The Cambridge Primary Review Research Surveys is the outcome of the Cambridge Primary Review – England's biggest enquiry into primary education for over forty years. Fully independent of government, it was launched in 2006 to investigate the condition and future of primary education at a time of change and uncertainty and after two decades of almost uninterrupted reform. Ranging over ten broad themes and drawing on a vast array of evidence, the Review published thirty-one interim reports, including twenty-eight surveys of published research, provoking media headlines and public debate, before presenting its final report and recommendations. This book brings together the twenty-eight research surveys, specially commissioned from sixty-five leading academics in the areas under scrutiny and now revised and updated, to create what is probably the most comprehensive overview and evaluation of research in primary education yet published. A particular feature is the prominence given to international and comparative perspectives. With an introduction from Robin Alexander, the

Practical Faster Reading provides the basis for a reading improvement course lasting a total of 30 class hours and has proved popular with students and teachers in a variety of settings. Thirty passages covering a wide range of topics of general interest and accompanying exercises give practice in the reading skills needed at upper-intermediate and more advanced levels. Substantial increases in reading speed are usually attained with improvements in comprehension and vocabulary. The full answer key for self-checking also makes this useful for the student working alone.
