This book explores the many facets of black urban life from its genesis in the 18th century to the present time. With some historical background, the volume is primarily a contemporary critique, focusing on the major themes which have arisen and the challenges the confront African Americans as they create communities: political economy, religion and spirituality, health care, education, protest, and popular culture. The essays all examine the interplay between culture and politics, and the ways in which forms of cultural expression and political participation have changed over the past century to serve the needs of the black urban community. The collection closes with analysis of current struggles these communities face - joblessness, political discontent, frustrations with health care and urban schools - and the ways in which communities are responding to these challenges.

A completely updated and revised edition of a bestselling book that has helped tens of thousands of people learn how to network effectively, *Success Runs in Our Race* is more important than ever in this fluctuating economy. With scores of anecdotes taken from interviews with successful African Americans -- from Keith Clinkscales, founder and former CEO of Vanguard Media, to Oprah Winfrey -- Fraser shows how to network for information, for influence, and for resources. Readers will learn, among other things, how to cultivate valuable listening skills, which conferences blacks are most likely to attend when looking to build their business network, and how to effectively circulate a résumé. More than a guide for personal achievement, this is an information-packed bible of networking that also seeks to inspire a social movement and a rebirth of the "Underground Railroad," in which successful African Americans share the lessons of self-determination and empowerment with those still struggling to scale the ladder of success.

Forced to exist in a loveless marriage, Beatrice Warrington was powerless to stand up to her husband. So instead, she takes her anger and frustration out on those closest to her. After years of treating her loved ones horribly, she finds herself alienated, desperate and alone. Terrified, she reaches out to the only man who's capable of helping her out of the mess she's created. And she will soon discover he will help her in ways she never imagined. Charles Allen never expected the likes of Beatrice Warrington to land on his doorstep. For years he despised her because of her devious ways, so helping her was not an option. But a crazy thing happened. Against his better judgment, he agrees to come to her rescue. Little did he know, rescuing her would be the best thing to ever happen to him.

African American Fraternities and Sororities: The Legacy and the Vision explores the rich past and bright future of the nine Black Greek-Letter organizations that make up the National Pan-Hellenic Council. In the long tradition of African American benevolent and secret societies, intercollegiate African American fraternities and sororities have strong traditions of fostering brotherhood and sisterhood among their members, exerting considerable influence in the African American community, and being on the forefront of civic action, community service, and philanthropy. Dr. Martin Luther King Jr., Toni Morrison, Arthur Ashe, Carol Moseley Braun, Bill Cosby, Sarah Vaughan, George Washington Carver, Hattie McDaniel, and Bobby Rush are among the many trailblazing members of these organizations. The rolls of African American fraternities and sororities serve as a veritable who's who among African American leadership in the United States and abroad. *African American Fraternities and Sororities* places the history of these organizations in context, linking them to other movements and organizations that predated them and tying their history to one of the most important eras of United States history—the Civil Rights struggle. *African American Fraternities and Sororities* explores various cultural aspects of these organizations such as auxiliary groups, branding, calls, stepping, and the unique role of African American sororities. It also explores such contemporary issues as sexual aggression and alcohol use, college adjustment, and pledging, and provides a critique of Spike Lee's film *School Daze*, the only major motion picture to portray African American fraternities and sororities as a central theme. The year 2006 will mark the centennial anniversary of the intercollegiate African American fraternity and sorority movement. Yet, to date, little scholarly attention has been paid to these organizations and the men and women who founded and perpetuated them. *African American Fraternities and Sororities* reveals the vital social and political functions of these organizations and places them within the history of not only the African American community but the nation as a whole.

Few career opportunities were available to minority women in Appalachia in the first half of the 20th century. Nursing offered them a respected, relatively well paid profession and--as few physicians or hospitals would treat people of color--their work was important in challenging health care inequities in the region. Working in both modern surgical suites and tumble-down cabins, these women created unprecedented networks of care, managed nursing schools and built professional nursing organizations while navigating discrimination in the workplace. Focusing on the careers and contributions of dozens of African American and Eastern Band Cherokee registered nurses, this first comprehensive study of minority nurses in Appalachia documents the quality of health care for minorities in the region during the Jim Crow era. Racial segregation in health care and education and state and federal policies affecting health care for Native Americans are examined in depth.
