Arguments for protection and against free trade have seen a revival in developed countries such as the United States and Great Britain as well as developing countries such as India. Given the clear benefits trade openness has brought everywhere, this is a surprising development. The benefits of free trade are especially great for emerging market economies. Free Trade and Prosperity offers the first full-scale defense of pro-free-trade policies with developing countries at its center. Arvind Panagariya, a professor at Columbia University and former top economic advisor to the government of India, supplies a historically informed analysis of many longstanding but flawed arguments for protection. He starts with an insightful overview of the positive case for free trade, and then closely examines the various contentions of protectionists. One protectionist argument is that "infant" industries need time to grow and become competitive, and thus should be sheltered. Other arguments are that emerging markets are especially prone to coordination failures, they are in need of diversification of their production structures, and they suffer from market imperfections. The panoply of protectionist arguments, including those for import substitution industrialization, fails when subject to close logical and empirical scrutiny. Free trade and outward-oriented policies are preconditions to both sustained rapid growth and poverty alleviation in developing countries. Panagariya provides compelling evidence demonstrating the failures of protectionism and the promise of free trade using detailed case studies of successful countries such as Singapore, Taiwan, South Korea, China and India. Low or declining barriers to free trade and high or rising shares of trade in total income have been key elements in the sustained rapid growth and poverty alleviation in these countries and many others. Free trade is like oxygen: the benefits are ubiquitous and not noticed until they are no longer there. This important book is an essential reminder of the costs of protectionism.

The Republic of China Yearbook is an important reference that offers a comprehensive overview of Taiwan and its people. Drawn from a broad range of reliable and official sources, the yearbook chronicles Taiwan's major social, political and economic developments from the previous year while also describing major elements of the government's policies.

A panoramic view of gay rights, gay life, and the gay experience around the world. In *Global Gay*, Frédéric Martel visits more than fifty countries and documents a revolution underway around the world: the globalization of LGBT rights. From Saudi Arabia to South Africa, from Amsterdam to Tel Aviv, from Singapore to the United States, activists, culture warriors, and ordinary people are part of a movement. Martel interviews the proprietor of a "gay-friendly" café in Amman, Jordan; a Cuban-American television journalist in Fort Lauderdale, Florida; a South African jurist who worked with Nelson Mandela to enshrine gay rights in the country's constitution; an American lawyer who worked on the campaign for marriage equality; an Egyptian man who fled his country after escaping a raid on a gay club; and many others. He tells us that in China, homosexuality is neither prohibited nor permitted, and that much Chinese gay life takes place on social media; that in Iran, because of the strict separation of the sexes, it seems almost easier to be gay than heterosexual; and that Raul Castro's daughter, a gay rights icon in Cuba, expressed her lingering anti-American sentiments by calling for Pride celebrations in May rather than June. Ten countries maintain the death penalty for homosexuals. "Homophobia is what Arab governments give to Islamists to keep them calm," one activist tells Martel. Martel finds that although the "gay American way of life" has created a global template for gay activism and culture, each country offers distinctly local variations. And around the world, the status of gay rights has become a measure of a country's democracy and modernity. This English edition, which has been thoroughly revised and updated, has received the French Voices Award for excellence in publication and translation, supported by a grant from the French-American Book Fund.

The first textbook to present world history via social history, drawing on social science methods and research. This interdisciplinary, comprehensive, and comparative textbook is authored by distinguished scholars and experienced teachers, and offers expert scholarship on global history that is ideal for undergraduate students. Volume 2 takes us from the early modern period to speculation about the world in 2050, visiting diverse civilizations, nation-states, ecologies, and people along the journey through time and place. The book pays particular attention to the ways in which ordinary people lived through the great changes of their times, and how everyday experience connects to great political events and the commercial exchanges of an interconnected world. With 75 maps, 65 illustrations, timelines, boxes, and primary source extracts, the book enables students to use historical material and social science methodologies to analyze the events of the past, present, and future.

A GRIPPING, FEARLESS EXPLORATION OF MASCULINITY The effects of traditionally defined masculinity have become one of the most prevalent social issues of our time. In this engaging and provocative new book, beloved actor, director, and social activist Justin Baldoni reflects on his own struggles with masculinity. With insight and honesty, he explores a range of difficult, sometimes uncomfortable topics including strength and vulnerability, relationships and marriage, body image, sex and sexuality, racial justice, gender equality, and fatherhood. Writing from experience, Justin invites us to move beyond the scripts we've learned since childhood and the roles we are expected to play. He challenges men to be brave enough to be vulnerable, to be strong enough to be sensitive, to be confident enough to listen. Encouraging men to dig deep within themselves, Justin helps us reimagine what it means to be man enough and in the process what it means to be human.

