From the bestselling author of *Blink* and *The Tipping Point*, Malcolm Gladwell's *Outliers: The Story of Success* overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. *Outliers* will change the way you think about your own life story, and about what makes us all unique. Inter-Dependent Teams: people working together to achieve a common goal. Extra-Dependent Teams: people learning together to develop a common practice. Extra-Dependent Teams: Realising the Power of Similarity reframes the conventional mental model of teams into two complementary mental models of Extra-Dependent and Inter-Dependent Teams. Both types of team operate inside organisations today, but convention doesn't realise their difference. Extra-Dependent Teams are present in organisations because of their similarity – they do similar work in similar ways, but don't actually work together. People who lead them often feel

like they are herding cats. Convention cites them as dysfunctional. But cats don't herd. They are independent whilst all being the same. Realising this difference provides new ways of understanding and addressing the problems that convention can't overcome. The reader will be introduced to the distinctness of Extra-Dependent Teams, their dynamics, how they perform, how they develop and how to lead them. Inspired by research on communities of practice and social identity, the book delivers an original and pragmatic approach to teams, being packed with examples, case studies, practical guidance and words of warning for managers and others about how to transform their Extra-Dependent Teams from peripheral problems into engines of innovation and growth.
