A frequent use of scientific and technical methodologies has revolutionized various fields of education, and science education is not an exception. This book elaborates on various important aspects of science education, and comprehensively deals with its objectives and applications in the classroom programmes. The purpose of this book is to help the trainee teachers learn the nitty-gritty of science teaching, and instill in them the teaching skills and inquiry-based teaching methodologies, so that they can apply these skills practically. Divided into six units comprising 23 chapters, the book discusses step-by-step methodologies of teaching science and the ways and means of preparing the lesson plans. The chapter on Teaching aids provides useful tips on using teaching aids to make the teaching-learning process more interactive. The book is intended for the undergraduate students of Education and can also be used as a reference book for the Science teachers. **KEY FEATURES :** Defines the objectives of science teaching as per the National Curriculum Framework (NCF) 2005, and simultaneously provides an exposure to other latest policy perspectives. Provides up-to-date information on new evaluation system of CCE and grading for Class X introduced by the CBSE board in the year 2010. Guides the trainee-teachers in constructing practical Test Paper, Viva Questions and Multiple Choice Questions as per the latest CBSE guidelines.

Over the most recent couple of years, the importance of undergraduate technical education has grown amid a huge industrial revolution in our country. More refined and

recently discovered super-specific topics are being introduced instead of old ones while modifying the course curriculum. In the new course curriculum, more noteworthy accentuation is laid on the basic science subjects and, on the need, to develop in-depth knowledge about the fundamentals of any particular area of academic interest. Keeping all this in mind, and utilizing my long experience as a teacher in a technical college under a technical university, I have ventured to write this book titled, Engineering Chemistry Laboratory Manual. In this book, all experiments are explained as per the JNTU syllabus for the first-year students of B.Tech. These are supplemented with theoretical explanations followed by procedure description, tabulation, calculation, sample calculation, and finally a series of possible viva-voce questions and their answers relating to that experiment. This book will certainly help all B.Tech./B.E. students to do well in their viva voce while completing their experiments cum examinations. It will also serve as a textbook in Chemistry practical examinations for any student in the laboratory. I sincerely hope that this book will receive full appreciation from both students and teachers.

The CBSE has made certain changes in the assessment structure from the session 2019-20 onwards. In the new scheme of examination, CCE and term system has been replaced with the Internal Assessment & Single Annual Exam by CBSE itself. Single exam conducted by CBSE will carry 80 marks whereas 20 marks are left to the schools for internal assessment. CBSE has issued detailed guidelines on how the internal marks will be divided among different activities. From 2019 onwards, there will be internal choices in board examinations with increased internal options in the question paper. Considering this change, now a student has to prepare accordingly for board examinations. The new assessment format brought with it excitement as well as
