Ceramics and the Museum interrogates the relationship between art-oriented ceramic practice and museum practice in Britain since 1970. Laura Breen examines the identity of ceramics as an art form, drawing on examples of work by artist-makers such as Edmund de Waal and Grayson Perry; addresses the impact of policy making on ceramic practice; traces the shift from object to project in ceramic practice and in the evolution of ceramic sculpture; explores how museums facilitated multisensory engagement with ceramic material and process, and analyses the exhibition as a text in itself. Proposing the notion that 'gestures of showing,' such as exhibitions and installation art, can be read as statements, she examines what they tell us about the identity of ceramics at particular moments in time. Highlighting the ways in which these gestures have constructed ceramics as a category of artistic practice, Breen argues that they reveal gaps between narrative and practice, which in turn can be used to deconstruct the art.

Describes materials, processes, tools, forming techniques, surface decoration, firing, glazes and design for a variety of ceramic objects, in a book that includes more than 500 color illustrations, lists of suppliers and galleries, helpful web sites and conversion

This booklet is based on the 2010 International Tourist Survey on Korean Travel conducted by KTO. It reflects the attractions and locations that international tourists preferred or wanted to visit again. The survey led to choosing the five best tourist destinations: Seoul, Gyeonggi-do, Busan, Gyeongju, and Jeju Island. Each location is, in turn, divided into detailed sections on History & Culture, Fashion & Shopping, Youth & Energy, Leisure & Recreation, and Theme Park. The booklet is designed to offer one-day courses for international tourists who use either cars or public transportation. But slow travelers may need two or, sometimes, three days to cover one-day courses.

Renowned ceramic artist Karen Karnes has created some of the most iconic pottery of the late twentieth and early twenty-first centuries. The body of work she has produced in her more than sixty years in the studio is remarkable for its depth, personal voice, and consistent innovation. Many of her pieces defy category, invoking body and landscape, pottery and sculpture, male and female, hand and eye. Equally compelling are Karnes's experiences in some of the most significant cultural settings of her generation: from the worker-owned cooperative housing of her childhood, to Brooklyn College under modernist Serge Chermayeff, to North Carolina's avant-garde Black Mountain College, to the Gate Hill Cooperative in Stony Point, New York, which Karnes helped establish as an experiment in integrating art, life, family, and community. This book, designed to accompany an exhibit of Karnes's works organized by Peter Held, curator of ceramics for the Arizona State University Art Museum's Ceramic Research Center, offers a comprehensive look at the life and work of Karnes. Edited by highly regarded studio potter Mark Shapiro, it combines essays by leading critics and scholars with color reproductions of more than sixty of her works, providing new perspectives for understanding the achievements of this extraordinary artist.

Widely considered to be the most comprehensive introduction to ceramics available, this book contains numerous step-by-step illustrations of various ceramic techniques to guide the beginner as well as inspirational ceramic pieces from contemporary potters from around the world. For the more experienced ceramist, there is a wealth of technical detail on things like glaze formulas and temperature conversions which make the book an ideal reference. To quote one review: ...I am a studio potter and would not be without it. The fourth edition has been updated to include profiles of key ceramists who have influenced the field, new material on marketing ceramics including using the internet, more on the use of computers, added coverage of paperclays, using gold and alternative glazes.

Using documents, diaries, novels and conventions of the time, this volume describes the social uses and cultural meanings of fine ceramics in the 18th century: porcelain, blue and white earthenware and creamwares. Rather than placing the objects themselves at the centre, this approach focuses on the people who used, criticized, sold and stole them, and investigates the impact these products had on the practical and imaginative lives of the 18th-century middle class. These middling sort of people were now able to provide refined receptacles to support the social rituals of polite society and these artefacts were invested with values and

Like blacksmithing or hobby farming, pottery-making appeals to individuals who like to be creative, work with their hands, and don't mind getting a little dirty. However, it is a hobby that is largely underserved by the publishing industry, but difficult for someone to learn without a comprehensive guide because the tools and techniques are quite complicated. The Potter's Studio Handbook guides readers through the process of setting up their own studio and teaching them how to master the techniques at home. Once techniques are mastered, The Potter's Studio Handbook will remain an invaluable resource to the clay artist when looking to create beautiful, yet functional projects, at home with nearly 25 projects that build upon previously learned skills. Teaches the three most popular techniques: wheel throwing, hand building, and slipcasting Teaches readers how to make many functional and beautiful projects at home Step-by-step photos guarantee success

A new pottery tradition has been developing along the border of northern Indiana and southern Michigan. Despite the fact that this region is not yet an established destination for pottery collectors, Michiana potters are committed to pursuing their craft thanks to the presence of a community of like-minded artists. *The Michiana Potters*, an ethnographic exploration of the lives and art of these potters, examines the communal traditions and aesthetics that have developed in this region. Author Meredith A. E. McGriff identifies several shared methods and styles, such as a preference for wood-fired wares, glossy glaze surfaces, cooler colors, the dripping or layering of glazes on ceramics that are not wood-fired, the handcrafting of useful wares as opposed to sculptural work, and a tendency to borrow forms and decorative effects from other regional artists. In addition to demonstrating a methodology that can be applied to studies of other emergent regional traditions, McGriff concludes that these styles and methods form a communal bond that inextricably links the processes of creating and sharing pottery in Michiana.

"Cultural historian Gail Crawford presents, for the first time, the full story of the ceramist's art in Canada. *Studio Ceramics in Canada* examines the growth of ceramics as a studio art, from its tentative beginnings after the First World War to the dynamism and diversity of today. "Throwing clay on a potter's wheel and the seemingly effortless and wonderful way that clay will swell and climb in the hands of a skilled potter is merely the beginning to this most 'natural' and ancient of crafts."--from *Throwing Pots* Throwing is a skill that many potters seek to master. It requires patience, time, and lots of practice. In *Throwing Pots*, Phil Rogers takes the reader through the basic principles of throwing. With the help of step-by-step illustrations, he demonstrates how to make a wide range of pots, from the simple bowl to the more complex forms of teapots and jugs, including lids and spouts. Rogers also discusses the aesthetics of pottery, encouraging readers to assess design and develop a personal style as well as recommending places to see examples of fine quality handthrown pottery.
