Thomas C. Foster

By Reason of Insanity Shane Stevens,2014-11-11 Stevens takes readers on a harrowing descent into the mind of a mass murderer in this eerily realistic serial-killer novel. At the center of this gripping epic novel of mass murder, pursuit, and psychological terror is Thomas Bishop, a psychotic young killer who believes he is the son of Caryl Chessman, who was executed for rape in California amid intense controversy. Subjected to unmerciful physical and mental torture from an early age, Bishop kills his mother at the age of ten and is placed in an institution for the criminally insane. He grows to manhood knowing the outside world only through a television screen. At twenty-five, he succeeds in a brilliant escape and change of identity and begins to move across the country, murdering women in particularly gruesome ways. Pursued by reporters, police, and the mob, Bishop manages to elude them all, and the search for him becomes the greatest manhunt in US history. The chilling denouement will hold readers spellbound until the shattering, unforgettable conclusion.

The Knowledge Illusion Steven Sloman,Philip Fernbach,2017-03-14 "The Knowledge Illusion is filled with insights on how we should deal with our individual ignorance and collective wisdom." —Steven Pinker We all think we know more than we actually do. Humans have built hugely complex societies and technologies, but most of us don't even know how a pen or a toilet works. How have we achieved so much despite understanding so little? Cognitive scientists Steven Sloman and Philip Fernbach argue that we survive and thrive despite our mental shortcomings because we live in a rich community of knowledge. The key to our intelligence lies in the people and things around us. We're constantly drawing on information and expertise stored outside our heads: in our bodies, our environment, our possessions, and the community with which we interact—and usually we don't even realize we're doing it. The human mind is both brilliant and pathetic. We have mastered fire, created democratic institutions, stood on the moon, and sequenced our genome. And yet each of us is error prone,

sometimes irrational, and often ignorant. The fundamentally communal nature of intelligence and knowledge explains why we often assume we know more than we really do, why political opinions and false beliefs are so hard to change, and why individual-oriented approaches to education and management frequently fail. But our collaborative minds also enable us to do amazing things. The Knowledge Illusion contends that true genius can be found in the ways we create intelligence using the community around us.

Strategic Imaginations Anke Gilleir, Aude Defurne, 2020-12-15 Imaginations of female rule and the imaginative strategies of women rulers What is the gender of political power? What happens to the history of sovereignty when we reconsider it from a gender perspective? Political sovereignty has been a major theme in European thought from the very beginning of intellectual reflection on community. Philosophy and political theory, historiography, theology, and literature and the arts have, often in dialogue with one another, sought to represent or recalibrate notions of rule. Yet whatever covenant was imagined, sovereign rule has consistently been figured as a male prerogative. While in-depth studies of historical women rulers have proliferated in the past decades, these have not systematically explored how all women rulers throughout the entirety of European culture have had to operate in a context that could not think power as female - except in grotesque terms. *Strategic Imaginations* demonstrates that this constitutive tension can only be brought out by studying women's political rule in a comparative and *longue durée* manner. The book offers a collection of essays that brings together studies of female sovereignty from the Polish-Lithuanian to the British Commonwealth, and from the Middle Ages to the genesis of modern democracy. It addresses historical figures and takes stock of the rich yet unsettling imagination of female rule in philosophy, literature and art history. For all the variety of geographical, social, and historical contexts it engages, the book reveals surprising resonances between the strategies women rulers used and the images and practices they adopted in the

context of an all-pervasive skepticism toward female rule.

How to Read Literature Like a Professor 3E Thomas C. Foster, 2024-11-05 Thoroughly revised and expanded for a new generation of readers, this classic guide to enjoying literature to its fullest—a lively, enlightening, and entertaining introduction to a diverse range of writing and literary devices that enrich these works, including symbols, themes, and contexts—teaches you how to make your everyday reading experience richer and more rewarding. While books can be enjoyed for their basic stories, there are often deeper literary meanings beneath the surface. *How to Read Literature Like a Professor* helps us to discover those hidden truths by looking at literature with the practiced analytical eye—and the literary codes—of a college professor. What does it mean when a protagonist is traveling along a dusty road? When he hands a drink to his companion? When he’s drenched in a sudden rain shower? Thomas C. Foster provides answers to these questions as he explores every aspect of fiction, from major themes to literary models, narrative devices, and form. Offering a broad overview of literature—a world where a road leads to a quest, a shared meal may signify a communion, and rain, whether cleansing or destructive, is never just a shower—he shows us how to make our reading experience more intellectually satisfying and fun. The world, and curricula, have changed. This third edition has been thoroughly revised to reflect those changes, and features new chapters, a new preface and epilogue, as well as fresh teaching points Foster has developed over the past decade. Foster updates the books he discusses to include more diverse, inclusive, and modern works, such as Angie Thomas’s *The Hate U Give*; Emily St. John Mandel’s *Station Eleven*; Neil Gaiman’s *Neverwhere*; Elizabeth Acevedo’s *The Poet X*; Helen Oyeyemi’s *Mr. Fox and Boy*; Snow, Bird; Sandra Cisneros’s *The House on Mango Street*; Zora Neale Hurston’s *Their Eyes Were Watching God*; Maggie O’Farrell’s *Hamnet*; Madeline Miller’s *Circe*; Pat Barker’s *The Silence of the Girls*; and Tahereh Mafi’s *A Very Large Expanse of Sea*.

