A chapter in the chronicle of the Cuban Revolution, as told by those on the front lines of that ongoing epic. Armando Choy, Gustavo Chui, and Moisés Sío Wong—three young rebels of Chinese-Cuban ancestry—threw themselves into the great proletarian battle that defined their generation. They became combatants in the clandestine struggle and 1956-58 revolutionary war that brought down a U.S.-backed dictatorship and opened the door to the socialist revolution in the Americas. Each became a general in Cuba's Revolutionary Armed Forces.

Here they talk about the historic place of Chinese immigration to Cuba, as well as more than five decades of revolutionary action and internationalism, from Cuba to Angola, Nicaragua, and Venezuela. Fidel Castro and Nelson Mandela).

The bestselling book revealing why Americans are so fearful, and why we fear the wrong things--now updated for the age of Trump In the age of Trump, our society is defined by fear. Indeed, three out of four Americans say they feel more fearful today than they did only a couple decades ago. But are we living in exceptionally perilous times? In his bestselling book *The Culture of Fear*, sociologist Barry Glassner demonstrates that it is our perception of danger that has increased, not the actual level of risk. Glassner exposes the people and organizations that manipulate our perceptions and profit from our fears: politicians who win elections by heightening concerns about crime and drug use even as rates for both are declining; advocacy groups that raise money by exaggerating the prevalence of particular diseases; TV shows that create a

new scare every week to garner ratings. Glassner spells out the prices we pay for social panics: the huge sums of money that go to waste on unnecessary programs and products as well as time and energy spent worrying about our fears. All the while, we are distracted from the true threats, from climate change to worsening inequality. In this updated edition of a modern classic, Glassner examines the current panics over vaccination and "political correctness" and reveals why Donald Trump's fearmongering is so dangerously effective.

To celebrate the 50th anniversary of *Howl and Other Poems*, with nearly one million copies in print, City Lights presents the story of editing, publishing and defending Allen Ginsberg's landmark poem within a broader context of obscenity issues and censorship of literary works. This collection begins with an introduction by publisher Lawrence Ferlinghetti, who shares his memories of hearing *Howl* first read at the 6 Gallery, of his arrest and of the subsequent legal defense of *Howl*'s publication. Never-before-published correspondence of Ginsberg, Ferlinghetti, Kerouac, Gregory Corso, John Hollander, Richard Eberhart and others provides an in-depth commentary on the poem's ethical intent and its social significance to the author

and his contemporaries. A section on the public reaction to the trial includes newspaper reportage, op-ed pieces by Ginsberg and Ferlinghetti and letters to the editor from the public, which provide fascinating background material on the cultural climate of the mid-1950s. A timeline of literary censorship in the United States places this battle for free expression in a historical context. Also included are photographs, transcripts of relevant trial testimony, Judge Clayton Horn's decision and its ramifications and a long essay by Albert Bendich, the ACLU attorney who defended Howl on constitutional grounds. Editor Bill Morgan discusses more recent challenges to Howl in the late 1980s and how the fight against censorship continues today in new guises.

Afrikan life into the coming millennia is imperiled by White and Asian power. True power must nest in the ownership of the real estate wherever Afrikan people dwell. Economic destiny determines biological destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of Afrikan Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. This publication offers a comprehensive look at the management of oaks in urban areas. As development moves into oak woodland areas, more and more oaks are becoming "urban" oaks. Oaks are highly valued in urban areas for their aesthetic,

environmental, economic and cultural benefits. However, significant impacts to the health and structural stability of oaks have resulted from urban encroachment. Changes in environment, incompatible cultural practices, and pest problems can all lead to the early demise of our stately oaks. Using this book you'll learn how to effectively manage and protect oaks in urban areas - existing oaks as well as the planting of new oaks. Three key areas are addressed: selection, care, and preservation. You'll learn how cultural practices, pest management, risk management, preservation during development, and genetic diversity can all play a role in preserving urban oaks. Arborists, urban foresters, landscape architects, planners and designers, golf course superintendents, academics, and Master Gardeners alike will find this to be an invaluable reference guide.

On March 14, 1948, Douglas Hyde handed in his resignation as the news editor of the London Daily Worker and wrote "the end" to twenty years of his life as a member of the Communist Party. A week later, in a written statement, Hyde announced that he had renounced Communism and, with his wife and children, was joining the Catholic Church. The long pilgrimage from Communism to Christ carried Douglas Hyde from complete commitment to Marxism, to a questioning uneasiness about Soviet Russia's glaring contradictions of ideology and action, to a final rejection of the Party. In *Dedication and Leadership*, he advances the theory that although the goals and aims of Communism are antithetical to human dignity and the rights of the individual, there is much to be learned from communist methods, cadres and psychological motivation. Hyde describes the Communist mechanics of instilling dedication, the first prerequisite for leadership. Here is the complete rationale of party technique: how to stimulate the willingness to sacrifice; the advisability of making big demands to insure a big response; the inspirational indoctrination; and the subtle conversion methods. In this small book, so large with implications, Douglas Hyde comments on both Communist and Catholic potential and their lack of maximum effectiveness. He advocates positive Catholic action, not just a negative anti-Communism, and he points out that the guidelines are now down for a decisive choice between total Communism and a total Christianity. Here is a realistic approach to an acute problem uncolored by emotional propaganda, and here is a realistic answer on how to inspire dedication for leadership.
