

Chapter 16 World War Looms Test

A fresh treatment of Fascist Italy and Nazi Germany, revealing the close ties between Mussolini and Hitler and their regimes ?From 1934 until 1944 Mussolini met Hitler numerous times, and the two developed a relationship that deeply affected both countries. While Germany is generally regarded as the senior power, Christian Goeschel demonstrates just how much history has underrepresented Mussolini's influence on his German ally. In this highly readable book, Goeschel, a scholar of twentieth-century Germany and Italy, revisits all of Mussolini and Hitler's key meetings and asks how these meetings constructed a powerful image of a strong Fascist-Nazi relationship that still resonates with the general public. His portrait of Mussolini draws on sources ranging beyond political history to reveal a leader who, at times, shaped Hitler's decisions and was not the gullible buffoon he's often portrayed as. The first comprehensive study of the Mussolini-Hitler relationship, this book is a must-read for scholars and anyone interested in the history of European fascism, World War II, or political leadership.

From the bestselling author of *The Ascent of Money* and *The Square and the Tower* Western civilization's rise to global dominance is the single most important historical phenomenon of the past five centuries. How did the West overtake its Eastern rivals? And has the zenith of Western power now passed? Acclaimed historian Niall Ferguson argues that beginning in the fifteenth century, the West developed six powerful new concepts, or "killer applications"—competition, science, the rule of law, modern medicine, consumerism, and the work ethic—that the Rest lacked, allowing it to surge past all other competitors. Yet now, Ferguson shows how the Rest have downloaded the killer apps the West once monopolized, while the West has literally lost faith in itself. Chronicling the rise and fall of empires alongside clashes (and fusions) of civilizations, *Civilization: The West and the Rest* recasts world history with force and wit. Boldly argued and teeming with memorable characters, this is Ferguson at his very best.

In 1942, Bill Manbo (1908-1992) and his family were forced from their Hollywood home into the Japanese American internment camp at Heart Mountain in Wyoming. While there, Manbo documented both the bleakness and beauty of his surroundings, using Kodachrome film, a technology then just seven years old, to capture community celebrations and to record his family's struggle to maintain a normal life under the harsh conditions of racial imprisonment. *Colors of Confinement* showcases sixty-five stunning images from this extremely rare collection of color photographs, presented along with three interpretive essays by leading scholars and a reflective, personal essay by a former Heart Mountain internee. The subjects of these haunting photos are the routine fare of an amateur photographer: parades, cultural events, people at play, Manbo's son. But the images are set against the backdrop of the barbed-wire enclosure surrounding the Heart Mountain Relocation Center and the dramatic expanse of Wyoming sky and landscape. The accompanying essays illuminate these scenes as they trace a tumultuous history unfolding just beyond the camera's lens, giving readers insight into Japanese American cultural life and the stark realities of life in the camps. Also contributing to the book are: Jasmine Alinder is associate professor of history at the University of Wisconsin-Milwaukee, where she coordinates the program in public history. In 2009 she published *Moving Images: Photography and the Japanese American Incarceration* (University of Illinois Press). She has also published articles and essays on photography and incarceration, including one on the work of contemporary photographer Patrick Nagatani in the newly released catalog *Desire for Magic: Patrick Nagatani--Works, 1976-2006* (University of New Mexico Art Museum, 2009). She is currently working on a book on photography and the law. Lon Kurashige is associate professor of history and American studies and ethnicity at the University of Southern California. His scholarship focuses on racial ideologies, politics of identity, emigration and immigration, historiography, cultural enactments, and social reproduction, particularly as they pertain to Asians in the United States. His exploration of Japanese American assimilation and cultural retention, *Japanese American Celebration and Conflict: A History of Ethnic Identity and Festival, 1934-1990* (University of California Press, 2002), won the History Book Award from the Association for Asian American Studies in 2004. He has published essays and reviews on the incarceration of Japanese Americans and has coedited with Alice Yang Murray an anthology of documents and essays, *Major Problems in Asian American History* (Cengage, 2003). Bacon Sakatani was born to immigrant Japanese parents in El Monte, California, twenty miles east of Los Angeles, in 1929. From the first through the fifth grade, he attended a segregated school for Hispanics and Japanese. Shortly after Pearl Harbor, his family was confined at Pomona Assembly Center and then later transferred to the Heart Mountain Relocation Center in Wyoming. When the war ended in 1945, his family relocated to Idaho and then returned to California. He graduated from Mount San Antonio Community College. Soon after the Korean War began, he served with the U.S. Army Engineers in Korea. He held a variety of jobs but learned computer programming and retired from that career in 1992. He has been active in Heart Mountain camp activities and with the Japanese American Korean War Veterans.

