Construction Mathematics is an introductory level mathematics text, written specifically for students of construction and related disciplines. Learn by tackling exercises based on real-life construction maths. Examples include: costing calculations, labour costs, cost of materials and setting out of building components. Suitable for beginners and easy to follow throughout. Learn the essential basic theory along with the practical necessities. The second edition of this popular textbook is fully updated to match new curricula, and expanded to include even more learning exercises. End of chapter exercises cover a range of theoretical as well as practical problems commonly found in construction practice, and three detailed assignments based on practical tasks give students the opportunity to apply all the knowledge they have gained. Construction Mathematics addresses all the mathematical requirements of Level 2 construction NVQs from City & Guilds/CITB and Edexcel courses, including the BTEC First Diploma in Construction. Additional coverage of the core unit Mathematics in Construction and the Built Environment from BTEC National Construction, Civil Engineering and Building Services courses makes this an essential revision aid for students who do not have Level 2 mathematics experience before commencing their BTEC National studies. This is also the ideal primer for any reader who wishes to refresh their mathematics knowledge before going into a construction HNC or BSc.

Addressing the Professional Standards for Teachers and Trainers, this bestselling textbook helpfully balances theory and practice, introducing key theories and concepts relating to learning and assessment as well as providing practical advice on teaching. Extensively revised and updated to reflect the current educational policy environment, this textbook for teaching provides thorough and extensive coverage of the topics for higher-level awards in Education and Training. The textbook provides a logical progression through the essential aspects of teaching, such as planning and assessment; it considers key related areas including teacher professionalism, equality and diversity, and mentoring and coaching; and it presents this invaluable guidance in an accessible and readable format. In outlining the challenges, opportunities, and debates in and around lifelong learning, the editors and contributing authors draw on their extensive teaching experience, as well as offering an evidence-based approach with a wide range of research. Teaching in Lifelong Learning: A Guide to Theory and Practice is core reading for those teaching or preparing to teach in further, higher and community education as well as in public sector contexts and in private training organisations, including those studying for CertEd/PGCE and related awards, such as the Level 4 Certificate and Level 5 Diploma in Education and Training. 'Teacher education in FE continues to be an important and unresolved issue, and this book is a great asset in supporting individuals in understanding and developing their practices. With a focus on developing critical, inquiring practitioners, the text reads like an experienced mentor sharing pointers, questions, and useful readings over a collegial cup of coffee'. Dr Tim Herrick, Senior University Teacher, University of Sheffield, UK

The CEFR Companion volume broadens the scope of language education. It reflects academic and societal developments since the publication of the Common European Framework of Reference for Languages (CEFR) and updates the 2001 version. It owes much to the contributions of members of the language teaching profession across Europe and beyond. This volume contains: ? an explanation of the key aspects of the CEFR for teaching and learning; ? a complete set of updated CEFR descriptors that replaces the 2001 set with: - modality-inclusive and gender-neutral descriptors; - added detail on listening and reading; - a new Pre-A1 level, plus enriched description at A1 and C levels; - a replacement scale for phonological competence; - new scales for mediation, online interaction and plurilingual/pluricultural competence; - new scales for sign language competence; ? a short report on the four-year development, validation and consultation processes. The CEFR Companion volume represents another step in a process of engagement with language education that has been pursued by the Council of Europe since 1971 and which seeks to: ? promote and support the learning and teaching of modern languages; ? enhance intercultural dialogue, and thus mutual understanding, social cohesion and democracy; ? protect linguistic and cultural diversity in Europe; and ? promote the right to quality education for all.

