Schizophrenia Today is a collection of papers presenting conflicting viewpoints on schizophrenia and some focal subjects for future research. The book deals with the definition of schizophrenia and presents various advances in understanding the condition. The text surveys the problems of epidemiology and symptomatology in terms of the etiology and pathogenesis of schizophrenia. Several papers present the societal and cultural aspects of the problem on issues of clinical overview; international collaboration in schizophrenia research; and the societal determinants of schizophrenic behavior. Other papers then discuss the genetic and biochemical approaches in dealing with schizophrenia. One paper concludes that genetic factors play a significant role in the etiology of schizophrenia. The text also reviews the studies conducted by Rolf Gjessing, establishing that mood changes in mental state are related to changes in autonomic activity, metabolic rate, and nitrogen balance. The book also discusses the pharmacological and psychotherapeutic approaches in treating the problem. One paper deals with the personal experience of the writer in using psychoanalysis for treating schizophrenia. The collection will prove valuable for psychiatrists, psychologists, psychoanalysts, and students and researchers dealing with mental diseases.

A collection of introductory essays by an international range of expert contributors giving an insightful and accessible overview of classical and contemporary social theory.

This book aims to deconstruct ethnography to alert systems designers, and other stakeholders, to the issues presented by new approaches that move beyond the studies of 'work' and 'work practice' within the social sciences (in particular anthropology and sociology). The theoretical and methodological apparatus of the social sciences distort the social and cultural world as lived in and understood by ordinary members, whose common-sense understandings shape the actual milieu into which systems are placed and used. In *Deconstructing Ethnography* the authors show how 'new' calls are returning systems design to 'old' and problematic ways of understanding the social. They argue that systems design can be appropriately grounded in the social through the ordinary methods that members use to order their actions and interactions. This work is written for post-graduate students and researchers alike, as well as design practitioners who have an interest in bringing the social to bear on design in a systematic rather than a piecemeal way. This is not a 'how to' book, but instead elaborates the foundations upon which the social can be systematically built into the design of ubiquitous and interactive systems. This book is a classical theory text aimed at teaching theorizing as a skill. After analyzing the process of theorizing into a set of simple steps, it shows how the theories of Marx, Weber, Durkheim, and Mead were constructed following these steps. It links their theories with contemporary ones in the same research tradition and shows how these traditions exemplify fundamental paradigms that can guide the student's own theorizing.

For two years, Rubén Gaztambide-Fernández shared the life of what he calls the "Weston School," an elite New England boarding school. Vividly describing the pastoral landscape and graceful buildings, the rich variety of classes and activities, and the official and unofficial rules that define the school, *The Best of the Best* reveals a small world of deeply ambitious, intensely pressured students. For Gaztambide-Fernández, Weston is daunting yet strikingly bucolic, inspiring but frustratingly incurious, and sometimes - especially for young women - a gilded cage for a gilded age.

The importance of ethics in criminal justice -- Ethics and the police -- Racial discrimination in the criminal justice system -- Lawyers and ethics -- The purpose of criminal punishment -- Ethics in Corrections -- The ethics of criminal justice policy making -- Ethics and the "war on terrorism" -- Media ethics and criminal justice -- Duty and principle -- Considering the consequences -- The importance of character -- Egoism, pleasure and indifference -- A sense of justice -- Caring for others.

Using the United States and Australia as examples, Collins argues that the justification for separateness weakens both the military standing and the practice of civilian control of the military on top of leading to an overall decline in morality and values in a democratic society. Why do private boarding schools produce such a disproportionate number of leaders in business, government, and the arts? In the most comprehensive study of its kind to date, two sociologists describe the complex ways in which elite schools prepare students for success and power, and they also provide a lively behind-the-scenes look at prep-school life and underlife.

To what extent did people think they could identify an 'obvious' sodomite before the construction of the homosexual as a type of person during the latter part of the nineteenth century? What role did secrecy and denial play in relation to the visual expression of same-sex desire before the term 'the closet' came into widespread use in the latter part of the twentieth century? And what, therefore, did sodomites/homosexuals/gays/queers look like in Britain in 1700, 1800, 1900 and 2000? Could they be spotted mincing down the street? Or were such as these just the flamboyant few whose presence conveniently drew attention away from the many others who wanted to appear 'normal'? These issues are not peripheral to the struggle of the last several decades for individual self-determination and self-expression. It was this set of cultural constructions that the pioneering writer Eve Kosofsky Sedgwick (1950-2009) attacked in her book *Epistemology of the Closet* as representing 'the defining structure for gay oppression in this century'. This book represents a visual culture counterpart to Sedgwick's study and aims, through the use of a series of interdisciplinary case-studies, to explore both the pre-history of the closet since the eighteenth century and its evolution through to the present day. Chapters explore key moments and issues within the British cultural experience and make pioneering use of a wide range of source materials ranging from art to fashion, literature, philosophy, theology, film and archival records.

