Part of SAGE's Mastering Business Research Methods series, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan, the series is designed to support business and management students with their research-based dissertations by providing in-depth and practical guidance on using a chosen method of data collection or analysis. The books are written in a concise and accessible way, and contain a range of features, including checklists and a glossary, designed to support self-guided research. In Case Study Research, Bill Lee and Mark Saunders describe the properties of case study designs in organizational research, exploring the uses, advantages and limitations of case research. They also demonstrate the flexibility that case designs offer, and challenges the myths surrounding this approach. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as reference books for doctoral students and faculty members interested in the method. Watch the editors introduce the Mastering Business Research Methods series and tell you more about the first three books.

In both the literal and metaphorical senses, it seemed as if 1970s America was running out of gas. The decade not only witnessed long lines at gas stations but a citizenry that had grown weary and disillusioned. High unemployment, runaway inflation, and the energy crisis, caused in part by U.S. dependence on Arab oil, characterized an increasingly bleak economic situation. As Edward D. Berkowitz demonstrates, the end of the postwar economic boom, Watergate, and defeat in Vietnam led to an unraveling of the national consensus. During the decade, ideas about the United States, how it should be governed, and how its economy should be managed changed dramatically. Berkowitz argues that the postwar faith in sweeping social programs and a global U.S. mission was replaced by a more skeptical attitude about government's ability to positively affect society. From Woody Allen to Watergate, from the decline of the steel industry to the rise of Bill Gates, and from Saturday Night Fever to the Sunday morning fervor of evangelical preachers, Berkowitz captures the history, tone, and spirit of the seventies. He explores the decade's major political events and movements, including the rise and fall of détente, congressional reform, changes in healthcare policies, and the hostage crisis in Iran. The seventies also gave birth to several social movements and the "rights revolution," in which women, gays and lesbians, and people with disabilities all successfully fought for greater legal and social recognition. At the same time, reaction to these social movements as well as the issue of abortion introduced a new facet into American political life-the rise of powerful, politically conservative religious organizations and activists. Berkowitz also considers important shifts in American popular culture, recounting the creative renaissance in American film as well as the birth of the Hollywood blockbuster. He discusses how television programs such as All in the Family and Charlie's Angels offered Americans both a reflection of and an escape from the problems gripping the country.

Global Practices and Training in Applied Sport, Exercise, and Performance Psychology offers case analysis as a vehicle to address issues and experiences in the application of sport, exercise, and performance psychology (SEPP) and the supervision/training of individuals to become professionals in the field. A follow-up to *Becoming a Sport, Exercise, and Performance Psychology Professional* (2014), this book features a discussion of real-world case examples which highlight various aspects of professional practice as well as supervision and training. Professionals from around the world, including the United States and Canada, Europe, Asia, Africa, and Australia share diverse experiences, providing a uniquely in-depth, global perspective. The case studies contained in the book were selected to provide insight into specific elements of applied practice and supervision/training through a global lens as well as demonstrate the value of incorporating case analysis and reflection into one's training and continued professional development. Case analysis is an essential part of learning and instruction. Beyond educating the reader about theories and research on related topics in the field, case analysis allows for more complex levels of learning, including analysis, synthesis, and evaluation of diverse scenarios. In Part I of this book, the cases focus on applied SEPP practice; Part II is comprised of cases that focus on training and supervision. This book is essential reading for graduate students and neophyte professionals in the field for whom it is critical to learn how to effectively apply knowledge to real-world sport, exercise, and performance psychology scenarios. In addition, the book is a useful resource for seasoned and expert practitioners and supervisors who can use case analysis as a means of continuing their professional development.

This unique volume focuses on coastal archaeology, lithic analysis, and ceramic analysis within the study of New England archaeology. These topics represent the major research interests of the late distinguished archaeologist Barbara E. Luedtke, to whom the volume is dedicated. During her 25-year career in New England archaeology, Luedtke paved the way for numerous investigations and archaeologists in the region. This book reflects her scholarship's enormous impact and lasting impression on her colleagues and the development of New England archaeology. The authors discuss various issues pertaining primarily to Native American settlement, subsistence, and technology in New England from as early as the first human occupation of the region--approximately 10,000 B.C.E.--until shortly after European colonization 400 years ago. They also present methodologies, results, analyses, interpretations, and syntheses of important regional studies, which complement and challenge existing models and knowledge. Since some of the papers address current methodological approaches, this book is relevant to other geographic areas, providing a comparative framework for evaluating archaeological research elsewhere.

