Provides extensive information on state-of the art diesel fuel injection technology.

The first edition of Percorsi quickly became one of the best-selling elementary Italian texts. The new second edition features a new design, more focus on skills-development, updated cultural information and a full version of MyItalianLab. Percorsi is an introductory program that promotes the acquisition of Italian language and culture through the integration of the "5 Cs" principles of the National Standards for Foreign Language Education. Percorsi is designed to provide beginning learners with a variety of tools to develop their communicative competence in the four major language skills—listening, speaking, reading, and writing—as they acquire familiarity with Italian culture. All of the features in Percorsi have been carefully thought out to support the two key aspects of the language acquisition process: language comprehension and language production. From the start, carefully structured communicative activities based on authentic materials and texts encourage students to use Italian in everyday situations. Generous use of authentic content also offers students a chance to develop reading skills while gaining cultural awareness and understanding of Italian communities and traditions throughout the world. In addition, each chapter explicitly promotes cultural exploration through illustrated presentations that are followed by activities facilitating comprehension and highlighting cultural comparisons. Students are encouraged to analyze and compare extremely varied aspects of Italian culture while making connections to their own experiences. MyItalianLab will be available for Fall 2011 courses.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

The all-color practical Build Your Own Sports Car provides all the information needed to build a road-going two-seater, open-top sports car on a budget, using standard tools, basic skills and low-cost materials. The down-to-earth text clearly explains each step along the road to producing a well-engineered, high-performance sports car, providing a learning experience in engineering and design - and opening up a whole new world of fun motoring. The Haynes Roadster, which has fully independent rear suspension, has been designed with the aid of CAD software to develop the chassis and suspension, resulting in a car with performance and handling to challenge many established kit cars and mainstream sports cars. The design is intended to make use of components sourced primarily from a Ford Sierra donor, although alternative donors are mentioned.

These photographs form part of a project to document the area between Manchester and Oldham, England in 1984-1986.

For the Vampire community, the Solstice Choosing has been the holiest night of the year - for a hundred thousand years. But this year, something new is about to happen. The oldest prophecies are about to be fulfilled - and the Festival of Blessings is finally upon us.

Presents a selection of the author's poems from throughout his life, from playful early poems to themes of mourning and loss.

"Siblings Bob and Tom get a dog with spots. This A-level story uses decodable text to raise confidence in early readers. The book uses a combination of sight words and short-vowel words in repetition to build recognition. Original illustrations help guide readers through the text."--

'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

When one thinks of the Mille Miglia, the most celebrated race in the world that took place between 1927 and 1957, the mind certainly goes back to OM, Bugatti, Mercedes-Benz, Porsche, Lancia as well, of course, as the ultra-victorious Alfa Romeo and Ferrari, the greatest car manufacturers that have competed in the Italian marathon. But the memorable history of the great race is made up mainly of men: drivers, co-drivers, mechanics, technical and sports directors, organisers as well as film and show business personalities plus, naturally, an immense public following. All of those faces have names, some well-known others less so, and stories, some well worth telling others less so. The book brings together a series of portraits in alphabetical order that make up the fragments of this historic sports and cultural mosaic that was the Mille Miglia, once again told by Leonardo Acerbi from his deep knowledge of the Brescia-based race.

This collection brings together some of the most influential sociologists of law to confront the challenges of current transnational constitutionalism. It shows the constitution appearing in a new light: no longer as an essential factor of unity and stabilisation but as a potential defence of pluralism and innovation. The first part of the book is devoted to the

analysis of the concept of constitution, highlighting the elements that can contribute from a socio-legal perspective, to clarifying the principle meanings attributed to the constitution. The study goes on to analyse some concrete aspects of the functioning of constitutions in contemporary society. In applying Luhmann's General Systems Theory to a comparative analysis of the concept of constitution, the work contributes to a better understanding of this traditional concept in both its institutionalised and functional aspects. Defining the constitution's contents and functions both at the conceptual level and by taking empirical issues of particular comparative interest into account, this study will be of importance to scholars and students of sociology of law, sociology of politics and comparative public law.
