This collection of articles presents cutting-edge scholarship in Hippocratic studies in English from an international range of experts. It pays special attention to the commentary tradition, notably in Syriac and Arabic, and its relevance to the constitution and interpretation of works in the Hippocratic Corpus.

With an interdisciplinary approach that encompasses the history of ideas, political history, cultural history and art history, this volume, in the successful Routledge Worlds series, offers a sweeping survey of Europe in the Renaissance, from the late thirteenth to early seventeenth centuries, and shows how the Renaissance laid key foundations for many aspects of the modern world. Collating thirty-four essays from the field's leading scholars, John Jeffries Martin shows that this period of rapid and complex change resulted from a convergence of a new set of social, economic and technological forces alongside a cluster of interrelated practices including painting, sculpture, humanism and science, in which the elites engaged. Unique in its balance of emphasis on elite and popular culture, on humanism and society, and on women as well as men, *The Renaissance World* grapples with issues as diverse as Renaissance patronage and the development of the slave trade. Beginning with a section on the antecedents of the Renaissance world, and ending with its lasting influence, this book is an invaluable read, which students and scholars of history and the Renaissance will dip into again and again.

Through the masterpieces produced by artists ranging from Michelangelo and Leonardo to Rembrandt, Rubens, and Vermeer, Europe's Renaissance and Baroque period grew into one of the most creative times in world history. "A Companion to Renaissance and Baroque Art" presents a comprehensive collection of interdisciplinary essays that address major aspects of European visual arts produced from approximately 1300 to 1700, a period of artistic flourishing that many consider the beginning of modern history. These essays, however, transcend the traditional period labels of "Renaissance" and "Baroque" by addressing works from Duccio and Chaucer to Velazquez and Newton as a single continuum, inclusive in terms of both disciplinary and geographical boundaries, as an era best characterized as "early modern." Featuring original contributions by an international roster of scholars from various disciplines, writings are grouped by concept in five sections that spotlight the varied components and processes that constitute the world of the visual arts and the variety of interpretive methods and ideas that can be, and have been, brought to bear on art objects. Essays explore how art interacts with the cultural paradigms of this explosive time: the interface between art and religion, art and science, and gender and sexuality to name a few. Combining an unprecedented breadth of coverage and depth of scholarship with lucid and accessible writing, "A Companion to Renaissance and Baroque Art" represents the most comprehensive reference on the study of Renaissance and Baroque visual arts available today.

A team of 16 experts underline the binds and exchanges between different contexts and artistic techniques that copies established in the Renaissance, and how the history of taste is sophisticated and complex.

The history of northern Renaissance art, from the late 14th to the early 16th century, drawing on a rich range of sources to show how northern European art dominated the visual culture of Europe in this formative period

The Humanist World of Renaissance Florence offers the first synthetic interpretation of the humanist movement in Renaissance Florence in more than fifty years.

From the fourteenth to the seventeenth century, humanism played a key role in European culture. Beginning as a movement based on the recovery, interpretation and imitation of ancient Greek and Roman texts and the archaeological study of the physical remains of antiquity, humanism turned into a dynamic cultural programme, influencing almost every facet of Renaissance intellectual life. The fourteen essays in this 1996 volume deal with all aspects of the movement, from language learning to the development of science, from the effect of humanism on biblical study to its influence on art, from its Italian origins to its manifestations in the literature of More, Sidney and Shakespeare. A detailed biographical index, and a guide to further reading, are provided. Overall, *The Cambridge Companion to Renaissance Humanism* provides a comprehensive introduction to a major movement in the culture of early modern Europe.

