USA Today Bestseller From the #1 New York Times bestselling author of *The Residence* and *First Women*—also a New York Times bestseller—comes a poignant, news-making look at the lives of the five former presidents in the wake of their White House years, including the surprising friendships they have formed through shared perspective and empathy. After serving the highest office of American government, five men—Jimmy Carter, the late George H. W. Bush, Bill Clinton, George W. Bush, and Barack Obama—became members of the world's most exclusive fraternity. In *Team of Five*, Kate Andersen Brower goes beyond the White House to uncover what, exactly, comes after the presidency, offering a glimpse into the complex relationships of these five former presidents, and how each of these men views his place in a nation that has been upended by the Oval Office's current, norm-breaking occupant, President Donald Trump. With an empathetic yet critical eye and firsthand testimony from the Carters, Donald Trump, and the top aides, friends, and family members of the five former presidents, *Team of Five* takes us inside the exclusive world of these powerful men and their families, including the unlikely friendship between George W. Bush and Michelle Obama, the last private visits Bill Clinton and Barack Obama shared with George H.W. Bush, and the Obamas' flight to Palm Springs after Donald Trump's inauguration. Perhaps most timely, this insightful, illuminating book overflows with anecdotes about how the ex-presidents are working to combat President Trump's attempts to undo the achievements and hard work accomplished during their own terms. Perhaps most poignantly, *Team of Five* sheds light on the inherent loneliness and inevitable feelings of powerlessness and frustration that come with no longer being the most important person in the world, but a leader with only symbolic power. There are ways, though, that these men, and their wives, have become powerful political and cultural forces in American life, even as so-called "formers." *Team of Five* includes 16 pages of color photographs.

Where's the future of work headed and what does having a successful career look like today? How do I make a choice when I don't know what to choose? How do I stop networking and start "relationshiping"? Why do some people have great marriages while others have complete wrecks before they even make it to the highway? Am I seeing the other side of people's Instagram photos (you know, the side they're not exactly posting pictures of)? What are the Pivotal Plot Points of my story? Do I have anyone on my "Dream Team"? After his success with 101 Secrets for your Twenties and connecting with millions of twentysomethings around the world through speaking engagements and his blog AllGroanUp.com, Paul Angone captures the hilarious, freakishly-accurate assessment of life as a modern-day twentysomething (and thirtysomething) facing real Millennial problems, but now he's digging even deeper. Research Methodology A Handbook is designed as a short introduction to the subject. It is eminently practical in nature. Conceptual issues confusing the research scholar have been dealt with in a lucid manner. The authors believe that even in the social sciences the mechanical or quantitative dimension should precede the sociological dimension. Before the social scientist begins to deal with verbal categories such as role, status, institution, etc, he should be in a position to appreciate the mechanical dimension. Familiarity with the mechanical dimension makes it possible for the research scholar to appreciate the fact that even when the dimension is sociological, the elements of science such as validity and reproducibility come to the fore. The book is based on material published over the last hundred years and the authors believe that the social sciences where cause and effect can still be separated in experienced time have not moved much beyond where they were several years ago.
