Context activities and cultural participation trends in Italy: a wide-angle snapshot of basic data and statistics illustrating the activities of the ministry and other public and private entities working to protect Italy's heritage and promote culture.

This handbook has two purposes: it is intended (1) as a handbook of Etruscology or Etruscan Studies, offering a state-of-the-art and comprehensive overview of the history of the discipline and its development, and (2) it serves as an authoritative reference work representing the current state of knowledge on Etruscan civilization. The organization of the volume reflects this dual purpose. The first part of the volume is dedicated to methodology and leading themes in current research, organized thematically, whereas the second part offers a diachronic account of Etruscan history, culture, religion, art & archaeology, and social and political relations and structures, as well as a systematic treatment of the topography of the Etruscan civilization and sphere of

influence. ?

OECD's comprehensive review of rural policy in Italy. This collection of papers covers a wide range of relevant issues and aspects of slope stability engineering from both practical and scientific points of view from the Proceedings of the International Symposium on Slope Stability Engineering : Is--Shikoku'99 : Matsuyama, Shikoku, Japan, 8-11 November, 1999.

This book provides an updated insight into the overall tectonic evolution of the Western Mediterranean region and North Africa. The tectonic setting of the region reflects a long-lived and complex evolution, mainly related to the Alpine Orogeny. This inheritance is expressed by an intricate pattern of arc-shaped mountain chains, the Alps, the Betic-Rif Cordilleras and the Apennine-Maghrebian belt, whose southern branches mark the present limit between the African and Eurasian plates. The volume covers the Maghrebian chains in North Africa, from Tunisia to Morocco and the Western and Central Mediterranean, from Spain to Italy from the pre-orogenic phases (Palaeozoic-Mesozoic) to the post-collisional neotectonic and Quaternary development. It includes both original research papers and syntheses dealing with the aspects of structural, sedimentary, metamorphic, marine geology.

Presents a collection of seventy-five recipes for desserts organized by five regions of southern Italy, with a short history of Italian dessert cooking and advice on ingredients and cooking equipment.

Nei condomini si verificano numerosi sinistri che danneggiano il fabbricato assicurato con la polizza globale fabbricati. Espressamente concepita per il

condominio, assolve un duplice obiettivo: quello di coprire sia i danni arrecati al fabbricato assicurato, sia la responsabilità civile per i danni cagionati a terzi verificatisi in relazione alla proprietà del fabbricato. È evidente che un contratto di assicurazione di tale complessità catalizza intorno a sé un'intera filiera di attori, tra loro dialoganti, che vanno dai liquidatori di assicurazioni agli amministratori di condominio, fino ai periti assicurativi (architetti, geometri, ingegneri), agli agenti e ai broker di assicurazione. L'opera intende fornire ai soggetti coinvolti nella gestione dei sinistri tutto quel complesso di conoscenze tecnico-giuridiche necessarie per una corretta e veloce liquidazione dei danni al fabbricato assicurato, nonché per un'equa gestione di quelli da responsabilità civile.