With over sixty million casualties World War II was the bloodiest conflict in history. In this incisive introduction, Christopher Catherwood covers all the key battles, while giving the wider story behind them. He also brings a fresh angle to the conflict, emphasising the huge impact of the preceding Sino-Japanese War on World War II and the relative unimportance of the British campaign in Africa. From the impact of the Hiroshima bombing to the horrors wreaked by the Red Army and the Nazis, Catherwood makes clear the legacy of the war today. Full of text-boxes revealing key details about intelligence, weaponry, and the social milieu of the conflict, there is no better brief introduction.

From December 1941, Japan, as part of its plan to build an East Asian empire and secure oil supplies essential for war in the Pacific, swiftly took control of Southeast Asia. Japanese occupation had a devastating economic impact on the region. Japan imposed country and later regional autarky on Southeast Asia, dictated that the region finance its own occupation, and sent almost no consumer goods. GDP fell by half everywhere in Southeast Asia except Thailand. Famine and forced labour accounted for most of the 4.4 million Southeast Asian civilian deaths under Japanese occupation. In this groundbreaking new study, Gregg Huff provides the first comprehensive account of the economies and societies of Southeast Asia during the 1941-1945 Japanese occupation. Drawing on materials from 25 archives over three continents, his economic, social and historical analysis presents a new understanding of Southeast Asian history and development before, during and after the Pacific War.

In 1948, when "Mrs. G.," hospitalized with debilitating rheumatoid arthritis, became the first person to receive a mysterious new compound—cortisone—her physicians were awestruck by her transformation from enervated to energized. After eighteen years of biochemical research, the most intensively hunted biological agent of all time had finally been isolated, identified, synthesized, and put to the test. And it worked. But the discovery of a long-sought "magic bullet" came at an unanticipated cost in the form of strange side effects. This fascinating history recounts the discovery of cortisone and pulls the curtain back on the peculiar cast of characters responsible for its advent, including two enigmatic scientists, Edward Kendall and Philip Hench, who went on to receive the Nobel Prize. The book also explores the key role the Mayo Clinic played in fostering cortisone's development, and looks at drugs that owe their heritage to the so-called "King of Steroids."

A chronicle of the American experience during World War I and the unexpected changes that rocked the country in its immediate aftermath—the Red Scare, race riots, women's suffrage, and Prohibition. The Great War's bitter outcome left the experience largely overlooked and forgotten in American history. This timely book is a reexamination of America's first global experience as we commemorate World War I's centennial. The U.S. had steered clear of the European conflagration known as the Great War for more than two years, but President Woodrow Wilson reluctantly led the divided country into the conflict with the goal of making the world "safe for democracy." The country assumed a global role for the first time and attempted to build the foundations for world peace, only to witness the experience go badly

awry and it retreated into isolationism. Though overshadowed by the tens of millions of deaths and catastrophic destruction of World War II, the Great War was the most important war of the twentieth century. It was the first continent-wide conflagration in a century, and it drew much of the world into its fire. By the end of it, four empires and their royal houses had fallen, communism was unleashed, the map of the Middle East was redrawn, and the United States emerged as a global power – only to withdraw from the world's stage. The Great War is often overlooked, especially compared to World War II, which is considered the “last good war.” The United States was disillusioned with what it achieved in the earlier war and withdrew into itself. Americans have tried to forget about it ever since. The Great War in America presents an opportunity to reexamine the country's role on the global stage and the tremendous political and social changes that overtook the nation because of the war.

Volume 1: The military events of the Second World War have been the subject of historical debate from 1945 to the present. It mattered greatly who won, and fighting was the essential determinant of victory or defeat. In Volume 1 of 'The Cambridge History of the Second World War' a team of twenty-five leading historians offer a comprehensive and authoritative new account of the war's military and strategic history. Part I examines the military cultures and strategic objectives of the eight major powers involved. Part II surveys the course of the war in its key theatres across the world, and assesses why one side or the other prevailed there. Part III considers, in a comparative way, key aspects of military activity, including planning, intelligence, and organisation of troops and material, as well as guerrilla fighting and treatment of prisoners of war.

