

Calculus With Analytic Geometry 5th Edition

Judith L. Gersting

Calculus with Analytic Geometry Ron Larson, Robert P. Hostetler, Bruce H. Edwards, 1998 This traditional text offers a balanced approach that combines the theoretical instruction of calculus with the best aspects of reform, including creative teaching and learning techniques such as the integration of technology, the use of real-life applications, and mathematical models. The *Calculus with Analytic Geometry Alternate, 6/e*, offers a late approach to trigonometry for those instructors who wish to introduce it later in their courses.

Calculus with Analytic Geometry Fifth Edition and Discovering Calculus with Mathematica and Mathematica IBM Student Version Howard Anton, Cecilia A. Knoll, Michael L. Shaw, Jerry Johnson, Benny Evans, Wolfram Research, Inc., 1997-06-13

Calculus and Analytic Geometry Sherman K. Stein, Anthony Barcellos, 1992-01-01 A revision of McGraw-Hill's leading calculus text for the 3-semester sequence taken primarily by math, engineering, and science majors. The revision is substantial and has been influenced by students, instructors in physics, engineering, and mathematics, and participants in the national debate on the future of calculus. Revision focused on these key areas: Upgrading graphics and design, expanding range of problem sets, increasing motivation, strengthening multi-variable chapters, and building a stronger support package.

Technical Calculus with Analytic Geometry Judith L. Gersting, 2012-06-14 Well-conceived text with many special features covers functions and graphs, straight lines and conic sections, new coordinate systems, the derivative, much more. Many examples, exercises, practice problems, with answers. Advanced undergraduate/graduate-level. 1984 edition.

Calculus with Analytic Geometry Richard H. Crowell, William E. Slesnick, 1968 This book introduces and develops the

differential and integral calculus of functions of one variable.

Calculus Morris Kline, 2013-05-09 Application-oriented introduction relates the subject as closely as possible to science with explorations of the derivative; differentiation and integration of the powers of x ; theorems on differentiation, antidifferentiation; the chain rule; trigonometric functions; more. Examples. 1967 edition.

(WCS)Calculus with Analytic Geometry, 5th Edition Volume 2 for James Madison University Howard Anton, 2007-06-28

A Stroll Through Calculus: A Guide for the Merely Curious Anthony Barcellos, 2015-01-21 A Stroll through Calculus: A Guide for the Merely Curious helps students fully understand calculus and successfully grasp its concepts. The foundational premise is that calculus is, at its most basic, about measuring things and how fast they change. The material gives non-majors an appreciation for calculus and teaches them its importance without the formal proofs needed only by math majors. In clear, concise chapters the text familiarizes students with concepts such as the area of a rectangle, notation, and polynomials. It introduces the fundamentals discovered by Newton and Leibniz and their varied applications. Students are encouraged to engage in participatory reading by referring to the examples in the chapters and then checking each step independently. A Stroll through Calculus is designed to supplement instruction in calculus, science, and education classes for non-math majors. It is an excellent learning tool for students in engineering, pre-medical studies, and the social sciences. It can also be used in pre-service teaching programs for educators who will need a solid background for math units they will teach.

Precalculus James Stewart, L. Redlin, Saleem Watson, 2002 In this best selling Precalculus text, the authors explain concepts simply and clearly, without glossing over difficult points. This comprehensive, evenly-paced book provides complete coverage of the function concept and integrates substantial graphing calculator materials that help students develop insight into mathematical ideas. This author team invests the same attention to detail and clarity as Jim Stewart does in his market-leading Calculus text.

Elementary Geometry for College Students Daniel C. Alexander, Geralyn M. Koeberlein, 1999

Thomas' Calculus Weir, Joel Hass, 2008

Calculus Earl W. Swokowski, 2000-06 This edition of Swokowski's text is truly as its name implies: a classic. Groundbreaking in every way when first published, this book is a simple, straightforward, direct calculus text. Its popularity is directly due to its broad use of applications, the easy-to-understand writing style, and the wealth of examples and exercises which reinforce conceptualization of the subject matter. The author wrote this text with three objectives in mind. The first was to make the book more student-oriented by expanding discussions and providing more examples and figures to help clarify concepts. To further aid students, guidelines for solving problems were added in many sections of the text. The second

objective was to stress the usefulness of calculus by means of modern applications of derivatives and integrals. The third objective, to make the text as accurate and error-free as possible, was accomplished by a careful examination of the exposition, combined with a thorough checking of each example and exercise.

Precalculus with Limits Ron Larson, David C. Falvo, Robert P. Hostetler, 2010-05-04 With the same design and feature sets as the market leading Precalculus, 8/e, this addition to the Larson Precalculus series provides both students and instructors with sound, consistently structured explanations of the mathematical concepts. Designed for a two-term course, this text contains the features that have made Precalculus a complete solution for both students and instructors: interesting applications, cutting-edge design, and innovative technology combined with an abundance of carefully written exercises. In addition to a brief algebra review and the core precalculus topics, PRECALCULUS WITH LIMITS, International Edition, covers analytic geometry in three dimensions and introduces concepts covered in calculus.
