What will you do when you encounter identity theft within your business? Chances are, you have already lost money to identity theft and business fraud. Look no further than the latest newspaper headlines to know that it is an epidemic problem and an alarming reality from which no business-whether small or large-is immune. Although you can't completely stop identity theft from happening, you can be prepared when it takes place. Investigating Identity Theft: A Guide for Businesses, Law Enforcement, and Victims is your practical guide for fully understanding and investigating identity theft. "The training that I received from Judy Collins at MSU has been instrumental to my helping victims of identity theft and locating the person(s) who caused their nightmare. I have even used the training methods she outlines in this book on a homicide investigation and it paid off: the perpetrator is now in jail for the rest of his life. I can't say enough about Dr. Collins and her knowledge of tracking criminals on the Internet; she is a great asset to law enforcement." -Anthony Abdallah, Police Detective, Inkster Police Department (CID), Inkster, Michigan "This valuable book is an essential, pragmatic guide for the full understanding and investigation of identity theft crimes. It also establishes Dr. Judith Collins as a foremost national expert on this growing crime problem that threatens our future." -Dr. Bruce L. Benson, Police Chief Emeritus, Associate Professor, Criminal Justice, Michigan State University "Whether the investigator is working in the private or public sector, Dr. Collins presents valuable information on the methodology required to successfully resolve identity theft cases. The use of real-life investigations, with lessons learned, provides an intriguing and entertaining format while at the same time sharpening the investigator's skills. If you think investigating identity theft is not worthwhile because the crime is committed by individuals on randomly selected victims without specific objectives, goals, or purpose, you need to read this book." -Rod Kinghorn, Director of Investigations, General Motors Global Security "An excellent book. Judith Collins has spent many years investigating identity theft. Her willingness to share her knowledge with law enforcement, businesses, and victims is truly a benefit that cannot be found elsewhere." -Juli Liebler, Captain, East Lansing Police Department, East Lansing, Michigan "Well done. Smart idea. . . . This is an excellent, professionally written book . . . and much needed." -Salman Anwar, Computer Forensic Engineer, Western Michigan University Police Department "As a retired special agent with the Federal Bureau of Investigation, and having worked the past six years in the private sector, I found Dr. Collins's book to be an invaluable tool for both the private sector and the law enforcement community. Dr. Collins provides genuine insight into the complex issues surrounding identity theft. I am confident her book will assist in both the prevention of identity theft and the detection of those who prey on other's identities." -Frank Laudan, Investigator, Securitas Security Services USA, Inc. "Excellent guide! A must-read for anyone involved in investigating identity theft! Dr. Collins has become one of the most respected and knowledgeable authorities in this relatively new field." -Detective Gary A. Guiles (Retired), Fraud Investigator, Lansing Police Department, Lansing, Michigan

Discover how you can earn \$35 to \$60 an hour driving seniors to medical appointments. This fast-growing service business is needed every day in every town and you can get started on a shoestring. One in five seniors does not drive and many of those may be forced to stay home due to lack of transportation and miss a medical appointment or be unable to shop for groceries. A private senior transportation service helps those seniors get around easily. In addition, the federal government now requires that state medicaid programs cover the cost of transportation to medical appointments. This has created even more opportunities for local senior transportation businesses. A senior transportation can be started with very little money - if you have a reliable car and a cellphone, you're almost there. The rewards are great - not just in dollars and cents - but in helping seniors live better lives by helping them enjoy their independence as long as possible. That's priceless. What is an N.E.M.T. vehicle? Unlike some specialized medical transportation vehicles - like an ambulance - a basic senior ride service does not require a special vehicle to transport seniors. There are far more seniors who are able to walk and just need a ride on a regular basis. NEMT is short for non-emergency medical transport. The name means exactly that - unlike an ambulance, your vehicle, whether a car, SUV or minivan, is an NEMT vehicle if you are taking passengers to and from medical appointments. You won't need to buy an expensive new van or specialized equipment, because you can focus on where there is a steady demand - transporting seniors who are able to walk. (The medical term is "ambulatory") The opportunities are wide open in this fast-growing field, and so is the potential for an above-average income that's recession-proof. At current rates, a six-figure income is not uncommon for full-time drivers. If you've always wanted to be your own boss, running a business that makes a positive difference in people's lives every day, and are a caring person, take the first step by reading my step-by-step guide. The advice you'll find in the book will give you a head start, reduce risk, and cut startup costs. So you can get started right away, the book also contains a list of major transportation brokers who hire local drivers in all states.

