If you adequately apply Service Automation in your organization, you will see both employee and customer satisfaction rise and significantly increase the number of people who 'like' your company. The Service Automation Framework (SAF®) has been created to find a methodical way to discuss Service Automation. This book is intended for anyone who has ever experienced that the level of Service in his organization can be increased and is looking for guidance on a step-by-step model to achieve this, whether you are an entrepreneur, executive, consultant or work in the field of academia.
