shapes of numbers 1 through 9. Dotted lines trace out these numeral shapes to help young readers find and recognize numbers, while charming rhyming text helps teach kids how to write numbers on their own. This important pre-math skill becomes a fun seek-and-find game, and the rhythmic, rhyming text is fun to read aloud. Your young reader will learn to love to count! A Poets.org 2021 Featured Fall Book for Young Readers Let's trace! Tracing is a form of dependent learning because there are broken lines for to need to be linked in order to form letters and numbers. When you trace, you are moving towards how each letter and number is written. Soon, you should begin to write without the need to trace. Are you interested to see how fast you can transition from dependent to independent writing? on an exciting journey through the entire ABC and all the numbers from 0 to 30 with: Letter And Number Tracing Book For Kids Ages 3-5: A Fun Practice Workbook To Learn The Alphabet And Numbers From 0 To 30 For Preschoolers And Kindergarten Kids! This exercise book introduces your child to writing letters and numbers in a playful and age-appropriate manner that will help him or her get to know the alphabet and the numbers 0 to 30. In this way, children are guided and optimally prepared for pre-school and primary school. The book is divided into sections: numbers and letters. The learning process is guided as follows: Letters Every letter is new territory for your child. The first step is to get to know the letter and practice through the correct pen guidance by simply tracing it. This is followed by a word containing the letter you have just learned. So your child learns to put the letter in a word. Encourage your child to read the word aloud to directly practice the corresponding sound. Finally, your child learns to write the letter freely and independently. Numbers To understand the meaning of numbers, your child starts counting picture elements. Then, just as with letters, he or she will have to trace the numbers. As soon as they become more confident, free writing follows the number you have just learned, with guidelines ensuring that the number is placed at the correct height. In both areas, learning takes place in a meaningful and reliable structure that gives your child security and constantly encourages them to see their own progress. Parents can help their children work through this exercise book and provide the necessary support. After all, writing is not easy for every child. Parents should keep a special eye on the correct pen position and hand guidance and celebrate every milestone with their child. For both numbers and letters, encourage your child to speak out loud about what he or she has learned. The more senses are involved in the learning process, the faster and easier it is to learn. By completing this

exercise book, your child will be able to write the lower and upper case letters from A to Z, as well as the numbers 0 to 30. It is especially important that your child can work and learn at their own pace. This is the only way to keep the fun and become more confident in writing from letter to letter, or from number to number. A quick look at the most important facts of the book: Suitable for children from ages 3 to 5 Sensible structure that optimally accompanies the learning process Great preparation for pre-school and kindergarten A fun way to learn the numbers from 0 to 30 and the letters A to Z Designed and sensibly structured to suit children Promotes correct pen management and concentration Lots of space for free practice Lovely designs Combine play with learning. recognize words on sight Form the foundation for sentences Accompanied with drawings to illustrate the word Level 3: Simple Sentences Application of handwriting and sight words to form sentences Further strengthens skills through practice and repetition Aids in grammar and sentence formation The variety of exercises in this handwriting practice book for kids are guaranteed to be helpful in building hand-eye coordination, dexterity and muscle memory and is great for kids of all ages from nursery, preschool, pre k, kindergarten and kids ages 3-5 and 5 -6. Handwriting has its place even in the midst of technology. A case study published in the US National Library of Medicine National Institute of Health states that letter tracing and handwriting has significant benefits over typing on electronic devices. The study tested the effect on brain engagement with traditional handwriting and typing on a tablet. The conclusion was that tracing and handwriting activates and engages both the left side of the brain which is responsible for language and logic and the motor cortex. Stimulation of these parts of the brain can provide benefits for the development of your child's brain and scholastic performance in the future.

Does your kid love Dinosaurs? Are you looking for a fun and complete workbook for your kid to learn numbers and letter handwriting? Many interesting studies show, when kids mindfully trace, they improve their visual spatial skills and their fine motor skills, which helps them later with both math and reading! Why handwriting is important? Even though many kids and adults use computers, tablets and phones at home, school and work, handwriting is still an essential life skill. For example, kids who can write smoothly are better able to use writing to record their thoughts and ideas. The book teaches stroke formation and provides a full practice page for