Jury service is one of the most important civic duties a person can undertake, yet it is often poorly understood. This booklet has been prepared in consultation with the Juries Commissioner's Office. It answers frequently asked questions about jury service and provides prospective jurors with a clear explanation of their responsibilities and the processes involved in trials. All potential jurors will receive a copy when they attend for jury service.

The Division of Light and Power is the thoroughly documented, true story of one courageous American mayor who fought, and beat, a utility monopoly in an epic battle which involved corporate espionage and sabotage, bank co-conspirators, extortion, political corruption, organized crime, mob-directed assassination attempts, congressional investigations, and media cover-ups. The "powers that be" tried to buy him, and when he couldn't be bought, they tried to kill him. When that failed, the utility's bank gave him a choice: Privatize the city's electric system or the city would be thrown into default. The mayor said "no" to extortion, never gave in and saved over a billion dollars in assets for his city and its people. Meet Mayor Dennis Kucinich of Cleveland, (pictured above) who fought to give power to the people. Battling his way up from the streets of the city, he and his family lived in twenty-one different places by the time he was seventeen, including a couple of cars. By the age of thirty-one, as America's youngest big-city mayor, his stand to protect Cleveland's Muni Light against a utility monopoly and its banking partner drew international attention and praise as "The outstanding public official in America," an award presented by Bob Hope. This is Mayor Dennis Kucinich's story, but if you want to know why your utility rates are so high, it may be your city's story, too.

The potential for energy resource development on Department of Energy (DOE)-managed lands remains a topic of interest within DOE, Congress, and with private developers interested in siting projects on DOE lands. Several previous studies have estimated the energy resource development potential using various approaches and methodologies. The National Renewable Energy Laboratory (NREL) was tasked by the DOE Office of Legacy Management in 2013 with conducting a study to further refine and build upon previous analyses and to assess energy resource development potential on these lands. Utilizing the Energy Resource Potential of DOE Lands reviews and comments on the NREL study.

Winner: 2007 P. K. Page Founders' Award Winner: 2008 Great Canadian Literary Hunt Finalist: 2008 RBC Bronwen Wallace Award In *Tiny, Frantic, Stronger*, Jeff Latosik considers states of durability and longevity in an age of ephemeral mores and instant gratification. Probing the pressure points where notions of physical, psychological, and technological strength continually threaten to erupt into their opposites, these poems ask which aspects of our daily lives might actually last beyond the here and now, beyond their own inherent limitations of time, person, and place.

Pre-order today the new edition of the most widely used and comprehensive set of guidelines for placement, continued stay and transfer/discharge of patients with addiction disorders. The ASAM Criteria has been completely redesigned and updated to apply the newest science in the field of addiction medicine, is compliant with the DSM-5 and incorporates a user-friendly functionality. The ASAM criteria are the most intensively studied set of addiction placement criteria, having undergone numerous evaluations and studies of effectiveness. Research shows that treatment based on the ASAM criteria is associated with less morbidity, better client function and more efficient service utilization than mismatched treatment. The criteria are required in over 30 states and provide the addiction field with nomenclature for describing the continuum of addiction services. The ASAM Criteria is your resource in providing timely, appropriate, and effective care through a holistic and multidimensional approach that matches patient needs to specific treatment services.

