This collection of essays asserts the specific value of world history research and teaching, showing how the field contributes to the larger historical profession and offering concrete suggestions to develop more interaction between the academy and the public. The twelve contributors, each with their own academic areas of interest, are experienced scholars and classroom teachers. Uniting them together in this volume is their professional relationship with Jerry H. Bentley (1949–2012). This shared connection served as a catalyst to showcase Bentley's enduring legacy: a commitment to investigating large-scale questions with detailed empirical evidence that explains the human condition—documenting both patterns of similarity and difference in ways that account for regional and temporal variations. The volume continues Bentley's meticulous attention to world

historical methods: focus on scale, cross-cultural encounter, comparison, periodization, critical geography, and interdisciplinarity. *Encounters Old and New in World History* responds to provocations that Jerry Bentley tendered in his scholarship and through his professional activities. Contributors interrogate the institutional settings, disciplinary proclivities, methodological choices, and diverse source bases of world history research and teaching. Several essays address the ways in which present-day concerns influence research on local and global scales. Other essays pay particular attention to the production and circulation of knowledge across regional, temporal, and class boundaries, as well as between the academy and the wider public. Claiming the centrality of globally informed and focused approaches to historical inquiry, researchers continue the conversations that Bentley carried on through his own scholarship, teaching, editing of the *Journal of World History*, participating in public forums, and contributing to public discussions about the place of history in understanding today's global integration. The stakes involved in asking questions about the shared history of humankind continue to increase in the current era of intensified globalization. It is incumbent upon scholars with the skills to work across linguistic, geographic, temporal, and disciplinary boundaries to show the ways that cross-cultural encounters happened historically, and to point out how such interactions play out in the institutions, classrooms, and public debates where historical interpretations are created and shared.

Focusing on the work of Lorenzo Valla, the Spanish Complutensian scholars, and Erasmus of Rotterdam, this book examines the New Testament studies of the Renaissance humanists rather than their more frequently studied religious, moral, and political thought. Jerry H. Bentley shows that the humanists brought about a thorough reorientation in the Western tradition of New Testament studies. He finds that the humanists' methods both anticipated and influenced later New Testament scholarship. The humanists rejected the medieval practice of studying the New Testament only in Latin translation and interpreting it in accordance with preconceived theological criteria. Instead, they insisted that New Testament studies be based on the original Greek text, and they employed linguistic, historical, and philological criteria in explaining the scriptures. This study rests on an analysis of the New Testament manuscripts that the humanists consulted and of the New Testament editions, translations, annotations, and commentaries that they prepared.

The era from 1400 to 1800 saw intense biological, commercial, and cultural exchanges, and the creation of global connections on an unprecedented scale. Divided into two books, Volume 6 of the Cambridge World History series considers these critical transformations. The first book examines the material and political foundations of the era, including global considerations of the environment, disease, technology, and cities, along with regional studies of empires in the eastern and western hemispheres, crossroads areas such as the Indian Ocean, Central Asia, and the Caribbean, and sites of competition and conflict, including Southeast Asia, Africa, and the Mediterranean.

The second book focuses on patterns of change, examining the expansion of Christianity and Islam, migrations, warfare, and other topics on a global scale, and offering insightful detailed analyses of the Columbian exchange, slavery, silver, trade, entrepreneurs, Asian religions, legal encounters, plantation economies, early industrialism, and the writing of history.
