Prepare for the new CCSP SECUR 642-501 exam with the only Cisco authorized SECUR preparation guide available. The only SECUR guide developed in conjunction with Cisco, providing the most accurate and up-to-date topical coverage. Electronic testing engine on CD-ROM provides flexible assessment features and feedback on areas for further study. Modular writing style and other features from the Exam Certification Guide series provide candidates with superior learning and topic retention. This title is primarily intended for networking professionals pursuing the CCSP certification and preparing for the SECUR 642-501 exam, one of five CCSP component exams. The materials, however, appeal to an even broader range of networking professionals seeking a better understanding of the policies, strategies, and techniques of network security. The exam and course, Securing Cisco IOS Networks (SECUR), cover a broad range of networking security topics, providing an overview of the critical components of network security. The other component exams of CCSP then focus on specific areas within that overview, like PIX and VPNs, in even greater detail. CCSP SECUR Exam Certification Guide (CCSP Self-Study) combines leading edge coverage of security concepts with all the proven learning and exam preparation features of the Exam Certification Guide series from Cisco Press, including the CD-ROM testing engine with more than 200 questions, pre- and post-chapter

construction, support, and scalability. CCNP Authorized Self-Study Guide: Implementing Cisco IP Routing (ROUTE) is the only Cisco authorized, self-paced foundational learning tool designed to help network professionals prepare for the brand new CCNP ROUTE exam from Cisco. This book covers all CCNP ROUTE exam objectives for mastering routed network construction, support, and scalability, including:

- \* Assessing complex enterprise network requirements and planning routing services.
- \* Applying standards, models and best practices to complex networks.
- \* Creating and documenting routing implementation plans.
- \* Planning, configuring, verifying, and troubleshooting EIGRP solutions.
- \* Implementing scalable OSPF multiarea network solutions.
- \* Implementing IPv4 based redistribution.
- \* Assessing, controlling, configuring, and verifying path control.

As part of the Cisco Press Self-Study series, this revision to the popular Authorized Self-Study Guide to advanced routing has been fully updated to provide early and comprehensive foundational learning for the new CCNP ROUTE course. This text assumes that readers have been exposed to concepts covered by CCNA (ICND1 and ICND2), but does not assume any prior knowledge of CCNP concepts.

The Second International Conference on Networks and Communications (NeCoM 2010), the Second International Conference on Wireless and Mobile Networks (WiMoN 2010), and the Second International Conference on Web and Semantic Technology (WeST 2010) were held in Chennai, India, during July 23–25, 2010. They attracted many local and international delegates, presenting a balanced mixture of intellects from the East and from the West. The goal of these conferences is to bring together researchers and practitioners from academia and industry to focus on understanding computer networks, wireless networks, mobile networks and the Web, semantic technologies and to establish new collaborations in these

areas. Authors are invited to contribute to the conference by submitting articles that illustrate research results, projects, survey work and industrial experiences describing significant advances in the areas of all computer networks and Semantic Web technologies. The NeCoM 2010, WiMoN 2010 and WeST 2010 committees rigorously invited submissions for many months from researchers, scientists, engineers, students and practitioners related to the relevant themes and tracks of the workshop. This effort guaranteed submissions from an unparalleled number of internationally recognized top-level researchers. All the submissions underwent a strenuous peer-review process which comprised expert reviewers. These reviewers were selected from a talented pool of Technical Committee members and external reviewers on the basis of their expertise. The papers were then reviewed based on their contributions, technical content, originality and clarity.

Cisco Certified Network Professional (CCNP) is the intermediate-level Cisco certification for network support. This is the next step for networking professionals who wish to validate their skills beyond the Cisco Certified Network Associate (CCNA) level or who wish to have a path to the expert level certification of CCIE. CCNP tests a candidates skill in installing, configuring, operating, and troubleshooting complex routed LANs, routed WANs, switched LANs, and dial access services. Where CCNA requires candidates to pass a single exam, CCNP requires candidates to pass four written exams, including 640-901 BSCI, 640-604 Switching, 640-605 Remote Access, and 640-606 Support. The official exam self-study guides for each of these exams are now available in this value priced bundle. These books, CCNP BSCI Exam Certification Guide, CCNP Switching Exam Certification Guide, CCNP Remote Access Exam Certification Guide, and CCNP Support Exam Certification Guide, present the certification candidate with comprehensive review and practice of all the key topics that appear on each of the CCNP exams. This new edition of the Cisco CCNP Certification Library replaces the previous edition, ISBN 1-58720-037-6.
