This is the first history of the British railway system  
written from a modern economic perspective. It uses  
counterfactual analysis to construct an alternative network  
to represent the most efficient alternative rail network  
that could have been constructed given what was known  
at the time - the first time this has been done.

Vols. for 1871-76, 1913-14 include an extra number, The  
Christmas bookseller, separately paged and not included in  
the consecutive numbering of the regular series.
