Cats are the world's most popular domestic pet, as well as being wild animals. This comprehensive book on feline behaviour explores both the familiar domesticated animal and wild relatives such as the leopard, tiger and lynx to examine the Felidae family as a whole, allowing for fascinating comparisons between wild and domestic species and explanations of behaviour in pet cats with evolutionary origins. Fraser's work helps increase readers' understanding of cat behaviour - why they behave as they do, for what purpose and why. The focus is on identifying normal behaviour from the cat's perspective.

Antidote to Trumpism is a wide-ranging collection of essays meant to help Americans embrace intellectual honesty, improve their critical thinking skills, and avoid being deceived by propaganda. The most important chapters explore: how to improve our understanding of the way our government functions; how the Trump administration has attacked the rule of law and our Constitution; the importance of protecting our democracy and our environment; and interesting political, religious, and scientific concepts. Other essays discuss how to deal with anxiety disorders, food allergies, and rosacea. Most of the chapters end with a list of recommended texts that will help those interested in learning more about the subjects discussed.

training philosophy, their methods totally work." --Slate
We often assume that cats can't be trained, and don't need to be. But in *The Trainable Cat*, bestselling anthrozoologist John Bradshaw and cat expert Sarah Ellis show that cats absolutely must be trained in order to enrich the bond between pet and owner. Full of training tips and exercises--from introducing your cat to a new baby to helping them deal with visits to the vet--*The Trainable Cat* is the essential cat bible for cat owners and lovers. "I doubt you'll find a more well-informed or scientific book on cats that better shows you how feline thinking works."--Times (UK)

The author of *Think Like a Cat*, *Catwise*, and *Cat vs. Cat*, tells how to turn problem cats into purr-fect pets
Certified Animal Behavior Consultant Pam Johnson-Bennett, is back to help readers bring out their pet's inner pussycat regardless of the cat's age. Geared specifically for owners of adult cats, be they recently adopted or long time family pets, this book illustrates how it's never too late to correct behavior problems. With her trademark wit and common sense, Pam covers every aspect of a cat's lifestyle, behavior, and environment and gives cat owners specific techniques to help seemingly set-in-their-ways cats change for the better. Authoritative and entertaining, *Starting from Scratch* is the next best thing to a house call from the world's top feline behaviorist.

owners. Unlike dogs, cats evolved as solitary hunters, and, while many have learned to live alongside humans and even feel affection for us, they still don't quite "get us" the way dogs do, and perhaps they never will. But cats have rich emotional lives that we need to respect and understand if they are to thrive in our company. In *Cat Sense*, renowned anthrozoologist John Bradshaw takes us further into the mind of the domestic cat than ever before, using cutting-edge scientific research to dispel the myths and explain the true nature of our feline friends. Tracing the cat's evolution from lone predator to domesticated companion, Bradshaw shows that although cats and humans have been living together for at least eight thousand years, cats remain independent, predatory, and wary of contact with their own kind, qualities that often clash with our modern lifestyles. Cats still have three out of four paws firmly planted in the wild, and within only a few generations can easily revert back to the independent way of life that was the exclusive preserve of their predecessors some 10,000 years ago. Cats are astonishingly flexible, and given the right environment they can adapt to a life of domesticity with their owners—but to continue do so, they will increasingly need our help. If we're to live in harmony with our cats, Bradshaw explains, we first need to understand their inherited quirks: understanding their body language, keeping their environments—however small—sufficiently interesting, and becoming more proactive in managing both their natural hunting instincts and their relationships with other cats. A must-read for any cat lover, *Cat Sense* offers humane, penetrating insights about the domestic

A Thoroughly Biblical and Compelling Case for Healing from the Best-Selling Author of A More Excellent Way Over thirty years ago, Dr. Henry Wright experienced major success in praying for people to be healed from disease. But suddenly the healing stopped. He began asking God why people weren't being healed. Through a pursuit of God's Word and truth, he began a lifelong journey of learning the spiritual roots of disease and blockages to healing. In this journey, he discovered that about 80 percent of all disease has a spiritual root issue and is a direct result of a breakdown in our relationship with God, ourselves, or others. Dr. Wright began teaching the biblical principles and truths he discovered and found great success in people's healing and recovery. He has helped tens of thousands to experience wholeness in their lives. Every human being is a spirit with a soul living in a body. Therefore, this is not just about our physical health,

although it greatly impacts our bodily well-being. It is about our identity in God and the freedom He desires to give us, extending from our spirits to our souls and bodies. In this book, Dr. Wright presents a thoroughly biblical and compelling case for healing. If you think you've read all you need to know about healing, it's time to take another look! The author clearly shows that disease is not a random occurrence and that science and medicine have their limitations in dealing with the spiritual roots of illnesses that inflict millions. We need healing for spirit, soul, and body. If you have recently been diagnosed with an illness or have been struggling with your health for years, there is hope and healing ahead. "I am so thankful about these physical healings. However, I'm even more thankful for the inner peace and faith that I have been experiencing. But once we're sick, the provision has been made for healing. We just need to line up with the Word of God and be transparent, and everything takes care of the rest." —Claudio (he and his wife healed of infertility; their newborn son healed of serious health issues)

Abelardo Morell, author of last year's award-winning *A Book of Books*, makes magical camera obscura images in darkened interiors. The deceptively simple process--he blacks out all of the windows leaving just a pinhole opening in one of them--produces photographs of astonishing, complex beauty. Due to the nature of refracted light, the world outside his darkened room is projected, upside-down, onto the interior space within which he works, converting the room, in effect, into the interior of a camera. Morell then photographs the results with a large-format view camera, often requiring exposures of eight hours or more. Locations around the world were chosen for the interesting details and juxtapositions they would elicit--the Empire State Building lies across a bedspread in a midtown Manhattan interior; the Tower of London is imprinted on the walls of a room in the Tower Hotel; the countryside in rural Cuba, Morell's birthplace, plays across the walls of a crumbling interior that is rich with the patina of its own history. Every image is full of surprises and revelations.

Since the beginning of time, cats have convinced the world that they are untrainable so they can do whatever they want...but those days are over!