While Erving Goffman's books are among the most widely read sociological works, covering issues including the presentation of the self, total institutions, interaction order to frame analysis, they are in fact guided by a single theme: the analysis of the form of interaction in social situations and the role that individuals play in it. This book stresses Goffman's central role as a sociological theorist, exploring the potentials of his work and uncovering the recondite layers of his oeuvre. In opening a path to understanding the complexity of his writings, it offers new directions for social theory and empirical research.

What is a 'symbolic revolution'? What happens when a symbolic revolutions occurs, how can it succeed and prevail and why is it so difficult to understand? Using the exemplary case of Édouard Manet, Pierre Bourdieu began to ponder these questions as early as the 1980s, before making it the focus of his lectures in his last years at the Collège de France. This second volume of Bourdieu's previously unpublished lectures provides his most sustained contribution to the sociology of art and the analysis of cultural fields. It is also a major contribution to our understanding of impressionism and the works of Manet. Bourdieu treats the paintings of Manet as so many challenges to the conservative academicism of the pompier painters, the populism of the Realists, the commercial eclecticism of genre painting, and even the 'Impressionists', showing that such a revolution is inseparable from the conditions that allow fields of cultural production to emerge. At a time when the Academy was in crisis and when the increase in the number of painters challenged the role of the state in defining artistic value, the break that Manet inaugurated revolutionised the aesthetic order. The new vision of the world that emerged from this upheaval still shapes our categories of perception and judgement today - the very categories that we use everyday to understand the representations of the world and the world itself. This major work by one of the greatest sociologists of the last 50 years will be of great interest to students and scholars in sociology, art history and the social sciences and humanities generally. It will also appeal to a wide readership interested in art, in impressionism and in the works of Manet.

This practical and reassuring guide will ensure your students pass their exams with flying colours. *Ace Your Exam* establishes a clear, simple

framework for revision and helps students get to grips with what exams are all about. Part 1 begins by exploring institutional expectations and common anxieties and exam myths, before showing students how to tackle various types of exam, including essay-based exams, short-answer questions, multiple-choice questions, calculation-based exams and open book exams. Part 2 helps readers plot an effective revision strategy for an imminent exam and, equally important, a detailed strategy for optimal use of time and productive powers during the exam. Finally, Part 3 helps students put their plans into action. Ace Your Exam will be an essential companion to all students preparing for and taking exams.

"A pathbreaking book on an important subject which, surprisingly, has been paid little attention by social scientists. Zerubavel writes with both learning and lucidity. His book is a pleasure to read." -Peter Berger "Others have written about the structuring of time, but few so insightfully and compellingly as Zerubavel." -Neil J. Smelser "This is a jewel of a book, one of the most important contributions to cultural sociology in recent years. Professor Zerubavel's easy blend of history, religion, science, politics, and social values makes this a study a delightful voyage of unexpected discovery and new awareness. It hink the title has misled some people into thinking this is a book on music or something of the sort. All the more reason to rejoice at this reissue in paperback." -David S. Landes "Hidden Rhythms is an exciting study of a subject that has not yet gained the attention it deserves among sociologists and other social scientists . . . Zerubavel's book has the distinctive merit to discuss earlier approaches to the study of schedules and calendars and to add a series of extremely shrewd observations and calendars to add a series of extremely shrewd observations of his own on the sociology of time. His work seems indispensable for all those social scientists who have become conscious of the central position of the temporal dimension in the life of people and their society." -Lewis A. Coser "Eviatar Zerubavel's Hidden Rhythms is an original and highly imaginative analysis of the role time schedule plays in social life. Continuing the distinctive focus on social time Zerubavel develops in Patterns of Time in Hospital life, he provides in Hidden Rhythms more penetrating and profound analysis of the subtle and diverse significance of time in organizing our social relationships and lives. A joy to read." -Peter M. Blau