With the global economy still in recovery, it is more important than ever for individuals and organizations to be aware of their money and its potential for both depreciation and growth. *Banking, Finance, and Accounting: Concepts, Methodologies, Tools, and Applications* investigates recent advances and undertakings in the financial industry to better equip all members of the world economy with the tools and insights needed to weather any shift in the economic climate. With chapters on topics ranging from investment portfolios to credit unions, this multi-volume reference source will serve as a crucial resource for managers, investors, brokers, and all others within the banking industry.

Written by a veteran police officer turned college professor, this modern-day study of American policing covers hot-button issues including police use of deadly force against and bias toward minorities. • Takes a multidisciplinary approach to the problem, covering police psychology, behavior, policy, and law • Addresses the proliferation of violence in minority communities • Examines the response of minority communities to police brutality and the shooting of unarmed Black men, in addition to the psychology of oppression within those communities • Illustrates signs that a police agency is faltering, how a community becomes disenfranchised from police and the consequences for law enforcement efforts, and quality assurance measures that could reduce or remove the problems

Pediatric Education for Prehospital Professionals, Third Edition represents a comprehensive source of prehospital medical information for the emergency care of infants and children. PEPP is designed to give prehospital professionals the education, skills, and confidence they need to effectively treat pediatric patients. Developed by the American Academy of Pediatrics, PEPP specifically teaches prehospital professionals how to better assess and manage ill or injured children. PEPP combines comprehensive medical content with dynamic features and an interactive course to fully prepare prehospital professionals to care for children in the field. New to The Third Edition: The textbook content addresses every pediatric-specific competency in the National EMS Education Standards. Shock and resuscitation content is covered in two separate chapters, placing more emphasis on these critical topics. A top-flight EMS author team working in conjunction with AAP physician reviewers ensures exceptional medical content with a "street" focus. Features Include: The Pediatric Assessment Triangle (PAT) represents the essence of the PEPP patient assessment method, which includes assessing appearance, work of breathing, and circulation to the skin. The Patient Assessment Flowchart provides students with an easy-to-understand reference of the pediatric patient assessment process. Case studies provide an opportunity for critical thinking and encourage students to consider how they would treat a similar case in the field. Procedures provide written step-by-step explanations and visual summaries of important BLS and ALS pediatric skills. Interactive Course and Flexible Course Options. PEPP Course Coordinators now have the option of offering onsite or hybrid courses. The hybrid course includes engaging, interactive online modules that students complete before attending the onsite portion of the course for scenarios and hands-on skill stations. The onsite course includes case-based lectures, live-action video, small group scenarios, and hands-on skill stations. The BLS course is geared toward Emergency Medical Responders and EMTs, while the ALS course is ideal for AEMTs and Paramedics.

May I Have Your Attention, Please? Build a Better Business by Telling Your True Story. John Wiley & Sons

As part of a program to improve short-range forecasts of weather conditions at aircraft terminals, a digital radar system was established at Air Force Geophysics Laboratory, Bedford Mass. The system, consisting of AN/FPS-77, digital interface, microwave transmitter-receiver, video integrator and computer, was installed in late 1972. Since that time

the system has been used in conjunction with a network of 26 automated weather stations to make experimental forecasts of visibility and severe-weather conditions. The radar output of digital maps of radar intensity was found to be very convenient, but the inability of the radar to detect small water droplets limits the use in low visibility forecasting primarily to heavy rain storms and snow storms. In severe storms modest success was attained forecasting gusts, using digital maps. The large amounts of weather information from the network and radar frequently saturated the forecaster making forecasts at 15-min intervals, and relief was sought in the form of objective aids. Preliminary relationships between radar intensity, extinction coefficient (visibility) and rainfall rate have been formulated. In addition, a technique was developed using digital radar maps to obtain motion vectors and make probability forecasts of severe weather conditions. The calibration procedure relies on intensity of ground targets (hills and towers) for day-to-day relative calibration, and absolute calibration has been limited to Z-R relations. (Author).

