Do you enjoy unleashing your creative side in fun and rewarding ways? Creating something that is of your own making is always a fulfilling experience which can be taken to new heights by proper usage of Cricut machine. Cricut machine is a dream come true for a DIYer which allows the user to design paper crafts, vinyl lettering for t-shirts, wood plaques, walls, cars, windows and more. I can still remember the excitement I felt when I brought my Cricut home which was immediately followed by disappointment when I realized that I knew as much about using it as I do about a nuclear reactor. Needless to say, I haven't managed to craft my first item the same day as that cute machine isn't as simple to use as it may seem. Eventually, through the power of persistence and mostly dumb luck I managed to crank out item after item, most of which are placed around my apartment reminding me of my effort. It wasn't simple figuring these things out, so being someone who has always enjoyed helping people, I decided to write a guide on using Cricut machine so that you can save time and start creating sooner and not have to go through the same headaches I had to. In this book you can expect to learn about:

Introducing techniques for making pop-ups from one sheet of card, the third title in this series on paper engineering takes folding techniques into the third dimension. Each chapter introduces a new technical idea and shows how that technique can be adapted in many different ways, or combined with techniques from earlier chapters. These 3-D techniques can be incorporated into any design where typography and/or illustration are used, including mail-shots, personal publicity, invitations, business cards and greetings cards. With their emphasis on surface design over complex cutting, the pop-ups have an instant appeal for designers. Following the elegant, easy-to-follow style of Paul Jackson's other titles for Laurence King, *Cut and Fold Techniques for Pop-Up Designs* is an essential resource for marketing professionals and design students.

Enter the enchanting world of pop-ups and handmade paper crafts.
