Adopted by the State of Arkansas for 2008 Once again, the State of Arkansas has adopted An Arkansas History for Young People as an official textbook for middle-level and/or junior-high-school Arkansas-history classes. This fourth edition incorporates new research done after extensive consultations with middle-level and junior-high teachers from across the state, curriculum coordinators, literacy coaches, university professors, and students themselves. It includes a multitude of new features and is now full color throughout. This edition has been completely redesigned and now features a modern format and new graphics suitable for many levels of student readers. The completely revised fourth edition

includes new unit, chapter, and section divisions as well as five brand-new chapters: an introductory chapter with information on the symbols, flag, and songs of Arkansas; chapter 2, which covers the geography of Arkansas; chapter 3, on state and local government; chapter four, on economics and tourism; and a "modern" chapter on the Arkansas of today and the future, which completes the learning adventure. This edition also has two "special features": one on the Central High School crisis of 1957 and another on the William J. Clinton Presidential Library. It also has new and interesting features for students like the "Guide to Reading" (at the beginning of each chapter, there is a list of important terms, people, places and events for the student to keep in mind as he or she reads [corresponding to blue vocabulary words in the text, which are define in the margin]), "County Quest," "I Am an Arkansan," "Did You Know?" "Only in Arkansas," "A Day in the Life," "Chapter Reflection" questions and activities, over forty-five new content maps, and a comprehensive new map atlas.

The definitive reference work, this book combines detailed scientific accuracy with a classical style, erudition, and an appealing presentation. It covers the past, present, and future trends in endocrinology, and includes biographies of major figures. It provides chronological tables and name and subject indexes that make the information easily accessible.

World War II, also known as the Second World War, was a global war that lasted from 1939 to 1945. The vast majority of the world's countries—including all the great powers—eventually formed two opposing military alliances: the Allies and the Axis. This Family History traces the varied fortunes of the Smiths of West Yorkshire. It also

examines their connection with other families, including: - The Absaloms of Hampshire and London - The Cardens of Brighton - The Cloughs of Sutton and Crosshills - The Fareys of Skipton - The Fosters of Waterford, Ireland and Birmingham - The Gillinsons of Leeds - The Hastings of Holderness - The Morton's of America - The Myersons of London - The Stamfords of East Yorkshire - The Wilsons of Calderdale A key theme running throughout this History has been the determined use of what could aptly be termed 'survival strategies' by successive generations of Smiths. Their aim was always to bolster a precarious 'respectability' in what was often a harsh and unstable environment. The mass of factual and bibliographical information found within its pages will prove useful to Research Students and Family, Local and Social Historians. Above all, it offers a legacy to inspire both present and future family members

Peter Caws provides a fresh and often iconoclastic treatment of some of the most vexing problems in the philosophy of science: explanation, induction, causality, evolution, discovery, artificial intelligence, and the social implications of technological rationality. Caws's work has been shaped equally by the insights of Continental philosophy and a concern with scientific practice. In these twenty-eight essays spanning more than a quarter of a century, he ranges from discussions of the work of French philosopher Gaston Bachelard, to relations between science and surrealism, to the concept of intentionality, to the limits of quantitative description. A lively mix of history, theory, speculation, and analysis, *Yorick's World* presents a vision of science that includes human history and social life. It will interest professional philosophers and scientists, and at the same time its directness will make it readily accessible to nontechnical readers.

This volume consists of a collection of articles based on lectures given by scholars from India, Europe and USA at the sessions on 'History of Indian Mathematics' at the AMS-India mathematics conference in Bangalore during December 2003. These articles cover a wide spectrum of themes in Indian mathematics. They begin with the mathematics of the ancient period dealing with Vedic Prosody and Buddhist Logic, move on to the work of Brahmagupta, of Bhaskara, and that of the mathematicians of the Kerala school of the classical and medieval period, and end with the work of Ramanujan, and Indian contributions to Quantum Statistics during the modern era. The volume should be of value to those interested in the history of mathematics.

Why, from the eighteenth century onwards, did some countries embark on a path of sustained economic growth, while others stagnated? This text looks at the kind of institutions that are required in order for change to take place, and Ringmar concludes that for sustained development to be possible, change must be institutionalized. Taking a global view, Ringmar investigates the implications of his conclusion on issues facing the developing world today.

In a neo-liberal era concerned with discourses of responsible individualism and the 'selfie', there is an increased interest in personal lives and experiences. In contemporary life, the personal is understood to be political and these ideas cut across both the social sciences and humanities. This handbook is specifically concerned with auto/biography, which sits within the field of narrative, complementing biographical and life history research. Some of the contributors emphasise the place of narrative in the construction of auto/biography, whilst others disrupt the perceived boundaries between the individual and the social, the self and the other. The collection has nine sections: creativity and collaboration; families and relationships; epistolary lives; geography; madness; prison lives; professional lives; 'race'; and social justice and disability. They illustrate the inter- and multi-disciplinary nature of auto/biography as a field. Each section features an introduction from a section editor, many of whom are established researchers and/or members of the British Sociological Association (BSA) Auto/Biography study group. The handbook provides the reader with cutting-edge research from authors at different stages in their careers, and will appeal to those with an interest in auto/biography, auto-ethnography, epistolary traditions, lived experiences, narrative analysis, the arts, education, politics, philosophy, history, personal life, reflexivity, research in practice and the sociology of the everyday. Chapter 1: A Case for Auto/Biography; Julie Parsons and Anne Chappell. Section One: Creativity and Collaboration; edited by Gayle Letherby. World History Teaching in Asia is the first broad survey of the content and approaches used to teach world history in secondary schools and colleges in Asia. The collection has been crafted by scholars and educators whose goal was to shed light on the importance of history education and to foster understanding of and between Asian countries. These essays show how the teaching of world history in Asian countries has developed since World War II, with many interesting parallels, including the issue of Eurocentrism, but also distinctive national trends, and considerable changes over time. At a time when many Asian countries are making great strides in education, this study of history education in Asia will be of real interest to educators, history scholars, and policy-makers worldwide.
