A masterpiece of technical exposition, it was the basic textbook of astronomy for more than a thousand years, and still is the main source for our knowledge of ancient astronomy. This translation, based on the standard Greek text of Heiberg, makes the work accessible to English readers in an intelligible and reliable form. It contains numerous corrections derived from medieval Arabic translations and extensive footnotes that take account of the great progress in understanding the work made in this century, due to the discovery of Babylonian records and other researches. It is designed to stand by itself as an interpretation of the original, but it will also be useful as an aid to reading the Greek text.

First published by CUP in 1989, *The Medieval Greek Romance* provides basic information for the non-specialist about Greek fiction during the period 1071-1453, as well as proposing new solutions to problems that have vexed previous generations of scholars. Roderick Beaton applies sophisticated methods of literary analysis to the material, and the bridges of the artificial gap which has separated 'Byzantine' literature, in a form of ancient Greek as both homogenous and of a high level of literary sophistication. Throughout, consideration is given to relations and interconnections with similar literature in western Europe. As most of the texts discussed are not available in English translation, the argument is illustrated by lucid plot summaries and extensive quotation (accompanied by literal English renderings). For this edition, *The Medieval Greek Romance* has been revised throughout and expanded with the addition of an 'Afterword' which assesses and responds to recent work on the subject.

Using a wealth of interviews, observations and pupil transcripts, Steven Hunt title utilizes case-study evidence of excellent practice in teaching and learning from a wide variety of institutions: from outreach programmes, community schools and academies in the UK, to New York Charter Schools, KIP schools and schools in Eastern Seaboard states in the USA. Ovid is now firmly established as a central figure in the Latin poetic canon, and his *Fasti* is his most complex elegy. Drafted alongside the *Metamorphoses* before the poet's exile, it was only published after the death of Augustus, and involves a wide range of myth, Roman history, religion, astronomy and explication of the calendar. In its aetiology and conversations with gods, it is a Latin equivalent of Callimachus' *Aetia*. This invaluable new commentary on a central book of the poem explores Ovid's playful inversion of genre, his witty but challenging style of Latin, his use of the elegiac couplet, intertextuality and much more. With a comprehensive introduction providing key background for students and instructors, this guide to Book 3, the first in English for nearly a century, makes use of the latest scholarly research to illuminate Ovid's wide-ranging and amusing account of Roman life. Ovid's magnificent panorama of the Greek and Roman myths-presented by a noted poet, scholar, and critic. Prized through the ages for its splendor and its savage, sophisticated wit, *The Metamorphoses* is a masterpiece of Western culture-the first attempt to link all the Greek myths, before and after Homer, in a cohesive whole, to the Roman myths of Ovid's day. Horace Gregory, in this modern translation, turns his own poetic gifts toward a deft reconstruction of Ovid's ancient themes, using contemporary idiom to bring to today's reader all the ageless drama and psychological truths vividly intact.

This collection of ancillary Latin narrative passages is intended to supplement the Cambridge Latin Course, and can be used to provide extra practice in translation and/or comprehension, or to provide material for evaluation purposes on tests and examinations. The stories have served both purposes in the classes for which they have been composed over the last 20 years. The Cambridge Latin Course is successful in its avowed aim to prepare students to read and understand Latin, mainly because its stories are so interesting that students want to be able to read them. That success, however, poses a challenge to the teacher/evaluator. To measure a student's success in achieving the Course's primary aim, the student has to be asked to translate or answer comprehension questions "at sight" on a connected passage of Latin. The Fabulae Ancillantes answer this need, providing passages that are in line with the Cambridge Latin Course, yet are new to the student.

Meritocracy: the idea that people should be advanced according to their talents rather than their birth. While this initially seemed like a novel concept, by the end of the twentieth century it had become the world's ruling ideology. How did this happen, and why is meritocracy now under attack from both right and left? In *The Aristocracy of Talent*, esteemed journalist and historian Adrian Wooldridge traces the history of meritocracy forged by the politicians and officials who introduced the revolutionary principle of open competition, the psychologists who devised methods for measuring natural mental abilities, and the educationalists who built ladders of educational opportunity. He looks outside western cultures and shows what transformative effects it has had everywhere it has been adopted, especially once women were brought into the meritocratic system. Wooldridge also shows how meritocracy has now become corrupted and argues that the recent stalling of social mobility is the result of failure to complete the meritocratic revolution. Rather than abandoning meritocracy, he says, we should call for its renewal.

Dr Hackett discovered in the Angelica Library in Rome a manuscript containing a unique text of the first constitution of Cambridge University. The centrepiece of this book is a critical edition of the text with an English translation on facing pages. The importance of his discovery for historians of Cambridge and of medieval university education cannot be overestimated. The Cambridge constitutions form a complete code, promulgated at a remarkably early date (c. 1250). Dr Hackett shows that Oxford lagged more than 50 years behind Cambridge in codifying its statutes and neither Paris nor Bologna, the oldest of all universities, had a written constitution or code of laws at this time.