The acquisition of Mandarin Chinese, one of the most important and widely spoken languages in the world today, is the focus of this innovative study. It describes the rise of Chinese as a global language and the many challenges and opportunities associated with learning it. The collaborative, multiple-case study and cross-case analysis is presented from three distinct but complementary theoretical and analytic perspectives: linguistic, sociocultural, and narrative. The book reveals fascinating dimensions of Chinese language learning based on vivid first-person accounts (with autobiographical narratives included in the book) of adults negotiating not only their own and others' language and literacy learning, but also their identities, communities, and trajectories as users of Chinese.

A RECOMMENDED BOOK FROM: Bon Appetit * The New York Times Book Review * Epicurious * Plate * Saveur * Grub Street * Wired * The Spruce Eats * Conde Nast Traveler * Food & Wine * Heated For the last 100 years, Nom Wah Tea Parlor has been slinging some of the world's greatest dim sum from New York's Chinatown. Now owner Wilson Tang tells the story of how the restaurant came to be—and how to prepare their legendary dishes in your own home. Nom Wah Tea Parlor isn't simply the story of dumplings, though there are many folds to it. It isn't the story of bao, though there is much filling. It's not just the story of dim sum, although there are scores and scores of recipes. It's the story of a community of Chinese immigrants who struggled, flourished, cooked, and ate with abandon in New York City. (Who now struggle, flourish, cook, and eat with abandon in New York City.) It's a journey that begins in Toishan, runs through Hong Kong, and ends up tucked into the corner of a street once called The Bloody Angle. In this book, Nom Wah's owner, Wilson Tang, takes us into the hardworking kitchen of Nom Wah and emerges with 75 easy-to-make recipes: from bao to vegetables, noodles to desserts, cakes, rice rolls, chef's specials, dumplings, and more. We're also introduced to characters like Mei Lum, the fifth-generation owner of porcelain shop Wing on Wo, and Joanne Kwong, the lawyer-turned-owner of Pearl River Mart. He paints a portrait of what Chinatown in New York City is in 2020. As Wilson, who quit a job in finance to take over the once-ailing family business, struggles with the dilemma of immigrant children—to jettison

tradition or to cling to it—he also points to a new way: to savor tradition while moving forward. A book for har gow lovers and rice roll junkies, *The Nom Wah Cookbook* portrays a culture at a crossroads.

Industrial policy is tainted with bad reputation among policymakers and academics and is often viewed as the road to perdition for developing economies. Yet the success of the Asian Miracles with industrial policy stands as an uncomfortable story that many ignore or claim it cannot be replicated. Using a theory and empirical evidence, we argue that one can learn more from miracles than failures. We suggest three key principles behind their success: (i) the support of domestic producers in sophisticated industries, beyond the initial comparative advantage; (ii) export orientation; and (iii) the pursuit of fierce competition with strict accountability.

Emphasizing global interconnectedness, Volume 2 of this undergraduate history textbook covers the early modern period through to modern times.

The standard mode of transportation for decades in Europe, motor scooter was a cult "fun" vehicle in the USA until the past two years. With oil prices soaring and the 20-to-40 set looking for alternative means of commuter (and weekend cruising) travel, motor scooter have exploded across the United States. In 2001, less than 30,000 scooters cruised U.S. roadways. In 2005, over 100,000 are road-bound, and the number is growing by double digits each year. Beginning at \$1,000 and ranging up over \$5,000, dozens of models of scooters are available, as are thousands of accessories. And scooter clubs meet from San Diego to Bangor, Maine. Every year, the largest gathering of motor scooters takes place in Indianapolis, speed capital of the world. *The Complete Idiot's Guide to Motor Scooters* is the perfect introduction to the wonderful world of motor scooting.

This casebook demonstrates that the future of global business lies in how well the multinational landscape is charted and how the importance of Asian market leaders is deeply embedded in it. It offers international management students and researchers an extensive guide to the business history, strategy development, and foreign market entry modes used by emerging Asian multinationals. The cases focus on well-known companies such as Lenovo, Alibaba, Infosys, Huawei, Panasonic, and Rakuten. These companies, all of which generate huge revenues in their own countries (e.g. in China, India, South Korea, Taiwan, Vietnam), are now becoming increasingly sophisticated and striving to become global brands, while also enjoying the active support of their governments in terms of their international business. Readers will learn about the current multinational landscape in Asia, the management challenges, and the future implications for traditional western companies seeking to retain their market share. Chapters on corporate entrepreneurship, human resource management and intercultural competence, and current branding trends in Asia will provide a cutting-edge update on international business strategy for students and practitioners alike.

