Study dealing with the evaluation of accountancy structures, developments and requirements in developing economies. The chapters successively discuss: accountancy in the economic process; systems of accountancy and potentials for improvement; functional aspects to improve accountancy; accountancy patterns, developments and requirements in Africa; and accountancy patterns, developments and requirements in Asia.

This critically acclaimed text takes a modern and completely unique approach to the study of cell biology. Its overriding theme is that cellular structure, function, and dysfunction ultimately result from specific macromole-cular interactions. The text takes readers from an explanation of the "hardware" of molecules and cells to an understanding of how these structures function in the organism in both healthy and diseased states. An exquisite art program allows readers to better visualize the molecular structures.
