The ideal text for undergraduate and graduate students in advanced cell biology courses  
Extraordinary technological advances in the last century have fundamentally altered the way we ask questions about biology, and undergraduate and graduate students must have the necessary tools to investigate the world of the cell. The ideal text for students in advanced cell biology courses, Lewin's CELLS, Third Edition continues to offer a comprehensive, rigorous overview of the structure, organization, growth, regulation, movements, and interactions of cells, with an emphasis on eukaryotic cells. The text provides students with a solid grounding in the concepts and mechanisms underlying cell structure and function, and will leave them with a firm foundation in cell biology as well as a "big picture" view of the world of the cell. Revised and updated to reflect the most recent research in cell biology, Lewin's CELLS, Third Edition includes expanded chapters on Nuclear Structure and Transport, Chromatin and Chromosomes, Apoptosis, Principles of Cell Signaling, The Extracellular Matrix and Cell Adhesion, Plant Cell Biology, and more. All-new design features and a chapter-by-chapter emphasis on key concepts enhance pedagogy and emphasize retention and application of new skills. Thorough, accessible, and essential, Lewin's CELLS, Third Edition, turns a new and sharper lens on the fundamental units of life.

Check out preview content for Money, Banking, and Financial Markets here. Monetary policy has changed. Has your textbook? Ball's Money, Banking, and Financial Markets closes the gap between economic theory and the day-to-day behavior of banks and financial markets. Working from a macro framework based on the Fed's use of the interest rate as its major policy instrument, Ball presents the core concepts necessary to understand the problems affecting the stock market and the causes of recessions and banking crises. Underlying this framework are the intellectual foundations for the Fed's inflation targeting using the dynamic consistency problem facing policymakers. Ball doesn't explain how the Fed and financial markets should work; he explains how they do work on a daily basis.

HUMANITY: AN INTRODUCTION TO CULTURAL ANTHROPOLOGY, Eleventh Edition, offers a solid framework centered on globalization and culture change. The text's engaging narrative provides new ways of looking at many of the challenges facing the world in this century, as students examine ethnic conflicts, globalization of culture and language, recent debates about gay marriage, increasing inequalities, population growth, hunger, and the survival of indigenous cultures. Throughout this highly acclaimed work, Peoples and Bailey explore the diversity of humanity and clearly demonstrate why an appreciation and tolerance of cultural differences is critical today. Using research in clinical, cognitive, developmental, and social psychology, Forensic and Legal Psychology shows how psychological science can enhance the gathering and presentation of evidence, improve legal decision-making, prevent crime, rehabilitate criminals, and promote justice. Although the emphasis is on psychological research, the textbook makes extensive use of actual cases and real trials to engage students and to illustrate the relevance of research findings. Written in a clear, student-friendly style, Forensic and Legal Psychology is designed for both the psychology and law AND forensic psychology class. Visit the preview site for more information:

Entrusted by the Board of Management of the Pacific Rim Objective Measurement Symposium (PROMS), PROMS2012 is held in Jiaying, China from August 6-9, 2012. Over the past years, PROMS has been hosted in many parts of the Pacific Rim, in Singapore, Malaysia, Hong Kong, Taiwan and Tokyo, which has greatly promoted the research of and contributed to the development of Rasch Model in one way or another. As early as in 1980s, the ideas and concepts regarding IRT was first introduced into China by Prof. Gui Shichun, my Ph.D supervisor, and it is Prof. Gui who first conducted with great success the ten-year long (1990-1999) Equating Project for Matriculation English Test (MET) in China. MET is the most influential entrance examination for higher education administered annually to over 3.3 million candidates then. The Equating Project won recognition by Charles Alderson and other foreign counterparts during 1990s. Academically, those were Good Old Days for Chinese testing experts and psychometricians. Then for certain reasons, the equating practice abruptly discontinued. Therefore, in China nowadays, the application of IRT-based software like BILOG, Parscale, Iteman 4 and others to real testing problem solving is confined to an extremely small 'band' of people. In this sense, PROMS2012 meets an important need in that it provides an excellent introduction of IRT and its application. And anyone who is seriously interested in research and development in the field of psychometrics or language testing will find such a symposium and related workshops to be an excellent source of information about the application of Rasch Model. PROMS2012 focuses on recent advances in objective measurement and provides an international forum on both the latest research in using Rasch measurement and non-Rasch practice.

Using no-nonsense language, realistic examples, easy-to-follow steps and practical exercises, this book guides students through various types of public relations writing. A focus on ethical and legal issues is woven throughout, with examples and exercises that deal with public relations as practiced by corporations, non-profit agencies, and other types of organizations large and small. In addition, the book addresses the most comprehensive list of public relations writing formats to be found anywhere--from old standbys like news releases to electronic mail and other opportunities in new technologies. Laying the foundation for an integrated approach that touches on public relations advertising and direct mail, this second edition is divided into four parts. Part I deals with principles of effective writing useful in all disciplines. Part II focuses on news as the bridge an organization can build to its various publics. Part III takes you through a variety of writing formats and environments that provide an internal or controlled approach. Part IV is the wrap up that pulls together the various

writing styles presented in this book as part of an integrated communication package. Becoming a Public Relations Writer is a different kind of textbook for college and university students. It provides writing instruction for people preparing to enter the profession and guides students with models and step-by-step patterns designed to increase competence and build confidence in students on their way to becoming public relations writers.
