Triumph Bonneville: 60 Years is a celebration one of motorcycling's most iconic and beloved bikes. First manufactured in Great Britain in 1959, Triumph's legendary model resonates deeply with motorcycle enthusiasts worldwide who love its style, sound, performance, and undeniable coolness. It's no surprise that Triumph was Steve McQueen's favorite ride. The Bonneville's story is one of successes and challenges as Triumph grew steadily in the post-World War II decades to become America's most successful "import" motorcycle marque. Triumph won every championship worth winning, owned the world speed record for fifteen years, and wooed Hollywood's hottest stars. Bonneville was Triumph's halo machine, one of the highest performance motorcycles of the 1960s. However, as competing marques eventually eclipsed the Bonneville in the 1970s, Triumph management struggled, leading first to bankruptcy and then to the demise of the company in 1983. Triumph was resurrected by British industrialist John Bloor in the late 1990s to become a twenty-first century global success story, which includes a revived and thoroughly retro-contemporary Bonneville range.

The Complete Book of BMW Motorcycles offers a thorough year-by-year guide to every production machine ever built by Germany's leading motorcycle manufacturer. From the first model, the 1923 R32 that launched BMW's motorcycle dynasty, to the latest (and fastest) superbike, the S1000RR, this book captures nearly a century of motorcycling excellence in a combination of historic and contemporary photos.

Technical specs are provided for each model. This comprehensive review covers all of BMW's bike families: The side-valve machines from the early years The early overhead-valve performance bikes The modern Airheads and Oilheads The four-cylinder and six-cylinder touring bikes The early pushrod singles The modern overhead-cam singles The latest parallel twins, and inline-four cylinder sport bikes Among them, you'll find all the classic bikes—pre-World War II BMWs like the R5 that defined performance in that era; the military R12 that carried the Wehrmacht as it blitzkrieged its way across Europe; the Earles-forked R69S that offered the perfect platform for mounting a Steib sidecar; the R90S café racer; the K1 “flying brick”; and the GS (Gelände Sport) series that launched a dual-sport revolution right up to today's world-class S100RR and retro-inspired R nine T. Like the other titles in Motorbooks' Complete Book series, this guide to BMW's motorcycle output offers the most complete reference to the subject available.

[...] it didn't matter, because one word, "sure" in the context of motorcycle ownership, gave Pete permission to buy one. All he had to do now was earn the money. [...] When Ms. Strickland answered the door she looked at the stoop and noticed that it had been shoveled. Since they were both holding shovels, the first thing she said in a rhetorical tone was "Did you guys do that? Thank you!" Before they could get a word out, she continued with "I guess you are here to shovel my drive! Or did you do that too and now you want your money?" Without missing a beat, Mel replied, "Yup! Twenty bucks!" In a scolding almost frantic tone she replied with, "Well I'm not paying. I have the lawn service under contract. Not very smart business boys. You can't just ask people to pay for a service they didn't request!" Pete just stood there in shock when Mel said, "OK, we'll put it back." She paused for a moment with a look of horror on her face until she realized Mel was joking and started laughing. She said "I'm sorry boys, but I'm already committed." Mel replied, "That's OK, we understand." As they were walking toward the next house, they heard Ms. Strickland's door open and she started yelling, "Boys!? Boys!? Wait!" Mel and Pete exchanged glances wondering what now? "Come back! I changed my mind! You can shovel my drive!" Pete jokingly said to Mel, "It looks like we're both gonna make \$20 on this drive since our price just doubled!"

Looks at chopper customized motorcycles, examining their history, and the different customizations that characterize them. In the year 2003, Lady Luck reached out to a hard-living, hard-working family in a small town in Orange County, New York. That was when a team from the Discovery Channel began filming the custom chopper shop of Paul "Senior" Teutul, his son Paulie, and the rest of their highly dysfunctional, totally authentic crew as they did what they do best: make great custom-crafted bikes from the ground up. Within a few episodes, the Teutuls were famous: for their hilarious head-butting, their outrageous yelling, their amazing designs, and, most of all, for being real every step of the way. With their hit show American Chopper turning into the Discovery Channel's top-rated program, the Teutuls became unlikely national icons. Now the Teutuls tell their story as it has never been told before. Senior chronicles his harrowing journey from a hell-raising teen to a star-crossed businessman desperately trying to keep his demons at bay. And Paulie remembers working by his father's side in their ironworks shop-and the bond that developed between them when they first built an EVO-powered custom chopper from scratch. From youngest son Mikey's entrance into the shop to all the other members of the extended OCC family, this is a chronicle of Panheads and Softails turned into gleaming works of art, of Old School design versus Paulie's amazing theme bikes that took custom biking by storm-and earned the Teutuls some of the most famous clients in the world. With over 60 family archive photos that capture this true rags-to-riches saga, ORANGE COUNTY CHOPPERS is the raw, honest story of a family that was born to be wild, how they came together around a shared passion and skill-and how they captured the heart of America.