This volume, edited by Natasha Constantinidou and Han Lamers, investigates modes of receiving and responding to Greeks, Greece, and Greek in early modern Europe (15th-17th centuries). The book's 17 detailed studies illuminate the reception of Greek culture (the classical, Byzantine, and even post-Byzantine traditions), the Greek language (ancient, vernacular, and 'humanist'), as well as the people claiming, or being assigned, Greek identities during this period in different geographical and cultural contexts. Discussing subjects as diverse as, for example, Greek studies and the Reformation, artistic interchange between Greek East and Latin West, networks of communication in the Greek diaspora, and the ramifications of Greek antiquarianism, the book aims at encouraging a more concerted debate about the role of Hellenism in early modern Europe that goes beyond disciplinary boundaries, and opening ways towards a more over-arching understanding of this multifaceted cultural phenomenon.

A classic account of the Reformation, revealing the issues and preoccupations which seemed central to the age and portraying its leading figures with vigour and realism. The book is an analysis of the religious, economic, cultural and political history of Europe during the period of the Reformation. Author G. R. Elton examines the history of the period through the interrelationships between different forces in Europe at the time, such as the Holy Roman Emperor Charles V, the Papacy, reformers such as Martin Luther, John Calvin, Martin Bucer and Zwingli, and explores the resultant Counter-Reformation and the beginnings of European colonisation of other parts of the world such as South America. Its central focus is upon the conflict between Luther and Charles V. "A masterly survey by a fine historian. He has gone to great pains to understand and do justice to the theological side, and if political history is still his strength there is no doubt that this paperback in scholarship, perspective and information far outweighs in value and importance most of the hard-bound studies of the 16th century in the last fifty years."—E. GORDON RUPP "It is extremely pleasant to welcome a new History of Europe series in which the inaugural volume is of such high merit. Dr. Elton sets himself a difficult task; the result is a book written with the bold, subtle, assured pen of an accomplished scholar."—JOEL HURSTFIELD "Not since Ranke has any historian described the religious and political history of Central Europe during the Reformation with as much insight and authority."—H. G. KOENIGSBERGER, *History* (London) "Dr. Elton has put all students in his debt by providing an up-to-date and highly readable account of the ecclesiastical, political, and social history of Europe during the vital years 1517 to 1559...This book can be unreservedly commended."—C. W. DUGMORE, *The Journal of Ecclesiastical History*

This book investigates the importance of printing in early-modern Central Europe, revealing a complicated web of connections linking printers and scholars, Jews and Christians, from the Baltic to the Adriatic.

Available in both one-volume and two-volume paperback editions, *A History of Modern Europe* presents a panoramic survey of modern Europe from the Renaissance to the present day. A seasoned teacher and talented historian, Professor John Merriman offers a carefully crafted narrative that guides students through a vast amount of complex material, integrating the many aspects of the European experience into a larger, interconnected whole. A full ten percent shorter than its predecessor, the Second Edition has tightened organization throughout to make room for recent research and descriptions of the current issues and events that define Europe's role in the world today.

This book provides diverse perspectives on Shakespeare and early modern literature that engage innovation, collaboration, and forward-looking practices.

Festival culture is an area which has attracted increasing interest in the field of Renaissance studies in recent years. In part the outcome of scholars' focus on the place of the city in the establishment and dissemination of common culture, the attention paid to festivals also arises

from the interdisciplinary nature of the topic, which reaches across the usual demarcation lines between disciplines such as cultural, political and economic history, literature, and the visual and performing arts. The scholars contributing to this volume include representatives from all these disciplines. Their essays explore common themes in festival culture across Renaissance Europe, including the use of festival in political self-fashioning and the construction of a national self-image. Moreover, in their detailed examination of particular types of festival, they challenge generalizations and demonstrate the degree to which these events were influenced the personality of the prince, the sources of funding for the ceremony, and the role of festival managers. Usually perceived as binding forces promoting social cohesion, festivals held the potential for discord, as some of the essays here reveal. Examining a wide range of festivals including coronations, triumphal entries, funerals and courtly spectacles, this volume provides a more inclusive understanding than hitherto of festivals and their role in European Renaissance culture.

