Federal and state legislative actions affect the number of programs available to help children and their families. In this book, the author, a professor of social welfare as well as an attorney, provides an overview of the child welfare and judicial systems, then examines the federal and state legislative and judicial foundations of modern child welfare practice; court decisions and their impact on the rights of birthparents, foster parents, and children; class action suits and their impact on child welfare; and the role of child welfare workers in the legal process. Appendices provide detailed instruction on conducting legal research and excerpts from a consent decree.

First published in 1998, this volume responds to child-prostitution being recognised as a major social problem in modern capitalist Taiwan. It is defined, both legally and socially, as a problem of 'sexual transactions involving children and juveniles', thus the issue of child maltreatment is submerged under other concerns. However, the main concern of this book is the protection of children from maltreatment, so related socio-legal measures will be examined by this parameter. During the social campaigns against child prostitution, structural problems such as police corruption, male sexual perversion, socio-economic inequality, and the maladjustment of aboriginal people in the modern Taiwanese society are subjugated to increasing criticism. Nevertheless, efforts to encounter any of them have had very limited accomplishment. This book intends to show that the functions of law in the prevention and treatment of the social problem of child prostitution cannot work as intended if those structural problems are not properly tackled. Suggestions are also made to address the need to reconceptualise the problem in the analytical framework of child maltreatment and to recommend the direction for reformation of policy and practice.

Drawing on a three-year multidisciplinary study of children of divorced parents, the authors, leading academics in their fields, present a much-needed guide to understanding the experience of children who are experiencing parental separation. This book provides an in-depth account of how children are actively involved in the process of divorce and how they shape that experience. The topics discussed include how children find out that their parents are separating; how children tell other people about what is happening to them and their family; how parent-child relationships change

after separation and ways in which children adapt and cope during and immediately after their parents' divorce. The authors show what children want and need to know as the process of divorce unfolds and how professionals can respond appropriately to help them to understand and adjust to their changing circumstances. *Divorcing Children* addresses the weaknesses of current legislation in family justice and suggests ways of improving the skills and knowledge of all professionals who work with children during this difficult period in children's lives.

Intestate Succession is the second volume in the *Comparative Succession Law* series which examines the principles of succession law from a comparative and historical perspective. This volume discusses the rules which apply where a person dies either without leaving a valid will, or leaving a will which fails to dispose of all of the person's assets. Among the questions considered are the following: What is the nature of the rules for the disposal of the deceased's assets? Are they mechanical or is there an element of discretion? Are particular types of property dealt with in particular ways? Is there entitlement to individual assets (as opposed to money)? Do the rules operate in a parentelic system or a system of some other kind? Are spouses treated more favourably than children? What provision is made for extra-marital children, for adopted children, for step-children? Does cohabitation give rise to entitlement? How are same-sex couples treated? Broader questions also arise of a historical and comparative nature. Where, for example, do the rules in intestate succession come from in particular legal systems? Have they been influenced by the rules in other countries? How are the rules explained and how are they justified? To what extent have they changed over time? What are the long-term trends? And finally, are the rules satisfactory, and is there pressure for their reform? As in the first volume, this book will focus on Europe and on countries which have been influenced by the European experience such as Australia, New Zealand, South Africa, the United States of America, Quebec, and the countries of Latin America. Further chapters are devoted to Islamic Law and Nordic law. Opening with a discussion on Roman law and concluding with an assessment of the overall development of the law in the countries surveyed, this book will provide a wider reflection on the nature and purpose of the law of intestate succession.

An invaluable resource for all social workers in practice with children and families, this book examines key issues such as child protection, family support, care planning, adoption and case preparation for court. With illustrative case studies throughout, the text is divided into two sections: " Part 1 explores the legal context of social work practice with children, examining how international human rights standards are absorbed within domestic law. " Part 2 explores the application of the law, policies and systems to individual case work, illustrating rights-based thinking in practice. Accessible to those without a background in law, the book highlights links between social work standards and legal values and rules. With promotion of the rights of children and families a measure of professional competence and legal obligation, the book helps readers satisfy social work standards and use their knowledge of the law to improve their practice. The book is vital reading for all levels of social work student, including those undertaking the post-qualifying award in child care, as well as being an indispensable resource for practitioners working with children and families. Jane Williams is a lecturer in law at the University of Swansea. She specialises in social work law, and children's rights. Other publications include *Children and Citizenship* (SAGE, 2007), co-edited with Antonella Invernizzi.