Everett C. Hughes had a great impact on the field of sociology as a whole and on an entire generation of sociologists. Some of Hughes' former students and colleagues honor him in this book. The essays address the main themes in his work over the years, and illustrate as well Hughes' impact on the contributors, many of whom are themselves senior figures in the field. The book as a whole provides a distinguished and representative sampling of a major stream of contemporary sociological thought. Each of the five main divisions in the book covers one aspect of Hughes' work. The first deals with the study of occupations and professions--a field in which Hughes was a leader. The second section deals with race relations and other situations in which peoples of differing cultures meet. Beginning with his own work in French Canada many years ago, Hughes interests spread, and the breadth of this interest is seen in chapters on India, Peru, and race relations in the United States. Problems of organizations--how they are put together and how they work--are contained in a third section. A fourth section reflects Hughes' interest in the impact of institutional experience on the people who participate in social institutions, and includes chapters on occupational socialization, status passage, and the use of drugs. A final section develops still another of Hughes' interests--social science method. Presenting some of the most important topics of contemporary theory and research, this book remains profitable reading for every member of the discipline. "Howard S. Becker" was professor of sociology at the University of California, Santa Barbara. "Blanche Geer" was professor of sociology at Northeastern University. "David Riesman" was a sociologist, attorney and educator most known for his work on American Higher Education. "Robert S. Weiss" is professor emeritus of sociology and senior fellow, Gerontology Institute at the John W. McCormack Graduate School of Policy Studies, University of Massachusetts-Boston. Total institutions are defined in this reader not as a separate class of social establishments that exercise complete or nearly complete control over their population, but rather as specific institutions which exhibit to an intense degree certain characteristics found in all institutions. The issue therefore is not which institutions are total and which are not, but rather how much totality does each of our institutions display? Representing an important new approach to problems of social control, this book concentrates on dynamics--how institutions change in the extent or nature of their totality over time and how they display totality in different ways--rather than the mere enumeration of common traits.

The Handbook of Global Media and Communication Policy offers insights into the boundaries of this field of study, assesses why it is important, who is affected, and with what political, economic, social and cultural consequences. Provides the most up to date and comprehensive collection of essays from top scholars in the field Includes contributions from western and eastern Europe, North and Central America, Africa and Asia Offers new conceptual frameworks and new methodologies for mapping the contours of emergent global media and communication policy Draws on theory and empirical research to offer multiple perspectives on the local, national, regional and global forums in which policy debate occurs

Decades after his death, the figure of Erving Goffman (1922–82) continues to fascinate. Perhaps the best-known sociologist of the second half of the twentieth century, Goffman was an unquestionably significant thinker whose reputation extended well beyond his parent discipline. A host of concepts irrevocably linked to Goffman's name – such as 'presentation of self', 'total institutions', 'stigma', 'impression management' and 'passing' – are now staples in a wide range of academic discourses and are slipping into common usage. Goffman's writings uncover a previously unnoticed pattern and order in the minutiae of everyday interaction. Readers are often shocked when they recognize themselves in his shrewd analyses of errors, awkwardness and common predicaments. Greg Smith's book traces the emergence of Goffman as a sociological virtuoso, and offers a compact guide both to his sociology and to the criticisms and debates it has stimulated.

Mobilities research is now centre stage in the social sciences with wide-ranging work that considers the politics underscoring the

movements of people and objects, critically examining a world that is ever on the move. At first glance, the words 'carceral' and 'mobilities' seem to sit uneasily together. This book challenges the assumption that carceral life is characterised by a lack of movement. Carceral Mobilities brings together contributions that speak to contemporary debates across carceral studies and mobilities research, offering fresh insights to both areas by identifying and unpicking the manifold mobilities that shape, and are shaped by, carceral regimes. It features four sections that move the reader through the varying typologies of motion underscoring carceral life: tension; circulation; distribution; and transition. Each mobilities-led section seeks to explore the politics encapsulated in specific regimes of carceral movement. With contributions from leading scholars, and a range of international examples, this book provides an authoritative voice on carceral mobilities from a variety of perspectives, including criminology, sociology, history, cultural theory, human geography, and urban planning. This book offers a first port of call for those examining spaces of detention, asylum, imprisonment, and containment, who are increasingly interested in questions of movement in relation to the management, control, and confinement of populations.

From Buffy the Vampire Slayer to the Marvel Cinematic Universe, Joss Whedon's work presents various representations of home spaces that give depth to his stories and storytelling. Through the spaceship in Firefly, a farmhouse in Avengers: Age of Ultron or Whedon's own house in Much Ado About Nothing, his work collectively offers audiences the opportunity to question the ways we relate to and inhabit homes. Focusing on his television series, films and comics, this collection of new essays explores the diversity of home spaces in Whedon's many 'verses, and the complexity these spaces afford the narratives, characters, objects and relationships within them.

