and useful guide that is essential reading for anyone in business.

Business Ethics—Faith That Works, 2nd Edition shows how faith forms the foundation for the theory and practice of business ethics and how ethical leadership results in long-term success in business. It challenges readers to understand their own beliefs and actively base the ethics they practice in business on those beliefs for building an ethical culture that can lead to a sustainable competitive advantage. The book begins by covering business ethics basics, highlighting how ethics are good for business. Ruddell then analyses the Scriptural teaching about business ethics as a model for how faith can (and indeed must) integrate with business ethics and then contrasts with other, secular, views of business ethics. He continues by reviewing steps for solving ethical problems in business and how to set up and carry out an effective ethics program inside the business and how companies can extend those ethics to those around them through effective social outreach programs, and to the environment by being good stewards of our resources.

La 4e de couverture indique : "Ethics in the First Person is a comprehensive guide to teaching and learning practical ethics that not only provides the historical context for the study of practical ethics in the twenty-first century but also focuses on the teaching and learning of practical ethics as a first-person, present-tense activity. Practical ethics instruction can bring about more sophisticated decision making only if students and teachers remain cognizant of their own values, beliefs, and processes for thinking through ethical issues. The book closes with an analysis of how ethics serves as a bridge across cultures. A resource for teachers of ethics across the curriculum, this book may also be used as a supplemental text for upper-level undergraduate and graduate students, or as a guide for self-study."