Reading Modern Law identifies and elaborates upon key critical methodologies for reading and writing about law in modernity. The force of law rests on determinate and localizable authorizations, as well as an expansive capacity to encompass what has not been pre-figured by an order of rules. The key question this dynamic of law raises is how legal forms might be deployed to confront and disrupt injustice. The urgency of this question must not eclipse the care its complexity demands. This book offers a critical methodology for addressing the many challenges thrown up by that question, whilst testifying to its complexity. The essays in this volume - engagements direct or oblique, with the work of Peter Fitzpatrick - chart a mode of resisting the proliferation of social scientific methods, as much as geo-political empire. The authors elaborate a critical and interdisciplinary treatment of law and modernity, and outline the pivotal role of sovereignty in contemporary formations of power, both national and international. From various overlapping vantage points, therefore, *Reading Modern Law* interrogates law's relationship to power, as well as its relationship to the critical work of reading and writing about law in modernity.

Exploring the rules that apply when a person dies without leaving a valid will, '*Intestate Succession*' delivers a comparative and historical review of the relevant law in Europe and beyond, including an analysis of legal development, justifications, and reform.

The book relates the normativity of law to law's internal sociality and shows the multi-layered nature of legal normativity. Deirdre Dwyer examines how a court can decide when to accept an expert's opinion, focusing on English civil justice. By exploring such diverse issues as the management of child abuse, legal reforms following sex abuse enquiries, moral explanations for the actions of child murderers, the impossible task faced by social workers and the limitations of children's rights campaigns, Michael King examines the revolutionary ideas of the social theorist, Niklas Luhmann. He demonstrates how Luhmann's theory of autopoietic systems compels readers to re-examine exactly what they mean by society. Questioning the relationship between personal morality and political will, it challenges the assumption that changing society is merely a matter of changing attitudes and highlights the pitfalls associated with formulating social reform.

This volume brings together some of the best journal articles of the last twenty years which deal with various aspects of

the relationship between parents and children. Adopting an inter-disciplinary and comparative approach, the book reproduces articles from a variety of journals in law and the social sciences. The book is divided into eight parts dealing, respectively, with becoming a parent; the status and obligations of parenthood; issues of upbringing; adolescence; child support; parental separation, divorce and children; child abuse and state intervention; social parenthood and adoption. The volume includes a substantial introduction by the editor.

Distinguished for lucid exposition and attractive style, these works in a short time became acknowledged authorities upon the subject with which they dealt.": *Dictionary of American Biography* III:454.

The Family in Law provides a jurisprudential analysis of current family law, connecting doctrinal discourse with sociological, historical and economic analyses of the institution of family. The law's focus on the nuclear family as the default model is central to the book's discourse, which contains in-depth discussions of the key areas of family law - marriage, divorce, children and property matters. Written for Australian legal actors - whether students, academics or professionals - readers are encouraged to question current frameworks, critique well-known cases and make informed conclusions on whether changes could be made to engender a fairer and more equitable society. In developing doctrinal analysis within a theoretical framework, *The Family in Law* challenges the conventional boundaries of family law, providing readers with both a solid foundation and a multi-layered perspective to their understanding of the topic.

Following the implementation of the Human Rights Act 1998, awareness has increased that we live in a rights-based culture and that children constitute an important group of rights holders. Now in its third edition, *Children's Rights and the Developing Law* explores the way developing law and policies in England and Wales are simultaneously promoting and undermining the rights of children. It reflects on how far these developments take account of children's interests, using current research on children's needs as a template against which to assess their effectiveness and considering a broad range of topics, including medical law, education and youth justice. A critical approach is maintained throughout, particularly when assessing the extent to which the concept of children's rights is being acknowledged by the courts and policy makers and the degree to which the UK fulfils its obligations under, for example, the UN Convention on the Rights of the Child. In recent years there has been a flourishing body of work on the Law of Treaties, crucial for all fields within international law. However, scholarship on modern treaty law falls into two distinct strands which have not previously been effectively synthesized. One concerns the investigation of concepts which are fundamental to or inherent in the law of treaties generally - such as consent, object and purpose, breach of obligation and provisional application - while the other focuses upon the application of treaties and of treaty law in particular substantive (e.g. human rights, international humanitarian law, investment protection, environmental regulation) or institutional contexts (including the Security Council, the World Health Organization, the International Labour Organization and the World Trade Organization). This volume represents the culmination of a series of collaborative explorations by leading experts into the operation, development and effectiveness of the modern law of treaties, as viewed through these contrasting perspectives.

The second edition of this comprehensive guide to family law, presents everything an undergraduate family law student needs in one volume. Drawing on their extensive experience, the authors offer a detailed and authoritative exposition of family law illustrated by materials carefully selected from a wide range of sources. The book has two principal aims: to provide readers with a thorough understanding of the law relating to the family, and to do so in a way that stimulates critical reflection on that law. Readers are encouraged to consider how and why the law has developed as it has, what policies it is seeking to pursue, whether it achieves the right balance between the rights and interests of individual family members and the wider public interest, and how it operates in practice. The text is supported by a substantial Online Resource Centre, which features regular updates on the law, supplementary materials, further reading suggestions, and study aids. The ORC also features two chapters, Introduction to Family Law, and Fundamental principles in the law relating to children.
