Resource added for the Nursing-Associate Degree 105431, Practical Nursing 315431, and Nursing Assistant 305431 programs. This book presents multiple ethical theories with detailed applications to real-life scenarios in a highly readable format. Case studies address current issues in nursing ethics. Discussion of three ethical perspectives: Rule Ethics, Virtue Ethics, and Feminist Ethics helps nurses understand how each theory frames primary questions of ethics and how each approaches decision-making to address each question. A five-step framework for ethical analysis is adapted to each of the ethical theories presented, providing a systematic, step-by-step process for ethical decision-making. Case studies introduce each theory chapter An excellent resource for registered nurses, nurse practitioners as well as all other professionals in nursing field.

Concepts and Cases in Nursing Ethics is a case-based exploration of the core principles of health care ethics applied to nursing. The book is a collaboration between philosopher-ethicist Michael Yeo and nurse-ethicist and educators Anne Moorhouse, Pamela Khan, and Patricia Rodney. It thus combines philosophical and ethical analysis with extensive knowledge and experience in nursing and health care. The book is organized around six main concepts in health care ethics: beneficence, autonomy, truthfulness, confidentiality, justice, and integrity. A chapter is devoted to the elucidation of each of these concepts. In each chapter, historical background and conceptual analysis are supplemented by case studies that exemplify issues and show how the concept applies in health care and nursing practice. In this new edition, the conceptual analysis throughout has been updated and reworked in view of changes in the health care system. In addition, there is a new chapter specifically devoted to recent developments affecting nursing and other health professions. Previous case studies have been modified and new ones added to address current and emerging issues. Although the text focuses mainly on the social and political situation of nursing, the analysis has relevance also for medicine and the allied health professions, and indeed for anyone working in the health system.

Today's health information professionals are working within an ever-changing environment of technology and regulatory guidelines. This dynamic workplace requires fundamental skills to appropriately manage and react to ethical dilemmas. Ethics Case Studies for Health Information Management provides real-world examples to prepare you for the inevitable challenges of the modern office and offers a methodology to interpret the various situations and determine courses of action. In recent years, the negative findings of numerous high-profile reports have shaken the public's trust in health and social care services. Nurses, educators and policy-makers have been challenged to understand and agree on what needs to be done to prevent a continuation of the kind of unethical practices uncovered by these reports. Consequently, ethics is now an even more integral part of the professional nursing curriculum. This comprehensive and thought-provoking second edition of Ethics and Nursing Practice offers both an essential introduction to key aspects of nursing ethics, including the role of professional codes of conduct and challenges to be encountered in the 21st century, and an in-depth exploration of ethical issues in relation to specific patient groups, such as the unborn, those with mental health difficulties, and the dying. In addition, the book provides a stimulating discussion of ethics relating to public health issues, such as smoking and obesity, as well as the fundamental matter of ethics in nursing research. Illustrated by a wealth of case studies and written by authors from a range of academic and practice backgrounds, this fully updated new edition of Ethics and Nursing Practice is a must-read for students and practitioners alike.

The fifth edition of Nursing Ethics has been revised to reflect the most current issues in healthcare ethics including new cases, laws, and policies. The text continues to be divided into three sections: Foundational Theories, Concepts and Professional Issues; Moving Into Ethics Across the Lifespan; and Ethics Related to Special Issues focused on specific populations and nursing roles.

How should we make decisions when we're uncertain about what we ought, morally, to do? Decision-making in the face of fundamental moral uncertainty is underexplored terrain: MacAskill, Bykvist, and Ord argue that there are distinctive norms by which it is governed, and which depend on the nature of one's moral beliefs.

