The mighty enemy warship Ix-Gorghal has discovered the location of humanity's populated worlds and its arrival in New Earth orbit promises death for the billions living there. At first, it seems the invaders will have everything their own way. They send in troops and deploy a ring of satellites to isolate the planet from the main comms network. After that, it should all be plain sailing.... On the New Earth Tucson military base, there are personnel who will never accept defeat - men and women who will keep fighting even when the cause seems lost. Lieutenant Eric McKinney is one of them. An unexpected message from a lone fleet warship high above the planet sends him on a mission to rescue the only man on New Earth with the activation codes for two unfinished warships on the Tucson base - the battleship Ulterior-2 and an experimental gun called Earth's Fury. This time there's to be no holding back - his superiors want him to take the fight to the enemy, rather than wait it out in Confederation Space. Given a promise that this mission will be his last, Duggan ventures into the unknown - he must fly through the Helius Blackstar and see what lies on the other side. What he finds there is worse than he could possibly have imagined and it will take every ounce of his ingenuity to return with the secrets he discovers. Blake and his crew locate a catastrophically-damaged enemy Neutraliser, and there's no record of an engagement with human forces.