The Complete Idiot's Guide to Motorcycles, Fourth Edition, is the most complete book on motorcycles, covering everything from how to choose and maintain a motorcycle and how to buy appropriate gear, to how to ride safely, and how to make the most out of trips on the open road.

This book presents a step-by-step guide to building a West Coast Chopper's C.F.L. kit. Kit choppers are hot commodities. While few people can afford to buy a custom-built chopper from one of the high-end builders like Jesse James-bikes that often sell for \$100,000 or more-many can afford to buy such bikes in kit form. Because of this, all the high-end builders sell their creations in kit form. For example, while Jesse James might build perhaps a dozen custom bikes per year, he sells hundreds of chopper kits. The same is true of any number of other builders like Matt Hotch, Cyril Huze, and Paul Yaffe. Authored by Mike Seate and featuring the photography of Joe Appel, this book is a step-by-step how-to guide for anyone building a kit chopper.

"If you ask men if they spend any time hiding, they usually look at you as if you're nuts. 'What, me hide?' But if you ask women whether men hide, they immediately know what you mean."—from *Where Men Hide* *Where Men Hide* is a spirited tour of the dark and often dirty places men go to find comfort, camaraderie, relaxation, and escape. Ken Ross's striking photographs and James Twitchell's lively analysis trace the evolution of these virtual caves, and question why they are rapidly disappearing. Ross

documents both traditional and contemporary male haunts, such as bars, barbershops, lodges, pool halls, strip clubs, garages, deer camps, megachurches, the basement Barcalounger, and Twitchell examines their provenance, purpose, and appeal. He finds that for centuries men have met with each other in underground lairs and clubhouses to conduct business or, in the case of strip clubs and the modern rec room, to bond and indulge in shady entertainments. In these secret dens, certain rules are abandoned while others are obeyed. However, Twitchell sees this less as exclusionary behavior and more as the result of social anxiety: when women want to get together, they just do it; when men get together, it's a production. Drawing on literary, historical, and pop cultural sources, Twitchell connects the places men hide with figures like Hemingway and Huck Finn, Frederick Jackson Turner's theory of the American frontier, and the mythological interpretations of Joseph Campbell and Robert Bly. Instead of blaming the disappearance of the man-cave solely on feminism, simple fair play, or the demands of Title IX, Twitchell believes this evaporation is due as well to the rise of solitary pursuits such as driving, watching television, and playing videogames. By blending together anecdote, research, and keen observation, Ross and Twitchell bring this little-discussed and controversial phenomenon to light. Gabriel's Horn presents a collection of new poetry in classical forms and styles, this year focusing on nature.

Before choppers, there was the bobber. When American-brand motorcycle owners needed to change their rear tires decades ago, the rear fender featured a hinge near its center that would flip up to make room for the tire to be removed. At some point, an enterprising rider decided to permanently remove the hinged rear portion of the fender - shortening the fender like the "bobbed" hair cuts popular during those days - or so the theory goes. The tradition of stripping down to a bike's bare essence and celebrating its simpler forms - making a bobber - was begun. As these lean, mean machines come roaring back onto the scene in a big way, this book offers a look at where the bobber came from, where it's going, and what it's about. With over 200 exclusive photographs of the most cutting-edge bobbers, biographies of the men and women who build them, and inside stories on top shops like Indian Larry, Von Dutch Kustoms, Orange County Choppers, Arlen Ness, Mitch Bergeron, and more. This book captures the rebel spirit of the ultimate custom bike as never before. Publisher's Note: This edition includes a poster on the reverse of the book's jacket.