Reflecting the latest practices in the field, Clinical Decision Making: Case Studies in Medical-Surgical Nursing, 2nd edition bridges the gap between classroom knowledge and clinical application. Emphasizing holistic nursing care, this resource helps nursing students sharpen their critical thinking skills and gain experience applying what they have learned. The more than 40 medical-surgical case histories and related questions, and responses are based on real-life client situations. Every case contains an introductory blueprint of variables that must be considered while evaluating a particular scenario concerning the client, nursing protocol, and setting of care. Each blueprint and case is different, just as each clinical situation is unique. As learners simulate the actual decision-making process, they gain valuable experience making informed clinical judgments that will help them become successful nurses. Categorized by complexity, the book appeals to a broad range of learning levels and styles. Pharmacists face ethical choices constantly -- sometimes dramatic life-and-death decisions, but more often subtle, less conspicuous choices that are nonetheless important. Among the topics confronted are assisted suicide, conscientious refusal, pain management, equitable distribution of drug resources within institutions and managed care plans, confidentiality, and alternative and non-traditional therapies. Veatch and Haddad's book, first published in 1999, was the first collection of case studies based on the real experiences of practicing pharmacists, for use as a teaching tool for pharmacy students. The second edition accounts for the many changes in pharmacy since 1999, including assisted suicide in Oregon, the purchasing of less expensive drugs from Canada, and the influence of managed care on prescriptions. The presentation of some cases is shortened, most are revised and updated, and two new chapters have been added. The first new chapter presents a new model for analyzing cases, while the second focuses on the ethics of new drug distribution systems, for example hospitals where pharmacists are forced to choose drugs based on cost-effectiveness, and internet based pharmacies.

Pamphlet is a succinct statement of the ethical obligations and duties of individuals who enter the nursing profession, the profession's nonnegotiable ethical standard, and an expression of nursing's own understanding of its commitment to society. Provides a framework for nurses to use in ethical analysis and decision-making.

Ethics have an significant impact on the decisions nurses make in their day-to-day work, so it's important for all student nurses to develop their understanding of ethical frameworks as preparation for future practice. In this book, the author

explains ethical ideas, theories and concepts in simple to understand terms, focussing on real-life nursing situations in order to make applying these principles to practice easy. This book will make student nurses consider their own values, and how ethics fit into who they are and how they behave, helping them to unlock this interesting and complex subject. Key features: · Fully mapped to the new NMC standards of proficiency for registered nurses (2018) · A practical guide that explores how ethics applies to nursing and where theory fits in · Contains real work case studies with an emphasis on ethical decision making · Activities challenge students to reflect on their own values, experiences and prejudices and think about how ethics fits in with who they are and how they behave

Praise for the first edition: "This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care. It will be kept by nursing students long after they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics." Score: 90, 4 Stars —Doody's Medical Reviews "[This] is a unique volume that effectively addresses the lack of gerontology case studies for use with undergraduate nursing students. Case studies are a pedagogically powerful approach to active learning that offer opportunities to apply content to clinical practice." —The Gerontologist "The case narrative approach of this book promotes active learning that is more meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff educators) to facilitate critical learning skills." —Liz Capezuti, PhD, RN, FAAN Dr. John W. Rowe Professor in Successful Aging Co-Director, Hartford Institute for Geriatric Nursing New York University College of Nursing Vivid case examples help guide nurses in developing appropriate interventions that include complementary and alternative health therapies and provide a basis for evaluating outcomes. Exercises interspersed throughout each case study include numerous open-ended and multiple-choice questions to facilitate learning and critical thinking. The text is unique in that some of the presented cases focus on psychosocial issues such as gambling addiction, hoarding behavior, emergency preparedness, and long-distance caregiving. Cases also depict geriatric clients who are living healthy, productive lives to counter myths and negative attitudes about older adults. Scenarios demonstrating ethical dilemmas prepare students to appropriately respond to "gray area" situations. The text is geared for AACN and NLN accreditation and is organized according to the needs of actual clinical settings. With cases that take place in the home and community or within primary, acute, and long-term care facilities, this book will be useful for courses specific to gerontology nursing or across any nursing curriculum. New to the Second Edition: A completely new section of Aging Issues Affecting the Family New cases addressing health care disparities, aging in place, and prevention of catheter-associated urinary tract infection Additional contemporary case studies The addition of Quality for Safety in Nursing Education (QSEN) initiatives A greater focus on prioritization and delegation of client's needs infused throughout exercises

