This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

Together with his colleagues at Citroën, Andre Lefebvre created the Traction Avant (1934), the TUB (1939) – Citroën's first front wheel drive utility van that was succeeded by the H and HY vans (1947) – the Deux Chevaux (1948), and, last but not least, the DS (1955). From 1923 to 1931 Lefebvre also designed several highly original and outstanding competition cars and record-breaking automobiles for Voisin. He even drove some these cars in races and record attempts. It is obvious that during his 16 years with Gabriel Voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer. The experience gained during that period gave him the self-confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed; first he convinced André Citroën, later Pierre Michelin, then Pierre-Jules Boulanger, and finally Robert Puiseux and Pierre Bercot. His oeuvre for Citroën alone earns him a place of honour among the great automobile designers of the past century. The fact that most present-day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators. That is why it is amazing that so little is known about this fascinating and brilliant engineer. This book was written in order to remedy that, and to pay tribute to André Lefebvre: the passionate pioneer who left car enthusiasts around the world such an important heritage.

Fritz Morgenthaler was a crucial figure in the return of psychoanalysis to post-Nazi Central Europe. An inspiring clinician and teacher to the New Left generation of 1968, he was the first European psychoanalyst since Freud to declare that homosexuality is not, indeed never, a pathology, and in *Technik*, developed revolutionary ideas for transforming clinical technique. *On the Dialectics of Psychoanalytic Practice* offers the first publication in English of this psychoanalytic, counterculture classic. Those who first picked up *Technik* encountered it at a historical moment when Marxist psychoanalyst Wilhelm Reich, popular New Left cultural critic Klaus Theweleit, and the texts of the Frankfurt School were already required reading. While not a political text in the same direct way, Morgenthaler's *Technik* nonetheless shared many of their preoccupations and conclusions about human nature. It was read as technical guidance for psychoanalysts, but also as a manifesto dedicated to the problem of how it might be possible genuinely to live a postfascist, and nonfascist, existence. Morgenthaler was a protorelationist who recombined the traditions of ego and self psychology as he retained a commitment to drive theory. Here Dagmar Herzog makes his work available to a new generation of analysts, providing essential source material, annotations, and groundbreaking analysis of the continued importance of the work for historians and therapeutic practitioners alike. *On the Dialectics of Psychoanalytic Practice* will interest practicing clinicians as well as intellectual historians and cultural studies scholars seeking to understand the return of psychoanalysis to post-Nazi Central Europe.