Origins of New Mexico Families A Genealogy of the Spanish Colonial Period UNM Press

Efficient Query Processing for Scalable Web Search will be a valuable reference for researchers and developers working on This tutorial provides an accessible, yet comprehensive, overview of the state-of-the-art of Neural Information Retrieval.

This book is considered to be the starting place for anyone having family history ties to New Mexico, and for those interested in the history of New Mexico. Well before Jamestown and the Pilgrims, New Mexico was settled continuously beginning in 1598 by Spaniards whose descendants still make up a major portion of the population of New Mexico. This book provides the first comprehensive picture of lifelong learning and the radical changes needed if it is to become the cultural norm. Clearly written and readily accessible, the book identifies the shifts in attitude and behaviour which are needed to establish a lifelong learning culture. Looking ahead over the next quarter of a century, Jim Smith and Andrea Spurling show how government and learning providers must fundamentally reassess their use of time, space and finance. But, more than that, they also offer a practical, comprehensive and robust strategy for lifelong learning. Through trenchant analysis based on research commissioned by The Lifelong Learning Foundation, this book shows ways of confronting difficult choices and realizing the aim of comprehensive lifelong learning.

The Mississippi Cookbook was prepared in an attempt to collect, make available, and thus preserve the favorite recipes of fine cooks throughout Mississippi. Over 7,000 recipes were collected from all areas of the state. From this total, the home economists of the state Cooperative Extension Service had the painfully difficult task of screening the amount down to the 1,200 best recipes. The names of the individuals who submitted follow each recipe and, in some cases, historical data about the dish is included. A special section includes favorite recipes of the wives of former governors. The appendices feature tables and charts that provide such valuable technical information as substitutions and equivalents, measuring ingredients, time and temperature guides, definitions, and servings. This comprehensive collection of Mississippi's most popular recipes records the state's culinary heritage and its mastery of home cooking.

Fully updated and expanded into two volumes, the new edition of Groundwater Contamination explains in a comprehensive way the sources for groundwater contamination, the regulations governing it, and the technologies for abating it. This volume discusses aquifer management and strategies for stormwater control and groundwater restoration. A number of case histories on site analysis and remediation based on DOE and state documents are included. Among the many new features of this edition are a full discussion of risk assessment, the preparation of groundwater protection plans, and references linking the text to over 2,300 water-related Web sites.

The Brennan Center at NYU convened a high-level task force of voting experts from government, academia, and business to systematically

analyze various threats to voting technologies that are widely used across the country today. This book offers specific remedies and countermeasures to identify and protect democratic elections from widespread fraud and sabotage.

Are you a good listener? How well do you really know the people around you? A capacity for empathic understanding is hard-wired in our brains, but its full expression involves particular listening skills that are seldom learned through ordinary experience. Through clear explanation, specific examples, and practical exercises, Dr. Miller offers a step-by-step process for developing your skillfulness in empathic listening. With a solid basis in sixty years of scientific research, these communication skills are not limited to professionals, and can be learned and applied in your everyday life. Instead of assuming that you know the meaning of what you think you heard, empathic listening lets you develop a more accurate understanding and prevent miscommunication. Empathic understanding can help to deepen personal relationships, alleviate conflict, communicate across differences, and promote positive change. The author also discusses skills for expressing yourself clearly, and for strengthening close relationships and friendships. Through empathic understanding you have access to life experience far beyond your own, and over time, listening well and deeply becomes a way of being, fostering a compassionate and patient acceptance of human frailties--those of others as well as your own.

Will help improve jail operations by improving staffing practices. This workbook is a cornerstone of training and technical assistance activities related to jail staffing conducted by the U.S. Dept of Justice. Many legitimate methods can be used to conduct a jail staffing analysis. The first edition of this workbook presented a new methodology in an attempt to allow both the expert and the novice equal opportunities for success. It encouraged more jails to implement comprehensive staffing analysis, which have now become standard practice in many jurisdictions. This workbook simplifies the jail staffing analysis and allocation process, clarifies terms, and incorporates the experience of the field in the 12 years since the first edition was published.