Uncovers the art and science of nursing grounded in caring for all nursing situations Grounded in the belief that caring is the central domain of nursing, this innovative book presents a new approach to "nursing situations." These are case studies depicting shared lived experiences between the nurse and patient that are studied from various theoretical perspectives. They are designed to foster a nursing student's ability to care effectively for a patient, family, or group. Each case study features a compelling scenario that engages the reader to feel and fully participate in the caring experience. The book presents a variety of situations that new and experienced nurses are likely to encounter, many of which present scenarios that require caring for a patient under difficult or complex circumstances. The book addresses the need, as defined by leading health care and nursing education organizations, for the study of nursing from a contextual, story-oriented perspective. It is based on the Barry, Gordon & King Teaching/Learning Nursing Framework, developed as a guide to uncover the art and science of nursing grounded in caring in all nursing situations. Following a description of the framework's foundational concepts, the text describes how to use nursing situations to facilitate learning. The scenarios offer detailed, practical strategies for analyzing nursing situations in ways that bring to life the simple and complex practice of nursing grounded in caring. These real-life stories also help students understand the impact of health conditions on individuals and families, thereby fostering empathy. Case studies address nursing situations across a variety of populations, health concerns, and practice settings. Using multiple ways of knowing and understanding, each scenario concludes with direct and reflective questions that help students develop nursing knowledge and skills. The book serves as a core resource for nurse educators and students at all levels seeking to study the art and science of nursing grounded in caring. Additionally, the book is a resource for in-service educators in health care systems that specifically address caring as an essential value for practice. KEY FEATURES: Delivers a new approach to nursing education focusing on the context of caring between nurse and patient Presents a collection of real-life nursing scenarios designed to foster caring knowledge and skills under all circumstances Offers detailed, practical strategies for analyzing nursing situations to aid in learning the practice of nursing grounded in caring Helps students to understand the impact of health conditions on individuals and families

This is a unique, innovative professional nursing ethics textbook designed specifically for all practicing nurses and to meet the educational needs of all nursing students, including RN to BSN and RN to MSN students. Written by experts in the field, it discusses ethical concepts relevant to the registered nurse who has practiced for several years but is learning higher level concepts and applications. This text addresses different areas of professional practice and is rich with case studies illustrating the need for ethical competence and decision making. The book fulfills the necessary criteria for the AACN Essentials for Baccalaureate Education and the QSEN and IOM competencies. It also integrates relevant provisions and statements from the revised Code for Nurses (ANA, 2015). Clear and concise, the text relates content to the nurse's current practice and introduces a framework for the development of ethical competence, from recognition of

an ethical situation to implementation of a justifiable action. A decision-making model that includes elements of care and virtue ethics is also included. Essential communication and conflict skills are addressed, in addition to the role of the ethics committee and ethics consultation. The book discusses common ethical issues likely to be encountered, how to recognize and address moral distress, and ethical practice as it relates to research, quality, and safety. Case studies that incorporate evidence-informed research provide the opportunity to develop ethical skills and apply decisionmaking principles. Relevant QSEN competencies and provisions and statements from the ANA's revised Code for Nurses (2015) are featured in each chapter. Interactive exercises and questions and PowerPoints provide further opportunity for critical thinking. KEY FEATURES: Addresses the specific needs of practicing nurses and students in the RN to BSN and RN to MSN courses Fulfills AACN Essentials, IOM competencies, and QSEN KSAs Integrates relevant provisions and statements from the revised Code for Nurses (ANA, 2015) Builds upon previous practice experience Discusses ethical competence in a variety of practice environments Includes case studies to apply ethical competencies

Clinical Case Studies for the Family Nurse Practitioner is a key resource for advanced practice nurses and graduate students seeking to test their skills in assessing, diagnosing, and managing cases in family and primary care. Composed of more than 70 cases ranging from common to unique, the book compiles years of experience from experts in the field. It is organized chronologically, presenting cases from neonatal to geriatric care in a standard approach built on the SOAP format. This includes differential diagnosis and a series of critical thinking questions ideal for self-assessment or classroom use.

