**Ethics in Health Administration** Eileen E. Morrison, 2008-03-20 New Edition Available 5/1/2013 Building on the wisdom and forward thinking of authors John Monagle and David Thomas, this thorough revision of Health Care Ethics: Critical Issues for the 21st Century brings the reader up-to-date on the most important issues in biomedical ethics today.

*Ethics in Health Administration: A Practical Approach for Decision Makers* Eileen E. Morrison, 2019-01-29 Given the many advances in technology as well as the ongoing discussion of health care reform post-Affordable Care Act, today's healthcare administrators require a strong foundation in practice-based ethics to confront the challenges of the current healthcare landscape. Ethics in Health Administration, Fourth Edition focuses on the application of ethics to the critical issues faced by today's healthcare administrators. After establishing a foundation in the theory and principles of ethics, the text encourages students to apply ethics to such areas change, regulation, technology and fiscal responsibility. Thoroughly updated, the Fourth Edition includes 12 new, contemporary case studies that encourage students to apply ethics. A new chapter on the Ethics in the Epoch of Change stresses major changes in healthcare, including the digital revolution, population health, ethics temptations and ethic resilience. Other chapters have been revised to include new cases, and more.

*Contemporary Bioethics* Mohammed Ali Al-Bar, Hassan Chamsi-Pasha, 2015-06-10 This book discusses the common principles of morality and ethics derived from divinely endowed intuitive reason through the creation of al-fitr' a (nature) and human intellect (al-'aql). Biomedical topics are presented and ethical issues related to topics such as genetic testing, assisted reproduction and organ transplantation are discussed. Whereas these natural sources are God's special gifts to human beings, God's revelation as given to the prophets is the supernatural source of divine guidance through which human communities have been guided at all times through history. The second part of the book concentrates on the objectives of Islamic religious practice - the maqa' sid - which include: Preservation of Faith, Preservation of Life, Preservation of Mind (intellect and reason), Preservation of Progeny (al-nasl) and Preservation of Property. Lastly, the third part of the book discusses selected topical issues, including abortion, assisted reproduction devices, genetics, organ transplantation, brain death and end-of-life aspects. For each topic, the current medical evidence is followed by a detailed discussion of the ethical issues involved.

**Dictionary of Global Bioethics** Henk ten Have,Maria do Céu Patrão Neves,2021-05-26 This Dictionary presents a broad range of topics relevant in present-day global bioethics. With more than 500 entries, this dictionary covers organizations working in the field of global bioethics, international documents concerning bioethics, personalities that have played a role in the development of global bioethics, as well as specific topics in the field. The book is not only useful for students and professionals in global health activities, but can also serve as a basic tool that explains relevant ethical notions and terms. The dictionary furthers the ideals of cosmopolitanism: solidarity, equality, respect for difference and concern with what human beings- and specifically patients - have in common, regardless of their backgrounds, hometowns, religions, gender, etc. Global problems such as pandemic diseases, disasters, lack of care and medication, homelessness and displacement call for global responses. This book demonstrates that a moral vision of global health is necessary and it helps to quickly understand the basic ideas of global bioethics.

*Care and Respect in Bioethics* Darlei Dall'Agnol,2016-09-23 This book discusses the philosophical foundations of bioethics, with a particular focus on the tensions and potential dilemmas generated by the intuitionist meta-ethical commitments of the predominant normative theory, namely "the four principles approach." This view is based on the prima facie norms of respect for autonomy (one ought to respect the autonomous choices of subjects of scientific research/patients), non-maleficence (one ought to refrain from inflicting harm), beneficence (one ought to do good and prevent, or remove, harm) and justice (one ought to treat people fairly). The tensions in applying these basic principles may lead to inaction in scientific experiments involving human subjects or to arbitrary applications of the norms in the art of caring. The problem can be made explicit in these terms: on the one hand, caring without respecting seems blind, degenerating into forms of paternalism when, for instance, the carer imposes her conception of the good life or a particular procedure on the cared-for; on the other hand, respecting without caring amounts to indifference or individualism when, for example, a person does not look after a vulnerable being properly. The initial hypothesis of this book, then, is that the concept of respectful care can be built up, working from an ethico-philosophical perspective, to be a leading notion capable of guiding our daily actions and bioethical practices.

**Law and Ethics for the Eye Care Professional E-Book** Barbara K. Pierscioneck,2008-05-15 This title is directed primarily towards health care professionals outside of the United States. All optometrists need to be able to show an appropriate professional attitude to patients and colleagues, and to display an awareness of the legal, ethical and commercial constraints within which optometry

operates, including legislation relating to the use and supply of ophthalmic drugs. This book will help you achieve those objectives. Each chapter contains many examples, both real and hypothetical cases, and exercises based on situations in which optometrists and eye care practitioners may find themselves during routine practice. A key focus is on developing both the knowledge and the skills of the student and practitioner to deal with these situations. Comprehensive, practical and illustrated with lively cartoons, *Ethics for the Eye Care Professional* will be the first port of call for both students and practitioners looking for a grounding in the ethical issues applying to practice. - Provides a strong, relevant and up-to-date grounding in ethics as it applies to eyecare practice - Helps give students the skills they need to tackle the ethical issues they will encounter within their professional life - Focussed on practical problem solving with many cases studies to help understanding - References recent events and real life histories and experiences - Designed to encourage the development of critical thinking and ethical skills - Authoritative text by a Professor of Optometry with qualifications in and knowledge of law and ethics - Lively and accessibly written, with cartoon illustrations throughout.