This monograph reviews the efficacy of economic statecraft vis-à-vis North Korea, with a particular focus on the use of sanctions and inducements on the part of the United States in seeking to achieve nonproliferation and wider foreign policy objectives. Two structural constraints operate: North Korea's particularly repressive state, with a narrowing governing coalition; and the country's changing economic relations. As an empirical matter, there is little evidence that sanctions had effect, or did so only in conjunction with inducements. However, inducements did not yield significant results either, in part because of severe credibility and sequencing problems in the negotiations.

A fresh new look for this modern classic by the Newbery-Award winning and bestselling author of *Where the Mountain Meets the Moon* Pacy is back! The beloved heroine of *The Year of the Dog* and *The Year of the Rat* has returned in a brand new story. This summer, Pacy's family is going to Taiwan for an entire month to visit family and prepare for their grandmother's 60th birthday celebration. Pacy's parents have signed her up for a Chinese painting class, and at first she's excited. This is a new way to explore her art talent! But everything about the trip is harder than she thought it would be--she looks like everyone else but can't speak the language, she has trouble following the art teacher's instructions, and it's difficult to make friends in her class. At least the dumplings are delicious... As the month passes by, Pacy eats chicken feet (by accident!), gets blessed by a fortune teller, searches for her true identity, and grows closer to those who matter most.

In *Wealth, Poverty, and Politics*, Thomas Sowell, one of the foremost conservative public intellectuals in this country, argues that political and ideological struggles have led to dangerous confusion about income inequality in America. Pundits and politically motivated economists trumpet ambiguous statistics and sensational theories while ignoring the true determinant of income inequality: the production of wealth. We cannot properly understand inequality if we focus exclusively on the distribution of wealth and ignore wealth production factors such as geography, demography, and culture. Sowell contends that liberals have a particular interest in misreading the data and chastises them for using income inequality as an argument for the welfare state. Refuting Thomas Piketty, Paul Krugman, and others on the left, Sowell draws on accurate empirical data to show that the inequality is not nearly as extreme or sensational as we have been led to believe. Transcending partisanship through a careful examination of data, *Wealth, Poverty, and Politics* reveals the truth about the most explosive political issue of our time.

An award-winning professor of economics at MIT and a Harvard University political scientist and economist evaluate the reasons that some nations are poor while others succeed, outlining provocative perspectives that support theories about the importance of institutions.

The exceptional experiences of South Korea and Taiwan in combining high growth and liberal democracy in a relatively short and similar timetable have brought scholarly attention to their economic and political transformations. This new work looks specifically at the operation of workers and unions in the decades since labor-repressive authoritarian rule ended, bringing Taiwan, in particular, into the literature on comparative labor politics. South Korean labor unions are commonly described as militant and confrontational, for they often take to the streets in raucous protest. Taiwanese unions are seen as moderate and practical, primarily working through formal political processes to lobby their agendas. In exploring how and why these post-democratization states have come to breed such different types of labor politics, Yoonkyung Lee traces the roots of their differences to how unions and political parties operated under authoritarianism, and points to ways in which those legacies continue to be perpetuated. By pairing two cases with many similarities, Lee persuasively uncovers factors that explain the significant variation at play.

A history of the Chinese experience in WWII, named a Book of the Year by both the Economist and the Financial Times: "Superb" (The New York Times Book Review). In 1937, two years before Hitler invaded Poland, Chinese troops clashed with Japanese occupiers in the first battle of World War II. Joining with the United States, the Soviet Union, and Great Britain, China became the fourth great ally in a devastating struggle for its very survival. In this book, prize-winning historian Rana Mitter unfurls China's drama of invasion, resistance, slaughter, and political intrigue as never before. Based on groundbreaking research, this gripping narrative focuses on a handful of unforgettable characters, including Chiang Kai-shek, Mao Zedong, and Chiang's American chief of staff, "Vinegar Joe" Stilwell—and also recounts the sacrifice and resilience of everyday Chinese people through the horrors of bombings, famines, and the infamous Rape of Nanking. More than any other twentieth-century event, World War II was crucial in shaping China's worldview, making *Forgotten Ally* both a definitive work of history and an indispensable guide to today's China and its relationship with the West.
