Described as "Who owns whom, the family tree of every major corporation in America, " the directory is indexed by name (parent and subsidiary), geographic location, Standard Industrial Classification (SIC) Code, and corporate responsibility.

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

Facet Theory (FT) is presented in this volume as a methodological approach that combines content design and data analysis.

Following a brief overview of FT design, FT data analysis and the correspondence hypotheses between the two, the authors consider the role facets play in observations and equivalence relations and discuss in detail: mapping sentences and their common range; constructing questionnaire items; correspondence hypotheses relating to FT design; bivariate regression hypotheses; and how to analyze data profiles with hypotheses for structuples and similarity structures. In conclusion, the issues of using FT in practice including measurement theory and significance testing are addressed.

"As an introduction to facet theory, this book is good. . . . Many simple examples." --Publication of International Statistical Institute
Through the use of detailed examples, the authors introduce readers to the use of facet theory as a method for integrating content design with data analysis. They show how facet theory provides a strategy for conceptualizing a study, for formulating the study's variables in terms of its purposes, for systematic sampling of the variables, and for formulating hypotheses. The book is organized into two parts. Part I introduces the reader to mapping with specific emphasis on mapping sentences, and Part II explores procedures for processing multivariate data. The book concludes with a discussion of the nature of scientific inquiry and the difference between a research question and observational questions. Introduction to Facet Theory will provide researchers with a useful technique for constructing questionnaires and for designing research instruments.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

On August 29, 1949, the first Soviet test bomb, dubbed First Lightning, exploded in the deserts of Kazakhstan. The startling event was not simply a technical experiment that confirmed the ability of the Soviet Union to build nuclear bombs during a period when the United States held a steadfast monopoly; it was also an international event that marked the beginning of an arms race that would ultimately lead to nuclear proliferation beyond the two superpowers. Following a trail of espionage, secrecy, deception, political brinkmanship, and technical innovation, Michael D. Gordin challenges conventional technology-centered nuclear histories by looking at the prominent roles that atomic intelligence and other forms of information play in the uncertainties of nuclear arms development and political decision-making. With the use of newly opened archives, *Red Cloud at Dawn* focuses on the extraordinary story of First Lightning to provide a fresh understanding of the origins of the nuclear arms race, as well as the all-too-urgent problem of proliferation.

Intellectual Property offers unrivalled coverage of all major intellectual property rights and is designed to equip you with a strong

understanding of the wealth of domestic, European and international laws at play in this area. This tenth edition has been substantially updated and streamlined to ensure the book best fits the contemporary intellectual property syllabus. Key updates to the new edition include:

- Significant restructuring to reduce the length of each chapter without compromising on coverage of each topic.
- A revised chapter structure which maps closely to the structure of a typical intellectual property module.
- Discussion on the creation of a European patent with unitary effect and a Unified Patents Court.
- Coverage of the new codifying trade mark regulation and the trade mark directive requiring implementation in 2019.
- An outline of the Intellectual Property (Unjustified Threats) Act 2017.
- Consideration of the potential wide-ranging effects of Brexit in relation to intellectual property rights and protections.

Popular Science

This is the third edition of this publication which contains the latest information on vaccines and vaccination procedures for all the vaccine preventable infectious diseases that may occur in the UK or in travellers going outside of the UK, particularly those immunisations that comprise the routine immunisation programme for all children from birth to adolescence. It is divided into two sections: the first section covers principles, practices and procedures, including issues of consent, contraindications, storage, distribution and disposal of vaccines, surveillance and monitoring, and the Vaccine Damage Payment Scheme; the second section covers the range of different diseases and vaccines.

Features recipes for Hemingway's favorite cocktails and looks at how they made their way into his works, while offering anecdotes about the celebrated author's drinking habits and frequent haunts.

Goodwin denies the urgency of suffrage and stresses the differences between the sexes as a reason not to give women the vote.

Until relatively recently, much of the information on India's research into their medicinal plants has remained within India, mainly published within Indian journals. However, today the field of Ayurveda is expanding, with the integration of herbs and minerals discovered in other countries and the strengthening of academic knowledge networks worldw

Equity and Trusts is an ideal textbook for undergraduate courses on the law of trusts and equitable remedies. It provides a clear, current and comprehensive account of the subject through which the author's enthusiasm and expertise shine through, helping to bring to life an area of the law which students often find difficult. Beginning with the core principles, Professor Hudson reinforces the key points by means of clear examples throughout each chapter, helping students to build and develop their own knowledge of equity and trusts.

As part of RPG 9, the Regional Transport Strategy sets out the spatial planning framework for the preparation of local transport plans, as well as other strategies and programmes. It seeks to achieve a high quality transport system by promoting management and cost-effective investment in the system and by rebalancing its structure and use in a more sustainable way. It supports the regional spatial strategy, particularly in relation to interregional corridors and urban renaissance. This document replaces chapter 9 of RPG 9 (2001 ed., ISBN 0117535621), and a revision of part of chapter 12, covering the Ashford growth area, is also available (ISBN 011753921X).

A report on genius inventor Dean Kaman's FIRST program follows a team of brilliant, misfit high school students through the program's 2009

robotics competition, during which the teens confronted other hopefuls in stadiums throughout the country. Reprint.

The Law Express series is designed to help you revise effectively. This book is your guide to understanding essential concepts, remembering and applying key legislation and making your answers stand out!

Volumes 1 & 2 Guide to the MAJOR COMPANIES OF EUROPE 1991/92, Volume 1, arrangement of the book contains useful information on over 4000 of the top companies in the European Community, excluding the UK, over 1100 This book has been arranged in order to allow the reader to companies of which are covered in Volume 2. Volume 3 covers find any entry rapidly and accurately. over 1300 of the top companies within Western Europe but outside the European Community. Altogether the three Company entries are listed alphabetically within each country volumes of MAJOR COMPANIES OF EUROPE now provide in section; in addition three indexes are provided in Volumes 1 authoritative detail, vital information on over 6500 of the largest and 3 on coloured paper at the back of the books, and two companies in Western Europe. indexes in the case of Volume 2. MAJOR COMPANIES OF EUROPE 1991/92, Volumes 1 The alphabetical index to companies throughout the & 2 contain many of the largest companies in the world. The Continental EC lists all companies having entries in Volume 1 area covered by these volumes, the European Community, in alphabetical order irrespective of their main country of represents a rich consumer market of over 320 million people. operation. Over one third of the world's imports and exports are channelled through the EC. The Community represents the The alphabetical index in Volume 1 to companies within each world's largest integrated market.

The authors examine the role of the law in developing large financial markets necessary for national economic success. They discuss the basic foundational law of contracts, property and tort, corporate law, and securities law, providing both a broad theoretical and empirical case for its value in financial markets.
