There's never been a better time to "be prepared." Matthew Stein's comprehensive primer on sustainable living skills—from food and water to shelter and energy to first-aid and crisis-management skills—prepares you to embark on the path toward sustainability. But unlike any other book, Stein not only shows you how to live "green" in seemingly stable times, but to live in the face of potential disasters, lasting days or years, coming in the form of social upheaval, economic meltdown, or environmental catastrophe. When Technology Fails covers the gamut. You'll learn how to start a fire and keep warm if you've been left temporarily homeless, as well as the basics of installing a renewable energy system for your home or business. You'll learn how to find and sterilize water in the face of utility failure, as well as practical information for dealing with water-quality issues even when the public tap water is still flowing. You'll learn alternative techniques for healing equally suited to an era of profit-driven malpractice as to situations of social calamity. Each chapter (a survey of the risks to the status quo; supplies and preparation for short- and long-term emergencies; emergency measures for survival; water; food; shelter; clothing; first aid, low-tech medicine, and healing; energy, heat, and power; metalworking; utensils and storage; low-tech chemistry; and engineering, machines, and materials) offers the same approach, describing skills for self-reliance in good times and bad. Fully revised and expanded—the first edition was written pre-9/11 and pre-Katrina, when few Americans took the risk of social disruption seriously—When Technology Fails ends on a positive, proactive note with a new chapter on "Making the Shift to Sustainability," which offers practical suggestions for changing our world on personal, community and global levels.

Why do serial killers gravitate towards certain kinds of occupation? Why do they pursue certain types of victim? How do they leave the radar and remain hidden? Through his wide knowledge of the topic honed at one of Britain's leading centres for criminological studies, Adam Lynes demonstrates how theory, practice, profiling and behaviour intertwine to identify the kind of people we should fear (and especially if we are vulnerable to predators). The book also looks at those personality-types most likely to become serial killers whilst hiding in plain sight. From Britain's serial killing studies centre of excellence. Looks in depth at eight of Britain's serial killer drivers, dealing with some of the most notorious crimes of modern times. A fresh and uniquely interesting perspective. Demonstrates the links between mobility, transience, recognisance, predatory behaviour and acting out murderous fantasies. From the text "It is apparent that driving as a form of occupational choice is a "popular" form of employment for British serial murderers. In an effort to determine why this may be, [the] case studies of eight British serial murderers [in the book] demonstrate just how such an occupation can impact upon these offenders' criminal behaviour... These findings may prove to be of benefit to scholars of serial murder, and to those who attempt to apprehend them."

Vol. 32 [no. 10] constitutes "Souvenir edition and year book for 1939."

Charting New York's four-hundred-year struggle with trash, an anthropologist who spent ten years with sanitation workers of all ranks reveals what it takes for the Department of Sanitation to manage Gotham's garbage.

SCP Foundation anomalies SCP-1000 through to SCP-1999, including containment procedures, auxiliary documents, experiment logs and interview transcripts. An encyclopedia of the unnatural. The Foundation Operating clandestine and worldwide, the Foundation operates beyond jurisdiction, empowered and entrusted by every major national government with the task of containing anomalous objects, entities, and phenomena. These anomalies pose a significant threat to global security by threatening either physical or psychological harm. The Foundation operates to maintain normalcy, so that the worldwide civilian population can live and go on with their daily lives without fear, mistrust, or doubt in their personal beliefs, and to maintain human independence from extraterrestrial, extradimensional, and other extranormal influence. Our mission is three-fold: Secure The Foundation secures anomalies with the goal of preventing them from falling into the hands of civilian or rival agencies, through extensive observation and surveillance and by acting to intercept such anomalies at the earliest opportunity. Contain The Foundation contains anomalies with the goal of preventing their influence or effects from spreading, by either relocating, concealing, or dismantling such anomalies or by suppressing or preventing public dissemination of knowledge thereof. Protect The Foundation protects humanity from the effects of such anomalies as well as the anomalies themselves until such time that they are either fully understood or new theories of science can be devised based on their properties and behavior.