The rise and fall of the Islamic scientific tradition, and the relationship of Islamic science to European science during the Renaissance. The Islamic scientific tradition has been described many times in accounts of Islamic civilization and general histories of science, with most authors tracing its beginnings to the appropriation of ideas from other ancient civilizations—the Greeks in particular. In this thought-provoking and original book, George Saliba argues that, contrary to the generally accepted view, the foundations of Islamic scientific thought were laid well before Greek sources were formally translated into Arabic in the ninth century. Drawing on an account by the tenth-century intellectual historian Ibn al-Nadim that is ignored by most modern scholars, Saliba suggests that early translations from mainly Persian and Greek sources outlining elementary scientific ideas for the use of government departments were the impetus for the development of the Islamic scientific tradition. He argues further that there was an organic relationship between the Islamic scientific thought that developed in the later centuries and the science that came into being in Europe during the Renaissance. Saliba outlines the conventional accounts of Islamic science, then discusses their shortcomings and proposes an alternate narrative. Using astronomy as a template for tracing the progress of science in Islamic civilization, Saliba demonstrates the originality of Islamic scientific thought. He details the innovations (including new mathematical tools) made by the Islamic astronomers from the thirteenth to sixteenth centuries, and offers evidence that Copernicus could have known of and drawn on their work. Rather than viewing the rise and fall of Islamic science from the often-narrated perspectives of politics and religion, Saliba focuses on the scientific production itself and the complex social, economic, and intellectual conditions that made it possible.

This pioneering study approaches the new printed-book industry in Renaissance Italy from the perspective of its publishers and booksellers, analyzing their responses to the challenges of production and their creative approaches to the distribution and sale of their merchandise. "An impressive collection of 29 essays by British, American and Italian scholars on important historical, artistic, cultural, social, legal, literary and theatrical aspects of women's contributions to the Italian Renaissance, in its broadest sense. Many contributions are the result of first-hand archival research and are illustrated with numerous unpublished or little-known reproductions or original material. The subjects include: women and the court (Dilwyn Knox, Evelyn S Welch, Francine Daenens and Diego Zancani); women and the church (Gabriella Zarri, Victoria Primhak, Kate Lowe, Francesca Mediolini and Ruth Chavasse); legal constraints and ethical precepts (Marina Graziosi, Christine Meek, Brian Richardson, Jane Bridgeman and Daniela De Bellis); female models of comportment (Marta Ajmarn Paola Tinagli and Sara F Matthews Grieco); women and the stage (Richard Andrews, Maggie Guensbergberg, Rosemary E Bancroft-Marcus); women and letters (Diana Robin, Virginia Cox, Pamela J Benson, Judy Rawson, Conor Fahy, Giovanni Aquilecchia, Adriana Chemello, Giovanna Rabitti and Nadia Cannata Salamone)."

A COMPANION TO THE GLOBAL RENAISSANCE An innovative collection of original essays providing an expansive picture of globalization across the early modern world, now in its second edition A Companion to the Global Renaissance: Literature and Culture in the Era of Expansion, 1500–1700, Second Edition provides readers with a deeper and more nuanced understanding of both macro and micro perspectives on the commercial and cross-cultural interactions of the sixteenth and seventeenth centuries. Covering a uniquely broad range of literary and cultural materials, historical contexts, and geographical regions, the Companion's varied chapters offer interdisciplinary perspectives on the implications of early modern concepts of commerce, material and artistic culture, sexual and cross-racial encounters, conquest and enslavement, social, artistic, and religious cross-pollinations, geographical "discoveries," and more. Building upon the success of its predecessor, this second edition of A Companion to the Global Renaissance radically extends its scope by moving beyond England and English culture. Newly-commissioned essays investigate intercultural and intra-cultural exchanges, transactions, and encounters involving England, European powers, Eastern kingdoms, Africa, Islamic empires, and the Americas, within cross-disciplinary frameworks. Offering a complex and multifaceted view of early modern globalization, this new edition: Demonstrates the continuing global "turn" in Early Modern Studies through original essays exploring interconnected exchanges, transactions, and encounters Provides significantly expanded coverage of global interactions involving England, European powers such as Portugal, Spain, and The Netherlands, Eastern empires such as Japan, and the Ottoman, Safavid, and Mughal empires Includes a Preface and Afterword, as well as a revised and expanded Introduction summarizing the evolving field of Global Early Modern Studies and describing the motifs and methodologies informing the essays within the volume Explores an array of new subjects, including an exceptional woman traveler in Eurasia, the Jesuit presence in Mughal India and sixteenth-century Japan, the influence of Mughal art on an Amsterdam painter-cum-poet, the cultural impact of Eastern trade on plays and entertainments in early modern London, Safavid cultural disseminations, English and Portuguese slaving practices, the global contexts of English pattern poetry, and global lyric transmissions across cultures A wide-ranging account of the global expansions and interactions of the period, A Companion to the Global Renaissance: Literature and Culture in the Era of Expansion, 1500–1700, Second Edition remains essential reading for early modern scholars and students ranging from undergraduate and graduate students to more advanced scholars and specialists in the field.