The Global Innovation Index 2020 provides detailed metrics about the innovation performance of 131 countries and economies around the world. Its 80 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. The 2020 edition sheds light on the state of innovation financing by investigating the evolution of financing mechanisms for entrepreneurs and other innovators, and by pointing to progress and remaining challenges – including in the context of the economic slowdown induced by the coronavirus disease (COVID-19) crisis.

The author of the international bestseller *The Rise and Fall of the Third Reich* offers a personal account of life in Nazi Germany at the start of WWII. By the late 1930s, Adolf Hitler, Führer of the Nazi Party, had consolidated power in Germany and was leading the world into war. A young foreign correspondent was on hand to bear witness. More than two decades prior to the publication of his acclaimed history, *The Rise and Fall of the Third Reich*, William L. Shirer was a journalist stationed in Berlin. During his years in the Nazi capital, he kept a daily personal diary, scrupulously recording everything he heard and saw before being forced to flee the country in 1940. *Berlin Diary* is Shirer's first-hand account of the momentous events that shook the world in the mid-twentieth century, from the annexation of Austria and Czechoslovakia to the fall of Poland and France. A remarkable personal memoir of an extraordinary time, it chronicles the author's thoughts and experiences while living in the shadow of the Nazi beast. Shirer recalls the surreal spectacles of the Nuremberg rallies, the terror of the late-night bombing raids, and his encounters with members of the German high command while he was risking his life to report to the world on the atrocities of a genocidal regime. At once powerful, engrossing, and edifying, William L. Shirer's *Berlin Diary* is an essential historical record that illuminates one of the darkest periods in human civilization.

From two former military officers and award-winning authors, a chillingly authentic geopolitical thriller that imagines a naval clash between the US and China in the South China Sea in 2034--and the path from there to a nightmarish global conflagration. On March 12, 2034, US Navy Commodore Sarah Hunt is on the bridge of her flagship, the guided missile destroyer USS John Paul Jones, conducting a routine freedom of navigation patrol in the South China Sea when her ship detects an unflagged trawler in clear distress, smoke billowing from its bridge. On that same day, US Marine aviator Major Chris "Wedge" Mitchell is flying an F35E Lightning over the Strait of Hormuz, testing a new stealth technology as he flirts with Iranian airspace. By the end of that day, Wedge will be an Iranian prisoner, and Sarah Hunt's destroyer will lie at the bottom of the sea, sunk by the Chinese Navy. Iran and China have clearly coordinated their moves, which involve the use of powerful new forms of cyber weaponry that render US ships and planes defenseless. In a single day, America's faith in its military's strategic pre-eminence is in tatters. A new, terrifying era is at hand. So begins a disturbingly plausible work of speculative fiction, co-authored by an award-winning novelist and decorated Marine veteran and the former commander of NATO, a legendary admiral who has spent much of his career strategically outmaneuvering America's most tenacious adversaries. Written with a powerful blend of geopolitical sophistication and human empathy, *2034* takes us inside the minds of a global cast of characters--Americans, Chinese, Iranians, Russians, Indians--as a series of arrogant miscalculations on all sides leads the world into an intensifying international storm. In the end, China and the United States will have paid a staggering cost, one that forever alters the global balance of power. Everything in *2034* is an imaginative extrapolation from present-day facts on the ground combined with the authors' years working at the highest and most classified levels of national security. Sometimes it takes a brilliant work of fiction to illuminate the most dire of warnings: *2034* is all too close at hand, and this cautionary tale presents the reader a dark yet possible future that we must do all we can to avoid.

The U.S. Army fought World War II with materiel much of which was developed in the decade prior to our entry, particularly in the period following the German blitz in Poland. Our efforts to develop munitions to the point where our armies could cope on equal terms with those of potential enemies are covered here in this, the first of three projected volumes on the history of the Ordnance Department in World War II. How well the Ordnance Department succeeded in matching the Germans in quality continues to be a matter of debate both within the Ordnance Department itself, and between the using arms and the Department. That the battle of quantity was won--with the help of a superb industrial machine--can hardly be denied. This volume, the result of diligent research by Dr. Constance McL. Green and her associates, should interest not only military men but also scientists, industrialists, and laymen in general. Among other things, it shows the urgent necessity of a directed, continuous, and intensive research program and the danger in failing to

recognize and profit by developments abroad. Also shown is the inherent time interval between the drawing board and the production of the end item in quantity."