In this ethnographic study of a secondary school in the UK, the author presents an incisive account of school life from the various points of view of the pupils, teachers and parents. He describes and analyses major areas of experience and methods of adapting to school for both the children and their teachers; school experience is shown to be widely varying from boredom, despair and humiliation, to gaiety, exultation and comradeship some of it officially and some of it unofficially sponsored. The description reveals a number of marked and interpenetrating divisions within schools: between teachers and pupils, parents and teachers, parents and children and between pupils themselves. These divisions are explored, analysed and related both to institutional factors and to factors outside the school. The study suggests how these factors influence pupil and teacher strategies, and hence how the details of school life relates to wider society.

Part of the SAGE Social Thinker series, this book serves as a concise and inviting introduction to the life and works of Erving Goffman, one of the most prominent social theorists in postwar sociology. Goffman's ideas continue to influence scholars in various fields and have also attracted many readers outside conventional academia. Goffman's overall research agenda was the exploration of what he termed the interaction order—that is, the micro social order that regulates the co-mingling of people in each other's immediate presence. He coined several new concepts (face-work, impression management, role distance, civil inattention, etc.) with which to grasp and understand the complexities and basic social restructuring of everyday life, many of which are now part of sociology's standard vocabulary.

This text presents students with recent and important research on criminal behavior. The field studies conducted by the contributing authors for all the articles in this anthology will provide the reader with a realistic portrayal of just what actual offenders say about crime and their participation in it. Having offenders' voices heard along with the researchers' analyses offers students a real-life view of what, how, and why various criminals behave the way they do. The readings explore a wide array of specific types of criminal behavior, covering the majority of types found in almost every standard criminology text. Each article has been selected for its ability to artfully portray the perspective of those offenders being studied and its readability for students.

Cognitive analytic therapy (CAT) is an established form of integrated psychotherapy, which has been applied in a variety of clinical settings to a diversity of disorders with promising outcomes. In Cognitive Analytic Therapy for Offenders, the authors describe the application of CAT to forensic settings, illustrating the use of this type of therapy with a range of offence types and clinical disorders. CAT is presented as a new form of forensic psychotherapy which can enhance the understanding, conceptualisation, treatment and management of offenders. The book offers a novel description of clinical practice and describes the innovative application of cognitive analytic therapy to forensic work in a variety of contexts and settings for numerous offence types and clinical disorders, including: CAT in the treatment of child sex offenders in secure forensic settings the use of CAT with women in secure settings CAT for parents within prisons CAT for borderline and psychopathic personality disorder CAT for a stalking offender community-based CAT with perpetrators of domestic violence CAT for homicide perpetrators (rage-type, serial sexual, dissociative homicides) the application of CAT for Court reporting and managing boundary violations. This book provides an account of a fresh, new approach to conceptualisation and treatment in forensic psychotherapy, and offers the first description of CAT presented in the form of a compilation of illustrations of practice. It will be essential reading for clinical psychologists and psychiatrists, occupational therapists, and anyone who works within services for offenders.

Social scientists' autobiographies can yield insight into personal commitments to research agendas and the very project of social science itself. But despite the long history of life writing, sociologists have tended to view the practice with skepticism. Canadian Sociologists in the First Person is the first book to survey the Canadian sociological imagination through personal recollections. Exploring the lives and experiences of twenty contributors from across the country, this book connects the unique and shared features of their careers to broad social dynamics while providing a guide to their own research and administrative contributions to their universities, their profession, and their broader society and communities. The contributors teach in different types of institutions, are prominent in the discipline and in their specializations, and represent significant and diverse intellectual currents, political perspectives, and life and career experiences. Aiming to start a broad conversation about what social science and the academic profession look like in Canada from an insider's perspective, Canadian Sociologists in the First Person offers invaluable lessons for younger scholars as they envision a diverse sociological imagination for the twenty-first century.

