This book is suitable for students in all states who need to take a reading exam for graduation or course completion.

Managerial Accounting is characterised by a strong pedagogical framework and a dynamic and practical approach that directly demonstrates how students can develop their careers in real life. The text introduces students to the underlying concepts and applications of management accounting tools based on the traditional allocation approach and absorption costing method, and uses 'Staircase' exercises in each chapter to build knowledge and help learners to link the content between chapters as they progress through the book. This title uses easy-to-understand, student-friendly language, uncomplicated examples, a logical discussion of concepts that matches student learning processes, and clear visual explanations that support student understanding.

The book is a step-by-step guide to derivative products. By distilling the complex mathematics and theory that underlie the subject, Chisholm explains derivative products in straightforward terms, focusing on applications and intuitive explanations wherever possible. Case studies and examples of how the products are used to solve real-world problems, as well as an extensive glossary and material on the latest derivative products make this book a must have for anyone working with derivative products.

The text's efficient format does not overwhelm students, and its accessible style provides an alternative to more encyclopedic, reference-book approaches. The book offers a blend of the core concepts of accounting principles with procedural applications. This approach is supplemented with the most expansive set of end-of-chapter material on the market, a thorough integration of today's hot topics, and a robust selection of student and instructor print and online resources. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Explores the end-of-life spiritual needs of people who do not identify with traditional religions. This groundbreaking book addresses the spiritual aspect of hospice care for those who do not fit easily within traditional religious beliefs and categories. A companion volume to *Religious Understandings of a Good Death in Hospice Palliative Care*, this work

also advocates for renewed attention to the spiritual, the often overlooked element of hospice care. Drawing on data from clinical case studies, new sociological research, and the perspectives of agnostics, atheists, those who emphasize the spiritual rather than institutional dimensions of a traditional religion, and the rapidly growing cohort of those who describe themselves as spiritual-but-not-religious, the contributors to this volume interpret the shift from predominantly Christian-based pastoral services to a new approach to the spiritual shaped by the increasing diversity of Western societies and new understandings of the nature of secular society. How do we use it in a way that enables caregivers to assist patients? Clinicians and policy makers will appreciate the books practical recommendations regarding staff roles, training, and resource allocation. General readers will be moved by the persuasive call for greater religious and spiritual literacy at every level of health care in order to respond to the full spectrum of human needs in life and in death.

The author highlights the worst aspects of college life, focusing on hazing and binge drinking and the tragedies that have resulted, and challenging the college administrators who continue to allow it to go on. Reprint.

In Asia, amidst its varied levels of economic development and diverse cultural traditions and political regimes, the Internet and mobile communications are increasingly used in every aspect of life. Yet the analytical frames used to understand the impact of digital media on Asia predominantly originate from the Global North, neither rooted in Asia's rich philosophical traditions, nor reflective of the sociocultural practices of this dynamic region. This volume examines digital phenomena and its impact on Asia by drawing on specifically Asian perspectives. Contributors apply a variety of Asian theoretical frameworks including guanxi, face, qing, dharma and karma. With chapters focusing on emerging digital trends in China, Hong Kong, India, Japan, Korea, Philippines, Singapore, and Taiwan, the book presents compelling and diverse research on identity and selfhood, spirituality, social networking, corporate image, and national identity as shaped by and articulated through digital communication platforms.