This ground-breaking collection brings together a range of perspectives on the philosophy, design and experience of participatory approaches within education and the environment, health and sustainability. Chapters address participatory work with children, youth and adults in both formal and non-formal settings. Authors combine reflections on experience, models and case studies of participatory education with commentary on key debates and issues.

This book proposes that organizational policies are what ensure the institutionalization and sustainability of futures thinking in organizations. It presents several case studies from corporations and other institutions that describe effective use of foresight methods and internal policies to respond to rapid change. The case studies address changing trends in technology, globalization and/or workforce diversity, and the impact on the economic and political well-being of the organization. The editors also develop an organizational capability maturity model for futures thinking as well as providing questions for discussion that promote critical review of each case chapter. This book will inform scholars and organizational leaders how best to utilize foresight methodologies and organizational policies to sustain successful management strategies within futures thinking organizations. Chapter 9 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Impressionism captured the world's imagination in the late nineteenth century and remains with us today. Portraying the dynamic effects of modernity, impressionist artists revolutionized the arts and the wider culture. Impressionism transformed the very pattern of reality, introducing new ways to look at and think about the world and our experience of it. Its legacy has been felt in many major contributions to popular and high culture, from cubism and early cinema to the works of Zadie Smith and W. G. Sebald, from advertisements for Pepsi to the observations of Oliver Sacks and Malcolm Gladwell. Yet impressionism's persistence has also been a problem, a matter of inauthenticity, superficiality, and complicity in what is merely "impressionistic" about culture today. Jesse Matz considers these two legacies—the positive and the negative—to explain impressionism's true contemporary significance. As *Lasting Impressions* moves through contemporary literature, painting, and popular culture, Matz explains how the perceptual role, cultural effects, and social implications of impressionism continue to generate meaning and foster new forms of creativity, understanding, and public engagement.

Thinkers50 Management Thinker of 2015 Whitney Johnson wants you to consider this simple, yet powerful, idea: disruptive companies and ideas upend markets by doing something truly different—they see a need, an empty space waiting to be filled, and they dare to create something for which a market may not yet exist. As president and cofounder of Rose Park Advisors' Disruptive Innovation Fund with Clayton Christensen, Johnson used the theory of disruptive innovation to invest in publicly traded stocks and private early-stage companies. In *Disrupt Yourself*, she helps you understand how the frameworks of disruptive innovation can apply to your particular path, whether you are: a self-starter ready to make a disruptive pivot in your business a high-potential individual charting your career trajectory a manager looking to instill innovative thinking amongst your team a leader facing industry changes that make for an uncertain future We are living in an era of accelerating disruption; no one is immune. Johnson makes the compelling case that managing the S-curve waves of learning and mastery is a requisite skill for the future. If you want to be successful in unexpected ways, follow your own disruptive path. Dare to innovate. Do something astonishing. Disrupt yourself.

An African proverb says, “If you want to travel fast, travel alone. If you want to travel far, travel together.” World-Class Fundraising Isn’t a Solo Sport is about how to travel far in the world of academic development. It provides practical, field-tested strategies for building strong academic development teams. Using realistic case studies and innovative tools designed specifically for use in higher education, the book serves as an operations manual for how faculty members, academic administrators, or development officers can best work together to achieve their fundraising goals.

Society at large tends to misunderstand what safety is all about. It is not just the absence of harm. When nothing bad happens over a period of time, how do you know you are safe? In reality, safety is what you and your people do moment by moment, day by day to protect assets from harm and to control the hazards inherent in your operations. This is the purpose of risk-based thinking, the key element of the six building blocks of Human and Organizational Performance (H&OP). Generally, H&OP provides a risk-based approach to managing human performance in operations. But, specifically, risk-based thinking enables foresight and flexibility—even when surprised—to do what is necessary to protect assets from harm but also achieve mission success despite ongoing stresses or shocks to the operation. Although you cannot prepare for every adverse scenario, you can be ready for almost anything. When risk-based thinking is integrated into the DNA of an organization’s way of doing business, people will be ready for most unexpected situations. Eventually, safety becomes a core value, not a priority to be negotiated with others depending on circumstances. This book provides a coherent perspective on what executives and line managers within operational environments need to focus on to efficiently and effectively control, learn, and adapt.