This book introduces students of education to the elements of educational psychology. It also relates as closely as possible the findings of research to classroom practice. In order to make clear the fundamental processes involved in psychological development, the book starts with a study of the way in which the young child adapts its behaviour to its environment. This study considers some of the key aspects of physical development, mainly the central nervous system. At the same time the way physical growth and psychological development are influenced by the experience of the individual is also discussed. This discussion of development is followed by an examination of the processes of learning, with particular attention paid to the works of Piaget. The salient points of each chapter are brought together in a summary which may be used by the reader to obtain a preliminary overview of the content of the chapter, and as an aid to revision. When first published this book was one of the first collections of empirical research in the area of the knowledge transmitted in schools and the responses of students to it. It includes studies of the histories of particular school subjects and of how the knowledge they embody is presented in the classroom. Attention is also given to the effects of gender stereotypes among teachers and pupils, both on pupils' selection of courses to study and on their reactions to particular subjects in the classroom. The other major topic in this collection is the way external examinations shape the nature of the school curriculum and how it is taught. There are studies of how pupils and teachers adapt to the exam system, and of how that system and its role in the accountability of schools, have changed in recent years. The articles collected here throw into relief important aspects of what is taught in schools, and they do this on the basis of a solid foundation of empirical research.

Brickwork is a form of masonry that utilises bricks and mortar. Rows of bricks—or, 'courses'—are placed on top of each other in order to create a structure such as a wall. This is volume I of William Frost's "The Modern Bricklayer", a detailed guide to all aspects of bricklaying, including slating, tiling, planning, materials, tools, and more. Contents include: "House Drains", "Egg-Shaped and Circular Sewers", "Sand Courses", "Retaining Walls", "Reinforced Brickwork", "Arches", "Cornices", "Gauged Brickwork: Introduction", "Gauged Work—Various Forms of Arches", "Gauges Work—Arches", "Gauged Work: Nitches, Panels, and Mouldings", "Terra-cotta and Glazed Ware", etc. Many vintage books such as this are becoming increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in a modern, high-quality edition complete with a specially-commissioned new introduction on DIY.

Skills development in Ghana encompasses foundational skills, transferable/soft-skills, and technical and vocational skills. This report focuses on one segment of this skills development system: formal and informal technical and vocational education and training (TVET) at the pre-tertiary level. TVET represents a major intersection between education, youth and the labor market. The government has long promised to the population that increasing technical and vocational skills training opportunities will help solve youth unemployment. However, market distortions and inefficiencies have led to an adverse cycle of high costs, inadequate quality of supply and low demand, leading to further pressures on the effectiveness and efficiency of TVET services. This adverse cycle means that the political and policy promise of skills development helping to ease the unemployment problem is at risk of remaining unfulfilled. The report focuses on social and economic demand for (pre-tertiary) technical and vocational skills and maps out the supply of these skills from formal and informal, private and public sectors. The dual purpose has been to both carry out an institutional and policy analysis and also to establish a platform for monitoring sector performance and assisting policy and Development Partner harmonization. The report analyzes the economic and social demand for technical and vocational skills and the suitability of the current supply as well as the effectiveness of policy, coordination and financing of technical and vocational skills development. The report annex provides the summary of economic demand analyses from the key sectors reviewed and provides a full mapping of all technical and vocational programs in Ghana. The study offers a comprehensive set of policy recommendations for improving Ghana's pre-tertiary technical and vocational skills development sector, which will be of interest to

policy makers and development partners in Ghana.

This text is designed to cover the core technology and alternative specialist options of the CGLI 585 advanced craft syllabus. Includes chapters on key aspects of second language assessment such as test construct, diagnosis, exam design, and the growing range of public policy, social and ethical issues. Each of the contributors is an expert in their area; some are established names while others are talented newcomers to the field. The chapters present new research or perspectives on traditional concerns such as test quality; fairness and bias; the testing of different language skills; the needs of different groups of examinees, including English language learners who need to take content tests in English; and the use of language assessments for gate-keeping purposes. The volume demonstrates how language assessment is informed by and engages with neighbouring areas of applied linguistics such as technology and language corpora. The book represents the best of current practice in second language assessment and, as a one volume reference, will be invaluable to students and researchers looking for material that extends their understanding of the field.

This popular guide clarifies the requirements for inspection and testing, explaining in clear language those parts of the IET Wiring Regulations that most need simplifying.
