Claude Monet spent the last 43 years of his long life at Giverny creating the beautiful gardens: the most famous in France and one of the most visited in the world. Garden historian and designer Caroline Holmes explores Monet's twin passions -painting and plants - and looks at his intelligent approach to creating a personal paradise of lily ponds and kaleidoscopic colour. This beautiful book shows the artist as a consummate plantsman who composed his gardens with an Impressionist's care for colour and form, later to be reinterpreted into paintings of beautiful abstraction. Drawing upon Monet's own voice and those of his contemporaries and offering a wealth of horticultural detail, this book provides fascinating insight into his obsessional love of gardening and painting.

In 1863, civil war is raging in the United States. Victorine Meurent is posing nude, in

Paris, for paintings that will be heralded as the beginning of modern art: Manet's Olympia and Picnic on the Grass. However, Victorine's persistent desire is not to be a model but to be a painter herself. In order to live authentically, she finds the strength to flout the expectations of her parents, bourgeois society, and the dominant male artists (whom she knows personally) while never losing her capacity for affection, kindness, and loyalty. Possessing both the incisive mind of a critic and the intuitive and unconventional impulses of an artist, Victorine and her survival instincts are tested in 1870, when the Prussian army lays siege to Paris and rat becomes a culinary delicacy. Dr?ma Drudge's powerful first novel Victorine not only gives this determined and gifted artist back to us but also recreates an era of important transition into the modern world. Defining an artistic era or movement is often a difficult task, as one tries to group individualistic expressions and artwork under one broad brush. Such is the case with impressionism, which culls together the art of a multitude of painters in the mid-19th century, including Monet, Cézanne, Renoir, Degas, and van Gogh. Basically, impressionism involved the shedding of traditional painting methods. The subjects of art were taken from everyday life, as opposed to the pages of mythology and history. In

addition, each artist painted to express feelings of the moment instead of hewing to time-honoured standards. This description of impressionism, obviously, is quite broad and can apply to a wide array of styles. Nonetheless, it remains a very important school in the annals of art. Any current or budding art aficionado should become familiar with the impressionist movement and its impact on the art world. This book presents a sweeping study of this artistic period, from its origins to its manifestations in the works of some of art history's most revered painters. Following this overview is a substantial and selective bibliography, featuring access through author, title, and subject indexes. Jane Austen never goes out of style. "A real jewel of science history...brims with suspense and now-forgotten catastrophe and intrigue...Wadman's smooth prose calmly spins a surpassingly complicated story into a real tour de force."—The New York Times "Riveting . . . [The Vaccine Race] invites comparison with Rebecca Skloot's 2007 *The Immortal Life of Henrietta Lacks*."—Nature The epic and controversial story of a major breakthrough in cell biology that led to the conquest of rubella and other devastating diseases. Until the late 1960s, tens of thousands of American children suffered crippling birth defects if their mothers had been exposed to rubella, popularly known as German measles, while pregnant; there was no vaccine and little understanding of how the disease devastated fetuses. In June 1962, a young biologist in Philadelphia, using tissue

extracted from an aborted fetus from Sweden, produced safe, clean cells that allowed the creation of vaccines against rubella and other common childhood diseases. Two years later, in the midst of a devastating German measles epidemic, his colleague developed the vaccine that would one day wipe out homegrown rubella. The rubella vaccine and others made with those fetal cells have protected more than 150 million people in the United States, the vast majority of them preschoolers. The new cells and the method of making them also led to vaccines that have protected billions of people around the world from polio, rabies, chicken pox, measles, hepatitis A, shingles and adenovirus. Meredith Wadman's masterful account recovers not only the science of this urgent race, but also the political roadblocks that nearly stopped the scientists. She describes the terrible dilemmas of pregnant women exposed to German measles and recounts testing on infants, prisoners, orphans, and the intellectually disabled, which was common in the era. These events take place at the dawn of the battle over using human fetal tissue in research, during the arrival of big commerce in campus labs, and as huge changes take place in the laws and practices governing who "owns" research cells and the profits made from biological inventions. It is also the story of yet one more unrecognized woman whose cells have been used to save countless lives. With another frightening virus--measles--on the rise today, no medical story could have more human drama, impact, or urgency than *The Vaccine Race*.

One of the most influential painters of modern times, Claude Monet lived for half his life in the famous house at Giverny. It was after moving here in 1883 with his future second wife, Alice Hoschedézanne -- other regular guests included Rodin, Whistler, Maupassant, Valéry, and one of Monet's closest friends, the statesman Clemenceau. They came to dine in almost ritual form,

first visiting Monet's studio and the greenhouses, then having lunch at 11:30 (the time the family always dined, to enable Monet to make the most of the afternoon light). Tea would later be served under the lime trees or near the pond. Guests were never invited to dinner; because Monet went to bed very early in order to rise at dawn. All the guests were familiar with Monet's rigid timetable. The recipes collected in his cooking journals include dishes Monet had encountered in his travels or had come across in restaurants he frequented in Paris as well as recipes from friends, such as Cézanne's bouillabaisse and Millet's petits pains. For this book, the author Claire Joyes, wife of Madame Monet's great-grandson, has spent years selecting the Monets' favorite recipes and writing a wonderfully evocative introductory text. All of the recipes have been artfully prepared and brought back to life in Monet's own kitchen by master chef Joël Robuchon. Illustrated with sumptuous reproductions of Monet's paintings, spectacular original four-color photographs of Giverny, selected shots of finished dishes, and facsimile pages from the notebooks themselves, this book provides a fascinating and unique insight into the turn-of-the-century lifestyle of one of the world's most celebrated Impressionist painters.

From bestselling author Ross King, a brilliant portrait of the legendary artist and the story of his most memorable achievement. Claude Monet is perhaps the world's most beloved artist, and among all his creations, the paintings of the water lilies in his garden at Giverny are most famous. Monet intended the water lilies to provide "an asylum of peaceful meditation." Yet, as Ross King reveals in his magisterial chronicle of both artist and masterpiece, these beautiful

canvases belie the intense frustration Monet experienced in trying to capture the fugitive effects of light, water, and color. They also reflect the terrible personal torments Monet suffered in the last dozen years of his life. *Mad Enchantment* tells the full story behind the creation of the Water Lilies, as the horrors of World War I came ever closer to Paris and Giverny and a new generation of younger artists, led by Henri Matisse and Pablo Picasso, were challenging the achievements of Impressionism. By early 1914, French newspapers were reporting that Monet, by then seventy-three, had retired his brushes. He had lost his beloved wife, Alice, and his eldest son, Jean. His famously acute vision--what Paul Cezanne called "the most prodigious eye in the history of painting"--was threatened by cataracts. And yet, despite ill health, self-doubt, and advancing age, Monet began painting again on a more ambitious scale than ever before. Linking great artistic achievement to the personal and historical dramas unfolding around it, Ross King presents the most intimate and revealing portrait of an iconic figure in world culture.
