Vienna, 1814 David King,2008-03-11 “Reads like a novel. A fast-paced page-turner, it has everything: sex, wit, humor, and adventures. But it is an impressively researched and important story.” —David Fromkin, author of *Europe’s Last Summer* Vienna, 1814 is an evocative and brilliantly researched account of the most audacious and extravagant peace conference in modern European history. With the feared Napoleon Bonaparte presumably defeated and exiled to the small island of Elba, heads of some 216 states gathered in Vienna to begin piecing together the ruins of his toppled empire. Major questions loomed: What would be done with France? How were the newly liberated territories to be divided? What type of restitution would be offered to families of the deceased? But this unprecedented gathering of kings, dignitaries, and diplomatic leaders unfurled a seemingly endless stream of personal vendettas, long-simmering feuds, and romantic entanglements that threatened to undermine the crucial work at hand, even as their hard-fought policy decisions shaped the destiny of Europe and led to the longest sustained peace the continent would ever see. Beyond the diplomatic wrangling, however, the Congress of Vienna served as a backdrop for the most spectacular Vanity Fair of its time. Highlighted by such celebrated figures as the elegant but incredibly vain Prince Metternich of Austria, the unflappable and devious Prince Talleyrand of France, and the volatile Tsar Alexander of Russia, as well as appearances by Ludwig van Beethoven and Emilia Bigottini, the sheer star power of the Vienna congress outshone nearly everything else in the public eye. An early incarnation of the cult of celebrity, the congress devolved into a series of debauched parties that continually delayed the progress of peace, until word arrived that Napoleon had escaped, abruptly halting the revelry and shrouding the continent in panic once again. Vienna, 1814 beautifully illuminates the intricate social and political intrigue of this history-defining congress—a glorified party that seemingly valued frivolity over substance but nonetheless managed to drastically reconfigure Europe’s balance of power and usher in the modern age.

Rites of Peace: The Fall of Napoleon and the Congress of Vienna Adam Zamoyski,2012-11-29 Following on from his epic ‘1812: Napoleon's Fatal March on Moscow’, bestselling author Adam Zamoyski has written the dramatic story of the Congress of Vienna.

Fighting Terror after Napoleon Beatrice de Graaf,2020-10 Europe was forged out of the ashes of the Napoleonic wars by means of a collective fight against revolutionary terror. The Allied Council created a culture of in- and exclusion, of people

that were persecuted and those who were protected, using secret police, black lists, border controls and fortifications, and financed by European capital holders.

Asset Recovery Handbook Jean-Pierre Brun, Anastasia Sotiropoulou, Larissa Gray, Clive Scott, 2021-02-08 Developing countries lose billions each year through bribery, misappropriation of funds, and other corrupt practices. Much of the proceeds of this corruption find 'safe haven' in the world's financial centers. These criminal flows are a drain on social services and economic development programs, contributing to the impoverishment of the world's poorest countries. Many developing countries have already sought to recover stolen assets. A number of successful high-profile cases with creative international cooperation has demonstrated that asset recovery is possible. However, it is highly complex, involving coordination and collaboration with domestic agencies and ministries in multiple jurisdictions, as well as the capacity to trace and secure assets and pursue various legal options—whether criminal confiscation, non-conviction based confiscation, civil actions, or other alternatives. This process can be overwhelming for even the most experienced practitioners. It is exceptionally difficult for those working in the context of failed states, widespread corruption, or limited resources. With this in mind, the Stolen Asset Recovery (StAR) Initiative has developed and updated this Asset Recovery Handbook: A Guide for Practitioners to assist those grappling with the strategic, organizational, investigative, and legal challenges of recovering stolen assets. A practitioner-led project, the Handbook provides common approaches to recovering stolen assets located in foreign jurisdictions, identifies the challenges that practitioners are likely to encounter, and introduces good practices. It includes examples of tools that can be used by practitioners, such as sample intelligence reports, applications for court orders, and mutual legal assistance requests. StAR—the Stolen Asset Recovery Initiative—is a partnership between the World Bank Group and the United Nations Office on Drugs and Crime that supports international efforts to end safe havens for corrupt funds. StAR works with developing countries and financial centers to prevent the laundering of the proceeds of corruption and to facilitate more systematic and timely return of stolen assets.

Customary International Humanitarian Law Jean-Marie Henckaerts, Carolin Alvermann, Comité international de la Croix-Rouge, 2005-03-03 Customary International Humanitarian Law, Volume I: Rules is a comprehensive analysis of the customary rules of international humanitarian law applicable in international and non-international armed conflicts. In the absence of ratifications of important treaties in this area, this is clearly a publication of major importance, carried out at the express request of the international community. In so doing, this study identifies the common core of international humanitarian law

binding on all parties to all armed conflicts. Comment Don:RWI.