This volume offers a wide-ranging overview of the 16th-18th century disputation culture in various European regions. Its focus is on printed disputations as a polyvalent media form which brings together many of the elements that contributed to the cultural and scientific changes during the early modern period.

This volume brings together some of the most exciting renaissance scholars to suggest new ways of thinking about the period and to set a new series of agendas for Renaissance scholarship. Overturns the idea that it was a period of European cultural triumph and highlights the negative as well as the positive. Looks at the Renaissance from a world, as opposed to just European, perspective. Views the Renaissance from perspectives other than just the cultural elite. Gender, sex, violence, and cultural history are integrated into the analysis.

This book maps the landscape of contemporary European premium television fiction, offering a detailed overview of both the changes in the digital production and distribution and the emergence of specific national and transnational case histories. Combining a media-production approach with a textual and audience analysis, the volume offers a complex, stratified, systemic view of ongoing aesthetic, sociocultural and industrial developments in contemporary European TV. With contributions from leading experts in the field, the book first offers an overview of the industrial, policy and cultural context for the renaissance of European television drama over the past decade, based on original comparative research. This research is then supported by case study chapters from the key contexts within which quality European television is being produced, offering a complex and complete picture of the industry's strengths and limitations, its traditions and trends, its constraints and future perspectives. A European Television Fiction Renaissance is a must-read book for TV scholars working across Europe and beyond in the areas of media studies, international communications and television studies, media industries studies, production studies, European studies, and media policy studies as well as for those with an interest in television drama, Netflix, globalisation, pay TV and on demand. Examines the intellectual and artistic foundations of the Imperial Renaissance in fourteenth- and fifteenth-century Italy and traces its political realization in sixteenth- and seventeenth-century Europe.

A Companion to the Reformation in Central Europe analyses the history of Christianity from the 15th to the 18th centuries in the lands between the Baltic and Adriatic seas.

The early modern and modern cultural world in the West would be unthinkable without Petrarch and Boccaccio. Despite this fact, there is still no scholarly contribution entirely devoted to analysing their intellectual revolution. Internationally renowned scholars are invited to discuss and rethink the historical, intellectual, and literary roles of Petrarch and Boccaccio between the great model of Dante's encyclopedia and the ideas of a double or multifaceted culture in the era of Italian Renaissance Humanism. In his lyrical poems and Latin treatises, Petrarch created a cultural pattern that was both Christian and Classical, exercising immense influence on the Western World in the centuries to come. Boccaccio translated this pattern into his own vernacular narratives and erudite works, ultimately claiming as his own achievement the reconstructed unity of the Ancient Greek and Latin world in his contemporary age. The volume reconsiders Petrarch's and Boccaccio's heritages from different perspectives (philosophy, theology, history, philology, paleography, literature, theory), and investigates how these heritages shaped the cultural transition between the end of the Middle Ages and the early modern era, as well as European identity.

Publisher Description

E. H. Gombrich's Little History of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.
