Writing Centers at the Center of Change looks at how eleven centers, internationally, adapted to change at their institutions, during a decade when their very success has become a valued commodity in a larger struggle for resources on many campuses. Bringing together both US and international perspectives, this volume offers solutions for adapting to change in the world of writing centers, ranging from the logistical to the pedagogical, and even to the existential. Each author discusses the origins, appropriate responses, and partners to seek when change comes from within a school or outside it. Chapters document new programs being formed under changing circumstances, and suggest ways to navigate professional or pedagogical changes that may undermine the hard work of more than four decades of writing-center professionals. The book's audience includes writing center and learning-commons administrators, university librarians, deans, department chairs affiliated with writing centers. It will also be useful for graduate students in composition, rhetoric, and academic writing.

No wonder, Oswaal Books holds an enviable place in every student's heart! Education has gone through numerous radical changes as the digital era has transformed the way we as humans communicate, inform ourselves, purchase goods, and perform other mundane chores at home and at work. New and emerging pedagogies have enabled rapid advancements, perhaps too rapidly. It's a challenge for instructors and researchers alike to remain up to date with educational developments and unlock the full potential that technology could have on this significant profession. The Handbook of Research on Digital Learning is an essential reference source that explores the different challenges and opportunities that the new and transformative pedagogies have enabled. The challenges will be portrayed through a number of case studies where learners have struggled, managed, and adapted digital technologies in their effort to progress educational goals. Opportunities are revealed and displayed in the form of new methodologies, institutions scenarios, and ongoing research that seeks to optimize the use of such a medium to assist the digital learner in the future of networked education. Featuring research on topics such as mobile learning, self-directed learning, and cultural considerations, this book is ideally designed for teachers, principals, higher education faculty, deans, curriculum developers, instructional designers, educational software developers, IT specialists, students, researchers, and academicians.

The label CLIL stands for classrooms where a foreign language (English) is used as a medium of instruction in content

subjects. This book provides a first in-depth analysis of the kind of communicative abilities which are embodied in such CLIL classrooms. It examines teacher and student talk at secondary school level from different discourse-analytic angles, taking into account the interpersonal pragmatics of classroom discourse and how school subjects are talked into being during lessons. The analysis shows how CLIL classroom interaction is strongly shaped by its institutional context, which in turn conditions the ways in which students experience, use and learn the target language. The research presented here suggests that CLIL programmes require more explicit language learning goals in order to fully exploit their potential for furthering the learners' appropriation of a foreign language as a medium of learning.

Introductory Statistics is designed for the one-semester, introduction to statistics course and is geared toward students majoring in fields other than math or engineering. This text assumes students have been exposed to intermediate algebra, and it focuses on the applications of statistical knowledge rather than the theory behind it. The foundation of this textbook is Collaborative Statistics, by Barbara Illowsky and Susan Dean. Additional topics, examples, and ample opportunities for practice have been added to each chapter. The development choices for this textbook were made with the guidance of many faculty members who are deeply involved in teaching this course. These choices led to innovations in art, terminology, and practical applications, all with a goal of increasing relevance and accessibility for students. We strove to make the discipline meaningful, so that students can draw from it a working knowledge that will enrich their future studies and help them make sense of the world around them. On the train, on the beach, on the sofa ... many people in all parts of the world enjoy doing wordsearches. If you are studying English and want to learn and practise vocabulary related to various topics, then this book is for you! The topics reflect the kinds of everyday conversations that you might have both with native and non-native speakers of English. The topics are also those that are typically tested in English examinations e.g. TOEFL, Cambridge (First Certificate, Advanced), IELTS, and Trinity. Each chapter begins with a list of questions to enable you to have a conversation about a particular topic in various situations: on a social occasion (e.g. a work dinner, a conference lunch, a party); in the classroom during an English lesson; when chatting, either face to face or online; and during an English oral exam. After the list of questions, you will find a Word List associated with the topic and exercises to test your knowledge of less common words. The final aim is then to find the words from the Word List in the related Wordsearch. Easy English! is a series of books to help you learn and revise your English with minimal effort. You can improve your English by: reading texts in English that you might normally read in your own language e.g. jokes, personality tests, lateral thinking games, and wordsearches; doing short exercises to improve specific areas grammar and vocabulary, i.e. the areas that tend to lead to the most mistakes - the aim is just to focus on what you really need rather than overwhelming yourself with a mass of rules, many of which may have no practical daily value. Other books in the Easy English! series include: Wordsearches: Widen Your Vocabulary in English Test Your Personality: Have Fun and Learn Useful Phrases Word games, Riddles and Logic Tests: Tax Your Brain and Boost Your English Top 50 Grammar Mistakes: How to Avoid Them Top 50 Vocabulary Mistakes: How to Avoid Them

This book first gives a brief overview of regional issues and a history of education in Lithuania and describes the development of education in the country since the political changes. It then presents an analysis of the entire education system and identifies key directions for reforms.

A farmhouse is being reproduced a dozen times, with slight variations, throughout a valley. Three small graves have been dug in the front garden, the middle one lying empty. A woman in a wheelchair sorts through boxes while her husband clammers around the old demolished buildings, wondering where the animals have gone. A young woman - called 'the barren one' behind her back - dreams of love, while an ageing headmaster contemplates the end of his life. At the entrance to the long dirt driveway, a car appears and pauses - pointed towards the house like a silver bullet, ticking with heat. So begins *The Dream House*, Craig Higginson's riveting and unforgettable novel set in the Midlands of KwaZulu-Natal. Written with dark wit, a stark poetic style and extraordinary tenderness, this is a story about the state of a nation and a deep meditation on memory, ageing, meaning, family, love and loss. This updated 2016 edition contains new content, with Craig Higginson exploring the background to *The Dream House*, his varied experiences in a farmhouse in KwaZulu-Natal and the subsequent and poignant motivations for this moving novel.

The Developing Core Literacy Proficiencies program is an integrated set of English Language Arts/Literacy units spanning grades 6-12 that provide student-centered instruction on a set of literacy proficiencies at the heart of the Common Core State Standards (CCSS). Reading Closely for Textual Details Making Evidence-Based Claims Making Evidence-Based Claims about Literary Technique (Grades 9-12) Researching to Deepen Understanding Building Evidence-Based Arguments The program approaches literacy through the development of knowledge, literacy skills, and academic habits. Throughout the activities, students develop their literacy along these three paths in an integrated, engaging, and empowering way. Knowledge: The texts and topics students encounter in the program have been carefully selected to expose them to rich and varied ideas and perspectives of cultural significance. These texts not only equip students with key ideas for participating knowledgeably in the important discussions of our time, but also contain the complexity of expression necessary for developing college- and career-ready literacy skills. Literacy Skills: The program articulates and targets instruction and assessment on twenty CCSS-aligned literacy skills ranging from "making inferences" to "reflecting critically." Students focus on this set of twenty skills throughout the year and program, continually applying them in new and more sophisticated ways. Academic Habits: The program articulates twelve academic habits for students to develop, apply, and extend as they progress through the sequence of instruction. Instructional notes allow teachers to introduce and discuss academic habits such as "preparing" and "completing tasks" that are essential to students' success in the classroom. The program materials include a comprehensive set of instructional sequences, teacher notes, handouts, assessments, rubrics, and graphic organizers designed to support students with a diversity of educational experiences and needs. The integrated assessment system, centered around the literacy skills and academic habits, allows for the coherent evaluation of student literacy development over the course of the year and vertically across all grade levels.