**Administration Ethics** Joseph Byrne, 2017-05-15 There are few industries in which decisions are so intently scrutinized by millions of Canadians as the healthcare industry. Each day important decisions concerning the funding and delivery of healthcare are made far from the patient's bed, in the offices of administrators and policy makers. These decisions can have considerable impact on the lives of patients and the practice of healthcare professionals. Whether you are a seasoned executive or an entry-level manager, *Administration Ethics* is intended to assist you in rendering effective and ethical decisions. Brimming with engaging examples, this text provides a practical guide to understanding the essential but often challenging areas of ethics theories, principles, codes, and rights, and insightfully illustrates how these concepts are integrated. *Administration Ethics* goes beyond academic debate and enters the daily practice of health administration. It examines the psychology of decision making, revealing how we sometimes make well-intentioned, but unethical decisions. Each chapter includes illustrative cases pertinent to the ethical management and policy decisions required of healthcare administrators. Featuring a new, user-friendly decision model and designed specifically with the Canadian healthcare system in mind, this volume will be an indispensable resource for both current and future healthcare administrators in Canada.

**Environmental Dilemmas** Robert Mugerauer, Lynne Manzo, 2008 *Environmental Dilemmas* focuses on the ethical problems and dilemmas that emerge in place-based professional practices\_ architecture, landscape architecture, planning, engineering, and construction management. Mugerauer and Manzo connect decision-making to major ethical theories, principles, and rules, and professional codes of ethics.

**Integrating Career Development and Mental Health in Counseling** Seth C. W. Hayden, 2025-03-06 The connection between career development and mental health has long been established within research as mutually impactful. Given this reality, there are significant implications for counselors working in various settings. Important societal movements focused

on increasing access and equity for those with intersectional identities of ethnicity, race, gender, sexual identity, and ableism are rooted in the transformational power of career and work. This speaks to the centrality of career development in the human experience. The recent events of the pandemic have magnified awareness of the impact of struggles with career and work on overall well-being. Given these considerations, counselors are tasked with providing comprehensive and holistic support that addresses co-occurring career and mental health concerns. Integrating Career Development and Mental Health Counseling focuses on counseling-centered approaches that integrate dimensions of career and mental health. Whether providing counseling in a community agency, K-12 school, private practice, college/university, or other institution, having the capability to address career concerns is essential to comprehensive counseling support. Relevant dimensions of career theory, research, and practice are included. Theoretically and empirically supported interventions that address co-occurring career and mental health concerns are also provided--

*Critically Impaired Infants and End of Life Decision Making* Neera Bhatia, 2015-06-05 Decisions to withdraw or withhold life-sustaining treatment are contentious, and offer difficult moral dilemmas to both medical practitioners and the judiciary. This issue is exacerbated when the patient is unable to exercise autonomy and is entirely dependent on the will of others. This book focuses on the legal and ethical complexities surrounding end of life decisions for critically impaired and extremely premature infants. Neera Bhatia explores decisions to withdraw or withhold life-sustaining treatment from critically impaired infants and addresses the controversial question, which lives are too expensive to treat? Bringing to bear such key issues as clinical guidance, public awareness, and resource allocation, the book provides a rational approach to end of life decision making, where decisions to withdraw or withhold treatment may trump other competing interests. The book will be of great interest and use to scholars and students of bioethics, medical law, and medical practitioners.

**Medical Ethics and Law** Dominic Wilkinson, Julian Savulescu, Tony Hope, Judith Hendrick, BA, LLM, 2008-03-06 This is a short textbook of ethics and law aimed primarily at medical students. The book is in two sections. The first considers general aspects of ethics (in the context of medicine); the second section covers the topics identified in the 'consensus agreement'. The content of medical law is not intended to be comprehensive and relates very much to the ethical issues. The law will be updated throughout including: consent in light of Mental Capacity Act; mental health law in light of Mental Health Act; end of life (depending on outcome of Burke case and the passage of the Joffe Bill); assisted reproduction in light of expected changes in HFEA. New guidelines to be added: the guidelines and processes around medical research are under review and likely to develop and change; GMC guidelines are under continual revision (the Burke case in particular may have direct impact, but it is also likely that the confidentiality guidelines will undergo revision particularly in view of the increasing importance of genetic data). The new legal aspects outlined above will require some changes to the ethical analysis: the ethical issues of new technology will be included (cloning; transgenesis and chimera, i.e. forming organisms from more than one species) and stem-cells; resource allocation ethics is moving on to examining a wider range of issues than covered in the first edition and this will be discussed; the whole area of mental disorder and capacity to consent is an active area of ethical research and the second edition would cover some of this new work.

**Law and Ethics in Nursing and Health Care** Judith Hendrick, 2000 Provides an overview of the British legal and ethical issues that nurses and other health professionals come across. Hendrick (Oxford Brookes U.) discusses the relationship between law and ethics and how at times they overlap or diverge. Chapters include case studies, theoretical discussion, possible outcomes, and a summary of how the legal and ethical approaches compare. They also examine the patient-client relationship (confidentiality, consent, responsibility and accountability) as well as the relationship between the law, codes of practice, and health care circulars.