How do Muslims relate to Islam in societies that experienced seventy years of Soviet rule? How did the utopian Bolshevik project of remaking the world by extirpating religion from it affect Central Asia? Adeb Khalid combines insights from the study of both Islam and Soviet history to answer these questions. Arguing that the sustained Soviet assault on Islam destroyed patterns of Islamic learning and thoroughly de-Islamized public life, Khalid demonstrates that Islam became synonymous with tradition and was subordinated to powerful ethnonational identities that crystallized during the Soviet period. He shows how this legacy endures today and how, for the vast majority of the population, a return to Islam means the recovery of traditions destroyed under Communism. Islam after Communism reasons that the fear of a rampant radical Islam that dominates both Western thought and many of Central Asia's governments should be tempered with an understanding of the politics of antiterrorism, which allows governments to justify their own authoritarian policies by casting all opposition as extremist. Placing the Central Asian experience in the broad comparative perspective of the history of modern Islam, Khalid argues against essentialist views of Islam and Muslims and provides a nuanced and well-informed discussion of the forces at work in this crucial region.

The best country-by-country assessment of human rights. The human rights records of more than ninety countries and territories are put into perspective in Human Rights Watch's signature yearly report. Reflecting extensive investigative work undertaken by Human Rights Watch staff, in close partnership with domestic human rights activists, the annual World Report is an invaluable resource for journalists, diplomats, and citizens, and is a must-read for anyone interested in the fight to protect human rights in every corner of the globe.

"A World in the Making is a kind of anthropological journey taken by four historians that assumes all societies are "hot," and all people make history and always have. We argue in our emphasis on lives and livelihoods for a world constructed, altered, renovated, remade by ordinary people even as we acknowledge the genius of individual innovators, disruptors who broke the mold or struck out in some new direction."--Provided by publisher.

The global community, dependent as always on the cooperation of nation states, is gradually learning to address the serious threats to the cultural heritage of our disparate but shared civilizations. The legacy of conquest, colonialization, and commerce looms large in defining and explaining these threats. The essays contained in this challenging volume are based on papers presented at an international conference on cultural heritage issues that took place at Willamette University. The conference sought to generate fresh ideas about these cultural heritage issues; offer a good sense of their nuances and complexities; and reveal how culture, law, and ethics can interact, complement, diverge, and contradict one another.

It has, improbably, been called uncommonly lucid, even riveting by *The New York Times*, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the events of the morning of 9/11 inside the Twin Towers. It is *The 9/11 Commission Report*, which was, before its publication, perhaps one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States—which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean—it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts—it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7—it is nevertheless an essential record of one of the most transformational events of modern times.

Portrayals of Antigone in Portugal offers an analysis of nine 20th and 21st century Portuguese literary and cinematic versions of this Theban myth.

Following the success of Rees' bestselling *Auschwitz*, this substantially revised and updated edition of *The Nazis - A Warning from History* tells the powerfully gripping story of the rise and fall of the Third Reich. During a 16-year period, acclaimed author and documentary-maker Laurence Rees met and interviewed a large number of former Nazis, and his unique insights into the Nazi psyche and World War 2 received enormous praise. At the heart of the book lies compelling eyewitness accounts of life under Adolf Hitler, spoken through the words of those who experienced the Nazi regime at every level of society. An extensive new section on the Nazi/Soviet war (previously published in Rees' *War of the Century*) provides a chilling insight into Nazi mentality during the most bloody conflict in history. Described as one of the greatest documentary series of all times *The Nazis - A Warning from History* won a host of awards, including a BAFTA and an International Documentary Award.

The conquest of Serbia was only one of the goals of the Austro-Hungarian Empire in the First World War; beyond this lay the desire to control much of South-East Europe.