Sterile Insect Technique Victor A. Dyck, Jorge Hendrichs, A.S. Robinson, 2021-01-06 The sterile insect technique (SIT) is an environment-friendly method of pest control that integrates well into area-wide integrated pest management (AW-IPM) programmes. This book takes a generic, thematic, comprehensive, and global approach in describing the principles and

practice of the SIT. The strengths and weaknesses, and successes and failures, of the SIT are evaluated openly and fairly from a scientific perspective. The SIT is applicable to some major pests of plant-, animal-, and human-health importance, and criteria are provided to guide in the selection of pests appropriate for the SIT. In the second edition, all aspects of the SIT have been updated and the content considerably expanded. A great variety of subjects is covered, from the history of the SIT to improved prospects for its future application. The major chapters discuss the principles and technical components of applying sterile insects. The four main strategic options in using the SIT — suppression, containment, prevention, and eradication — with examples of each option are described in detail. Other chapters deal with supportive technologies, economic, environmental, and management considerations, and the socio-economic impact of AW-IPM programmes that integrate the SIT. In addition, this second edition includes six new chapters covering the latest developments in the technology: managing pathogens in insect mass-rearing, using symbionts and modern molecular technologies in support of the SIT, applying post-factory nutritional, hormonal, and semiochemical treatments, applying the SIT to eradicate outbreaks of invasive pests, and using the SIT against mosquito vectors of disease. This book will be useful reading for students in animal-, human-, and plant-health courses. The in-depth reviews of all aspects of the SIT and its integration into AW-IPM programmes, complete with extensive lists of scientific references, will be of great value to researchers, teachers, animal-, human-, and plant-health practitioners, and policy makers.

Thinking about Deterrence Air Univeristy Press,2014-09-01 With many scholars and analysts questioning the relevance of deterrence as a valid strategic concept, this volume moves beyond Cold War nuclear deterrence to show the many ways in which deterrence is applicable to contemporary security. It examines the possibility of applying deterrence theory and practice to space, to cyberspace, and against non-state actors. It also examines the role of nuclear deterrence in the twenty-first century and reaches surprising conclusions.

Global Study on Homicide 2013 United Nations,2014-06-15 The Global Study on Homicide 2013 is based on comprehensive data from more than 200 countries/territories, and examines and analyses patterns and trends in homicide at the global, regional, national and sub-national levels. Such analysis is fundamental to understanding the various factors and dynamics that drive homicide, so that measures can be developed to reduce violent crime. The Study provides a typology of homicide, including homicide related to crime, coexistence-related homicide, and socio-political homicide. The nature of crime in several countries emerging from conflict, the role of various mechanisms in killing, and the response of the criminal justice system to homicide are also analyzed. A further chapter examines homicide at the sub-national level, and includes analysis at the city-level for selected global cities.

The War Powers Resolution Congressional Research Service,2017-04-03 This report discusses and assesses the War Powers Resolution and its application since enactment in 1973, providing detailed background on various cases in which it was used, as well as cases in which issues of its applicability were raised. It will be revised biannually. In the post-Cold War world, Presidents have continued to commit U.S. Armed Forces into potential hostilities, sometimes without a specific authorization from Congress. Thus the War Powers Resolution and its purposes continue to be a potential subject of controversy. On June 7, 1995, the House defeated, by a vote of 217-201, an amendment to repeal the central features of the War Powers Resolution that have been deemed unconstitutional by every President since the law's enactment in 1973. In 1999, after the President committed U.S. military forces to action in Yugoslavia without congressional authorization, Representative Tom Campbell used expedited procedures under the Resolution to force a debate and votes on U.S. military action in Yugoslavia, and later sought, unsuccessfully, through a federal court suit to enforce presidential compliance with the terms of the War Powers Resolution. The War Powers Resolution P.L. 93-148 was passed over the veto of President Nixon on November 7, 1973, to provide procedures for Congress and the President to participate in decisions to send U.S. Armed Forces into hostilities. Section 4(a)(1) requires the President to report to Congress any introduction of U.S. forces into hostilities or imminent hostilities. When such a report is submitted, or is required to be submitted, Section 5(b) requires that the use of forces must be terminated within 60 to 90 days unless Congress authorizes such use or extends the time period. Section 3 requires that the President in every possible instance shall consult with Congress before introducing U.S. Armed Forces into hostilities or imminent hostilities. From 1975 through March 2017, Presidents have submitted 168 reports as the result of the War Powers Resolution, but only one, the 1975 Mayaguez seizure, cited Section 4(a)(1), which triggers the 60-day withdrawal requirement, and in this case the military action was completed and U.S. armed forces had disengaged from the area of conflict when the report was made. The reports submitted by the President since enactment of the War Powers Resolution cover a range of military activities, from embassy evacuations to full-scale combat military operations, such as the Persian Gulf conflict, and the 2003 war with Iraq, the intervention in Kosovo, and the anti-terrorism actions in Afghanistan. In some instances, U.S. Armed Forces have been used in hostile situations without formal reports to Congress under the War Powers Resolution. On one occasion, Congress exercised its authority to determine that the requirements of Section 4(a)(1) became operative on August 29, 1983, through passage of the Multinational Force in Lebanon Resolution (P.L. 98-119). In

1991 and 2002, Congress authorized, by law, the use of military force against Iraq. In several instances none of the President, Congress, or the courts has been willing to initiate the procedures of or enforce the directives in the War Powers Resolution.

Shaping Written Knowledge Charles Bazerman, 1988 The forms taken by scientific writing help to determine the very nature of science itself. In this closely reasoned study, Charles Bazerman views the changing forms of scientific writing as solutions to rhetorical problems faced by scientists arguing for their findings. Examining such works as the early Philosophical Transactions and Newton's optical writings as well as Physical Review, Bazerman views the changing forms of scientific writing as solutions to rhetorical problems faced by scientists. The rhetoric of science is, Bazerman demonstrates, an embedded part of scientific activity that interacts with other parts of scientific activity, including social structure and empirical experience. This book presents a comprehensive historical account of the rise and development of the genre, and views these forms in relation to empirical experience.
