This is the first BMAT theory and practice book on the market, providing not only practice questions but breaking down the BMAT exam step-by-step. The authors, both leading specialists in BMAT training, focus on each section in turn, using many sample questions to carefully illustrate the theory rather than simply testing rote learning. A concluding mock exam allows candidates to consolidate learning through self-assessment, with model answers to refer to at the end.

Told through the eyes of current and former Navy SEALs, EYES ON TARGET is an inside account of some of the most harrowing missions in American history-including the mission to kill Osama bin Laden and the mission that wasn't, the deadly attack on the US diplomatic outpost in Benghazi where a retired SEAL sniper with a small team held off one hundred terrorists while his repeated radio calls for help went unheeded. The book contains incredible accounts of major SEAL operations-from the violent birth of SEAL Team Six and the aborted Operation Eagle Claw meant to save the hostages in Iran, to key missions in Iraq and Afghanistan where the SEALs suffered their worst losses in their fifty year history-and every chapter illustrates why this elite military special operations unit remains the most feared anti-terrorist force in the world. We hear reports on the record from retired SEAL officers including Lt. Cmdr. Richard Marcinko, the founder of SEAL Team Six, and a former Commander at SEAL team Six, Ryan Zinke, and we come away understanding the deep commitment of these military men who put themselves in danger to protect our country and save American lives. In the face of insurmountable odds and the imminent threat of death, they give all to protect those who cannot protect themselves. No matter the situation, on duty or at ease, SEALs never, ever give up. One powerful chapter in the book tells the story of how one Medal of Honor winner saved another, the only time this has been done in US military history. EYES ON TARGET includes these special features: A detailed timeline of events during the Benghazi attack Sample rescue scenarios from a military expert who believes that help could have reached the Benghazi compound in time The US House Republican Conference Interim Progress Report on the events surrounding the September 11, 2012 Terrorist Attacks in Benghazi Through their many interviews and unique access, Scott McEwen and Richard Minter pull back the veil that has so often concealed the heroism of these patriots. They live by a stringent and demanding code of their own creation, keeping them ready to ignore politics, bureaucracy and-if necessary-direct orders. They share a unique combination of character, intelligence, courage, love of country and what can only be called true grit. They are the Navy SEALs, and they keep their Eyes on Target.

What is the relationship between the medieval crusades and the problems of the modern Middle East? Were the crusades the Christian equivalent of Muslim jihad? In this sweeping yet crisp history, Thomas F. Madden offers a brilliant and compelling narrative of the crusades and their contemporary relevance. Placing all of the major crusades within their medieval social, economic, religious, and intellectual environments, Madden explores the uniquely medieval world that led untold thousands to leave their homes, families, and friends to march in Christ's name to distant lands. From Palestine and Europe's farthest reaches, each crusade is recounted in a clear, concise narrative. The author gives special attention as well to the crusades' effects on the Islamic world and the Christian Byzantine East.

Shortly after accepting the flat earth as a model for the world, I decided to revisit the Book of the Courses of the Heavenly Luminaries to see if my new understanding would somehow mirror what Enoch was sharing as a motion for the sun and moon. As I began to read chapters 71-82, I found to my utter amazement that I was able to grasp those passages. I knew then that the vision that the angel Uriel had shown to Enoch could only be deciphered if one were to imagine Enoch's description of the revolution of the sun and the moon. As seen from above the flat circular plane of the earth as described by Isaiah; and that Enoch must have been taken up to perhaps where Polaris is, centered directly above the North Pole, and while looking down at the backdrop of the earth, was instructed on the motions of both the sun and moon. Without such conception, it is in my opinion impossible to apply these descriptions to the model of the earth as a spherical planet.

The civil wars of the first half of the fifteenth century still stand in the popular imagination as the period of greatest anarchy in English history. While historians have long taken a more measured view, controversy still surrounds their interpretation. In this revised edition of his revaluation of the Wars of the Roses, A. J. Pollard has incorporated into the text the product of new research and consideration of the debates which have emerged since the book was first published in 1988. These include the new stress on 'constitutional' history, intensified dispute about the origins of the wars, and recent reinterpretations of the careers of some of the principal personalities. In a topic which has become more contested in the last decade of the twentieth century, this introduction offers a succinct narrative, a review of the historiography and an overview of the problems of interpretation of the character, causes, impact and consequences of the wars which periodically disrupted England between 1459 and 1487.

Volume II of The Cambridge History of War covers what in Europe is commonly called 'the Middle Ages'. It includes all of the well-known themes of European warfare, from the migrations of the Germanic peoples and the Vikings through the Reconquista, the Crusades and the age of chivalry, to the development of state-controlled gunpowder-wielding armies and the urban militias of the later middle ages; yet its scope is world-wide, ranging across Eurasia and the Americas to trace the interregional connections formed by the great Arab conquests and the expansion of Islam, the migrations of horse nomads such as the Avars and the Turks, the formation of the vast Mongol Empire, and the spread of new technologies – including gunpowder and the earliest firearms – by land and sea.

Did they discover treasure so valuable that King Philip IV of France was willing to kill them to obtain? If so, what happened to the treasure? Or, did they discover priceless treasure concerning Christianity, which caused Pope Clement V to enlist the help of King Philip to suppress the Templars before they revealed what they had discovered and destroyed the foundation of the Papacy and its claims of universal supremacy? What was this ?Priceless-Treasure? that was discovered by the Knights Templar, which was such a severe threat to the Roman Catholic Church and the Pope that they would be willing to kill the Templars over? Moreover, that men like Jacques de Molay would rather be burned at the stake than renounce? Through the research of Professor Kenneth Onapoli, the answers to all of these questions and more are finally revealed.