For fans of *The War That Saved My Life* and other World War II fiction, *A Place to Hang the Moon* is the tale of three orphaned siblings who are evacuated from London to live in the countryside with the secret hope of finding a permanent family. It is 1940 and William, 12, Edmund, 11, and Anna, 9, aren't terribly upset by the death of the not-so-grandmotherly grandmother who has taken care of them since their parents died. But the children do need a guardian, and in the dark days of World War II London, those are in short supply, especially if they hope to stay together. Could the mass wartime evacuation of children from London to the countryside be the answer? It's a preposterous plan, but off they go-- keeping their predicament a secret, and hoping to be placed in a temporary home that ends up lasting forever. Moving from one billet to another, the children suffer the cruel trickery of foster brothers, the cold realities of outdoor toilets and the hollowness of empty stomachs. They find comfort in the village lending library, whose kind librarian, Nora Müller, seems an excellent choice of billet, except that her German husband's whereabouts are currently unknown, and some of the villagers consider her unsuitable. *A Place to Hang the Moon* is a story about the dire importance of family: the one you're given, and the one you choose. A Junior Library Guild Gold Standard Selection

World War II was the quintessential "good war." It was not, however, a conflict free of moral ambiguity, painful dilemmas, and unavoidable compromises. Was the bombing of civilian populations in Germany and Japan justified? Were the Nuremberg and Tokyo war crimes trials legally scrupulous? What is the legacy bequeathed to the world by Hiroshima? With wisdom and clarity, Michael Bess brings a fresh eye to these difficult questions and others, arguing eloquently against the binaries of honor and dishonor, pride and shame, and points instead toward a nuanced reckoning with one of the most pivotal conflicts in human history.

The #1 New York Times bestselling sequel to *Words of Radiance*, from epic fantasy author Brandon Sanderson at the top of his game. In *Oathbringer*, the third volume of the New York Times bestselling *Stormlight Archive*, humanity faces a new Desolation with the return of the Voidbringers, a foe with numbers as great as their thirst for vengeance. Dalinar Kholin's Alethi armies won a fleeting victory at a terrible cost: The enemy Parshendi summoned the violent Everstorm, which now sweeps the world with destruction, and in its passing awakens the once peaceful and subservient parshmen to the horror of their millennia-long enslavement by humans. While on a desperate flight to warn his family of the threat, Kaladin Stormblessed must come to grips with the fact that the newly kindled anger of the parshmen may be wholly justified. Nestled in the mountains high above the storms, in the tower city of Urithiru, Shallan Davar investigates the wonders of the ancient stronghold of the Knights Radiant and unearths dark secrets lurking in its depths. And Dalinar realizes that his holy mission to unite his homeland of Alethkar was too narrow in scope. Unless all the nations of Roshar can put aside Dalinar's blood-soaked past and stand together—and unless Dalinar himself can confront that past—even the restoration of the Knights Radiant will not prevent the end of civilization. . *Renewal of Life by Transmission*. The most notable distinction between living and inanimate things is that the former maintain themselves by renewal. A stone when struck resists. If its resistance is greater than the force of the blow struck, it remains outwardly unchanged. Otherwise, it is shattered into smaller bits. Never does the stone attempt to react in such a way that it may maintain itself against the blow, much less so as to render the blow a contributing factor to its own continued action. While the living thing may easily be crushed by superior force, it none the less tries to turn the energies which act upon it into means of its own further existence. If it cannot do so, it does not just split into smaller pieces (at least in the higher forms of life), but loses its identity as a living thing. As long as it endures, it struggles to use surrounding energies in its own behalf. It uses light, air, moisture, and the material of soil. To say that it uses them is to say that it turns them into means of its own conservation. As long as it is growing, the energy it expends in thus turning the environment to account is more than compensated for by the return it gets: it grows. Understanding the word "control" in this sense, it may be said that a living being is one that subjugates and controls for its own continued activity the energies that would otherwise use it up. Life is a self-renewing process through action upon the environment.

This book presents a comprehensive study of the most famous and spectacular instance of inflation in modern industrial society--that in Germany during and following World War I. A broad, probing narrative, this book studies inflation as a strategy of social pacification and economic reconstruction and as a mechanism for escaping domestic and international indebtedness. *The Great Disorder* is a study of German society under the tension of inflation and hyperinflation, and it explores the ways in which Germany's hyperinflation and stabilization were linked to the Great Depression and the rise of National Socialism. This wide-ranging study sets German inflation within the broader issues of maintaining economic stability, social peace, and democracy and thus contributes to the general history of the twentieth century and has important implications for existing and emerging market economies facing the temptation or reality of inflation.