The second edition of Ethics and Law for Australian Nurses is comprehensive in approach and allows students to understand the relationship between the legal and ethical frameworks of nursing practice. With an Australian focus, the book recognises the diversity of nursing practices and practice settings while emphasising their uniform aim of supporting and promoting health and wellbeing across the lifespan. Thoroughly revised to incorporate the latest methods and research, this edition features updates to legislation and new chapters on end-of-life decisions and Indigenous health care. It introduces readers to the 'Giving Voice to Values' approach to ethics and makes extensive use of case studies, legal case extracts, practical examples and reflective questions to illustrate key concepts throughout. Ethics and Law for Australian Nurses provides an innovative and intuitive skills-based approach to nursing ethics and the legal context of nursing practice.

Bioethics: Legal and Clinical Case Studies is a case-based introduction to ethical issues in health care. Through seventy-eight compelling scenarios, the authors demonstrate the practical importance of ethics, showing how the concerns at issue bear on the lives of patients, health-care providers, and others. Many central topics are covered, including informed consent, medical futility, reproductive ethics, privacy, cultural competence, and clinical trials. Each chapter includes a selection of important legal cases as well as clinical case studies for critical analysis. The case studies are often presented as moral dilemmas and are conducive to rich discussion. A companion website offers a curated collection of relevant legal precedents along with additional case studies and other resources.

Clinical Ethics introduces the four-topics method of approaching ethical problems (i.e., medical indications, patient preferences, quality of life, and contextual features). Each of the four chapters represents one of the topics. In each chapter, the authors discuss cases and provide comments and recommendations. The four-topics method is an organizational process by which clinicians can begin to understand the complexities involved in ethical cases and can proceed to find a solution for each case.

Designed for ethics courses in nursing PhD and DNP programs, this book offers coverage of ethical patient care, care in vulnerable populations, legal influences on ethical care, ethical business practices, and research ethics that are discussed and analyzed by experts. Examines the complexities of teaching and learning nursing, explains the theoretical foundations of student-centered learning, describes various methods and models for student-centered learning in nursing, and explores the issues and challenges of constructing nursing curricula and implementing student-centered pedagogies.

Case Studies in Nursing Ethics presents basic ethical principles and specific guidance for applying these principles in nursing practice through analysis of over 150 actual ethical case study conflicts that have occurred in the practice of nursing. Each case study allows readers to develop their own approaches to the resolution of ethical conflict and to reflect on how the traditions of ethical thought and professional guidelines apply to the situation.

Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition. As the healthcare professional in closest contact with both the patient and the physician, nurses face biomedical ethical problems in unique ways. Accordingly, Case Studies in Nursing Ethics presents basic ethical principles and specific guidance for applying these principles in nursing practice, through analysis of over 150 actual case study conflicts that have occurred in nursing practice. Each case study allows readers to develop their own approaches to the resolution of ethical conflict and to reflect on how the traditions of ethical thought and professional guidelines apply to the situation. The Fourth Edition has been completely revised and updated. It includes two new chapters, one on Moral Integrity and Moral Distress which contains AACN model of moral distress and work and one on Respect which addresses several aspects of the general problem of showing r

Short case studies, based on real stories from the health care arena, ensure that each chapter of this book is rooted in descriptions of nursing practice that are grounded, salient narratives of nursing care. The reader is assisted to explore the ethical dimension of nursing practice: what it is and how it can be portrayed, discussed, and analysed within a variety of practice and theoretical contexts. One of the unique contributions of this book is to consider nursing not only in the context of the individual nurse – patient relationship but also as a social good that is of necessity limited, due to the ultimate limits on the nursing and health care resource. This book will help the reader consider what good nursing looks like, both within the context of limitations on resources and under conditions of scarcity. Indeed, any discussion of ethical issues in nursing should be well grounded in a conceptualisation of nursing that nursing students and practising nursing can recognise, accept and engage with. Nursing, like medicine, social work and teaching has a clear moral aim – to do good. In the case of nursing to do good for the patient. However it is vital that in the pressurised, constrained health service of the 21st century, we help nurses explore what this might mean for nursing practice and what can reasonably be expected of the individual nurse in terms of good nursing care.