PARAGRAPHS AND ESSAYS WITH INTEGRATED READINGS is the higher-level companion to SENTENCES, PARAGRAPHS, AND BEYOND in the two-book Brandon series. Instruction in this text -- comprehensive, flexible, and relevant -- is predicated on the idea that reading and writing are linked and that good writing is the product of revision and rigorous editing. The hallmarks of the Brandons' books are tell-show-engage instruction, ample demonstrations of good professional and student writing, and an abundance of reading-based, high-interest general, cross-curricular, and career-related topics and prompts. The Encyclopedia of Social Theory is an indispensable reference source for anyone interested in the roots of contemporary social theory. It examines the global landscape of all the key theories and the theorists behind them, presenting them in the context needed to understand their strengths and weaknesses. Led by internationally renowned scholar George Ritzer, the Encyclopedia of Social Theory draws together a team of more than 200 international scholars covering the developments, achievements, and prospects of social theory from its inception in the 18th century to the present. Understanding that social theory can both explain and alter the social world, this two-volume set serves as not only a foundation for learning, but also an inspiration for creative and reflexive engagement with the rich range of ideas it contains.

The early modern period saw the proliferation of religious, public and charitable institutions and the emergence of new educational structures. By bringing together two areas of inquiry that have so far been seen as distinct, the study of institutions and that of the house and domesticity, this collection provides new insights into the domestic experience of men, women and children who lived in non-family arrangements, while also expanding and problematizing the notion of 'domestic interior'. Through specific case studies, contributors reassess the validity of the categories 'domestic' and 'institutional' and of the oppositions private/public, communal/individual, religious/profane applied to institutional spaces and objects. They consider how rituals, interior decorations, furnishings and images were transferred from the domestic to the institutional interior and vice versa, but also the creative ways in which the residents participated in the formation of their living settings. A variety of secular and religious institutions are considered: hospitals, asylums and orphanages, convents, colleges, public palaces of the ducal and papal court. The interest and novelty of this collection resides in both its subject matter and its interdisciplinary and Europe-wide dimension. The theme is addressed from the perspective of art history, architectural history, and social, gender and cultural history. Chapters deal with Italy, Britain, the Netherlands, Flanders and Portugal and with both Protestant and Catholic settings. The wide range of evidence employed by contributors includes sources - such as graffiti, lottery tickets or garland pictures - that have rarely if ever been considered by historians.

Security is a key topic of our time. But how do we understand it? Do law and religion take different views of it? In this fifth volume in the Law and Religion in Africa series, radicalisation, terrorism, blasphemy, hate speech, religious freedom and just war theories rub shoulders with issues of witchcraft, female genital mutilation/circumcision, child marriage, displaced communities and additional issues besides. This unique collection of topics is both challenging and inspiring, providing illumination in troubled times, and forming a sound foundation for future scholarship.

When considering the structures that drive the global diffusion of human rights norms, Brian Greenhill argues that we need to look beyond institutions that are explicitly committed to human rights and instead focus on the dense web of international government organizations (IGOs)-some big, some small; some focused on human rights; some not-that has arisen in the last two generations. While most of these organizations have no direct connection to human rights issues, their participation in broader IGO networks has important implications for the human rights practices of their member states. Featuring a rigorous empirical analysis, *Transmitting Rights* shows that countries tend to adopt similar human rights practices to those of their IGO partners, whether for better or worse. Greenhill argues that IGOs constitute a tightly-woven fabric of ties between states and that this network provides an important channel through which states can influence the behavior of others. Indeed, his analysis suggests that a policy of isolating "rogue" states is probably self-defeating given that this will reduce their exposure to some of the more positive IGO-based influences on their human rights. Greenhill's analysis of the role of IGOs in rights diffusion will not only increase our understanding of the international politics of human rights; it will also reshape how we think about the role of international institutions in world politics.

Power on the Inside is the first book to examine the historical development of prison gangs worldwide, from those that emerged inside mid-nineteenth-century Neapolitan prisons to the new generation of younger inmates challenging the status quo within gang subcultures today. Historian-criminologist Mitchel P. Roth examines prison gangs throughout the world, from the Americas, Oceania, and South Africa to Southeast Asia, Europe, and beyond. The book examines the many variables that influence the evolution of prison subcultures, from colonialism and population demographics to prison architecture and staff-prisoner relations. *Power on the Inside* features eighty historical and contemporary images and will inform professionals in the field as well as general readers who want to know more about the realities of prison gangs today.

Review: "Using as a study their own experience of pioneering computer-mediated communication in Alaska in the late 1970s and early 1980s, the authors conduct a 'nexus analysis' of those events and discourses. As email and audio/video

conferencing technologies expanded the possibilities for education and social interaction, the authors played an active role in shaping and analyzing their use. Looking back on that early formative period and assessing its impact on the present world, the authors evaluate moments of social importance in order to examine the linkages among social practices, Alaskan peoples, and technologies. They consider the power of communication media to cause and ramify change."--BOOK JACKET