The Government of No One Ruth Kinna, 2019-08-01 'The standard book on anarchism for the twenty-first century. Written with brio, quiet insight and clarity' Carl Levy A magisterial study of the history and theory of one of the most controversial political movements Anarchism routinely gets a bad press. It's usually seen as meaning chaos and disorder -- or even nothing at all. And yet, from Occupy Wall Street to Pussy Riot, Noam Chomsky to David Graeber, this philosophical and political movement is as relevant as ever. Contrary to popular perception, different strands of anarchism -- from individualism to collectivism -- do follow certain structures and a shared sense of purpose: a belief in freedom and working towards collective good without the interference of the state. In this masterful, sympathetic account, political theorist Ruth Kinna traces the tumultuous history of anarchism, starting with thinkers and activists such as Peter Kropotkin and Emma Goldman and through key events like the Paris Commune and the Haymarket affair. Skilfully introducing us to the nuanced theories of anarchist groups from Russia to Japan to the United States, *The Government of No One* reveals what makes a supposedly chaotic movement particularly adaptable and effective over centuries -- and what we can learn from it.

Negotiating Climate Change in Crisis Steffen Böhm, Sian Sullivan, 2021-09-28 Climate change negotiations have failed the world. Despite more than thirty years of high-level, global talks on climate change, we are still seeing carbon emissions rise dramatically. This edited volume, comprising leading and emerging scholars and climate activists from around the world, takes a critical look at what has gone wrong and what is to be done to create more decisive action. Composed of twenty-eight essays—a combination of new and republished texts—the anthology is organised around seven main themes: paradigms; what counts?; extraction; dispatches from a climate change frontline country; governance; finance; and action(s). Through this multifaceted approach, the contributors ask pressing questions about how we conceptualise and respond to the climate crisis, providing both ‘big picture’ perspectives and more focussed case studies. This unique and extensive collection will be of great value to environmental and social scientists alike, as well as to the general reader interested in understanding current views on the climate crisis.

The Heroic Client Barry L. Duncan, Scott D. Miller, Jacqueline A. Sparks, 2011-03-10 In this controversial book, psychologists Barry Duncan and Scott Miller, cofounders of the Institute for the Study of Therapeutic Change, challenge the traditional focus on diagnosis, silver bullet techniques, and magic pills, exposing them as empirically bankrupt practices that only diminish the role of clients and hasten therapy's extinction. Instead, they advocate for the long-ignored but most crucial factor in therapeutic success—the innate resources of the client. Based on extensive clinical research and case studies, *The Heroic Client* not only shows how to harness the client's powers of regeneration to make therapy effective, but also how to enlist the client as a partner to make therapy accountable. *The Heroic Client* inspires therapists to boldly rewrite the drama of therapy, recast clients in their rightful role as heroes and heroines of the therapeutic stage, and legitimize their services to third-party payers without the compromises of the medical model.

Ethics and Neurodiversity Alexandra Perry, Anthony Yankowski, 2014-09-26 Increasingly, voices in the growing neurodiversity movement are alleging that individuals who are neurologically divergent, such as those with conditions related to bipolar disorder, autism, schizophrenia, and depression, must struggle for their civil rights. This movement therefore raises questions of interest to scholars in the humanities and social sciences, as well as to concerned members of the general public. These questions have to do with such matters as the accessibility of knowledge about mental health; autonomy and community within the realm of the mentally ill; and accommodation in civil society and its institutions. The

contributors to Ethics and Neurodiversity explore these questions, and the traditional philosophical questions related to them. The authors pay special attention to the need to examine the policies and practices of institutions, such as higher education, social support, and healthcare.

The Human Factor in the Settlement of the Moon Margaret Boone Rappaport, Konrad Szocik, 2021-11-19 Approaching the settlement of our Moon from a practical perspective, this book is well suited for space program planners. It addresses a variety of human factor topics involved in colonizing Earth's Moon, including: history, philosophy, science, engineering, agriculture, medicine, politics & policy, sociology, and anthropology. Each chapter identifies the complex, interdisciplinary issues of the human factor that arise in the early phases of settlement on the Moon. Besides practical issues, there is some emphasis placed on preserving, protecting, and experiencing the lunar environment across a broad range of occupations, from scientists to soldiers and engineers to construction workers. The book identifies utilitarian and visionary factors that shape human lives on the Moon. It offers recommendations for program planners in the government and commercial sectors and serves as a helpful resource for academic researchers. Together, the coauthors ask and attempt to answer: "How will lunar society be different?"