A portion of the revenue from this book's sales will be donated to Doctors Without Borders to assist the humanitarian work of nurses, doctors, and other health care providers in the fight against COVID-19 and beyond. Concepts and Cases in Nursing Ethics is an introduction to contemporary ethical issues in health care, designed especially for Canadian audiences. The book is organized around six key concepts: beneficence, autonomy, truth-telling, confidentiality, justice,

and integrity. Each of these concepts is explained and discussed with reference to professional and legal norms. The discussion is then supplemented by case studies that exemplify the relevant concepts and show how each applies in health care and nursing practice. This new fourth edition includes an added chapter on end-of-life issues, and it is revised throughout to reflect the latest developments on topics such as global health ethics, cultural competence, social media, and palliative sedation, as well as ethical issues relating to COVID-19.

Concepts and Cases in Nursing Ethics maps the ethical landscape of contemporary nursing. The book is the product of a collaboration between philosopher-ethicist Michael Yeo, nurse-ethicist Anne Moorhouse, and six representatives of various areas of professional nursing. It thus combines philosophical and ethical analysis with nursing knowledge and experience in a manner that is both understandable and relevant. The book is organized around six main concepts in nursing ethics: beneficence, autonomy, confidentiality, truth-telling, justice, and integrity. A chapter is devoted to the elucidation of each of these concepts. In each chapter, historical background and conceptual analysis are supplemented by case studies that exemplify issues and show how the concept applies in nursing practice. In this new edition, the materials in each chapter have been updated to reflect recent developments in nursing and more generally in health care. In addition, a totally new chapter on ethical theory has been added. Complete with bibliographies and study questions for further analysis of cases, this book is ideally suited for textbook use. It will help both practitioners and students to deal better with the clinical problems and issues that are encountered in the field. However, its simple prose and clear exposition of complex issues will make Concepts and Cases in Nursing Ethics attractive to anyone concerned about health care.

The most comprehensive and up-to-date collection of its kind, *Case Studies in Biomedical Ethics: Decision-Making, Principles, and Cases, Second Edition*, explores fundamental ethical questions arising from real situations faced by health professionals, patients, and others. Featuring a wide range of more than 100 case studies drawn from current events, court cases, and physicians' experiences, the book is divided into three parts. Part 1 presents a basic framework for ethical decision-making in healthcare, while Part 2 explains the relevant ethical principles: beneficence and nonmaleficence, justice, respect for autonomy, veracity, fidelity, and avoidance of killing. Parts 1 and 2 provide students with the background to analyze the ethical dilemmas presented in Part 3, which features cases on a broad spectrum of issues including abortion, mental health, experimentation on humans, the right to refuse treatment, and much more. The volume is enhanced by opening text boxes in each chapter that cross-reference relevant cases in other chapters, an appendix of important ethical codes, and a glossary of key terms.

This book expands the current discussion on ethics, addressing the gap between "headline" ethics cases, which are often extreme and taken from a business context, and the everyday ethical challenges that we all face in school, work, relationships, and communities. Case studies throughout demonstrate concepts and provide opportunities for readers to apply theory as they consider everyday issues such as the temptation to lie about an arrest on a job application, peer pressure to steal or drink, and the implications of "ratting out" a classmate who is cheating or a co-worker who is stealing. By including a broad array of ethical challenges, this book makes ethics more accessible to the reader. Drawing from several academic disciplines, including social psychology and organizational behavior, this book explores the personal and environmental factors that influence our ethical decision-making. The book is appropriate for ethics courses in an array of disciplines as well as anyone interested in ethical challenges.

This book provides a basis for class discussion about the responsible conduct of social science research. These 16 brief research ethics cases describe situations in which ethical dilemmas arise and present the student with the opportunity to think through the different implications for researchers. The cases emphasize different types of ethical dilemmas involving faculty, students, participants, and stakeholders. Students can discuss what happened, why it was or was not unethical, and what should be the consequences for the actors. Included are the original cases complete with learning objectives, teaching notes, and questions for discussion.
