LPWAN Technologies for IoT and M2M Applications Bharat S Chaudhari,Marco Zennaro,2020-03-19 Low power wide area network (LPWAN) is a promising solution for long range and low power Internet of Things (IoT) and machine to machine (M2M) communication applications. The LPWANs are resource-constrained networks and have critical requirements for long battery life, extended coverage, high scalability, and low device and deployment costs. There are several design and deployment challenges such as media access control, spectrum management, link optimization and adaptability, energy harvesting, duty cycle restrictions, coexistence and interference, interoperability and heterogeneity, security and privacy, and others.LPWAN Technologies for IoT and M2M Applications is intended to provide a one-stop solution for study of LPWAN technologies as it covers a broad range of topics and multidisciplinary aspects of LPWAN and IoT. Primarily, the book focuses on design requirements and constraints, channel access, spectrum management, coexistence and interference issues, energy efficiency, technology candidates, use cases of different applications in smart city, healthcare, and transportation systems, security issues, hardware/software platforms, challenges, and future directions.

Fools of Fortune William Trevor,2006-04-25 Penguin Classics is proud to welcome William Trevor—Ireland's answer to Chekhov (The Boston Globe) and one of the best writers of our era (The Washington Post)—to our distinguished list of literary masters. In this award-winning novel, an informer's body is found on the estate of a wealthy Irish family shortly after the First World War, and an appalling cycle of revenge is set in motion. Led by a zealous sergeant, the Black and Tans set fire to the family home, and only young Willie and his mother escape alive. Fatherless, Willie grows into manhood while his alcoholic mother's bitter resentment festers. And though he finds love, Willie is unable to leave the terrible injuries of the past behind. <u>Bloomsbury 35</u> Various Authors,2022-05-26 In 1984, a time when the publishing landscape was becoming increasingly corporate, Nigel Newton decided to start a new independent literary publishing company. The following year, over early mornings and late nights, he and publisher David Reynolds came up with their plan. In 1986 Bloomsbury Publishing began its life in a small office above a Chinese restaurant in Putney. For all its early ambition, no-one could have envisaged the 35 years that would follow. As the offices shifted first to Soho Square and then to Bedford Square, with branches opening in New York, Sydney, Oxford and New Delhi, its list took shape. There were to be books from all over the world, some becoming Nobel, Booker and Women's Prize winners, some to be million copy bestsellers, and some to become modern classics. In Bloomsbury 35 its editors-in-chief Liz Calder and Alexandra Pringle have made selections from novels they have published on Bloomsbury's adult list, from each year of Bloomsbury's life, forming an anthology that represents the creative heart of Bloomsbury. This anthology does not draw works from Bloomsbury's equally sparkling children's, academic or special interest lists. Featuring work from Margaret Atwood, Susanna Clarke, Jeffrey Eugenides, Richard Ford, Abdulrazak Gurnah, Khaled Hosseini, Jhumpa Lahiri, Colum McCann, Madeline Miller, Michael Ondaatje, Caryl Phillips, George Saunders, Will Self, Kamila Shamsie, Ahdaf Soueif, Jeanette Winterson, and many more, it is a celebration of Bloomsbury's first 35 years

Fog Data Analytics for IoT Applications Sudeep Tanwar,2020-08-25 This book discusses the unique nature and complexity of fog data analytics (FDA) and develops a comprehensive taxonomy abstracted into a process model. The exponential increase in sensors and smart gadgets (collectively referred as smart devices or Internet of things (IoT) devices) has generated significant amount of heterogeneous and multimodal data, known as big data. To deal with this big data, we require efficient and effective solutions, such as data mining, data analytics and reduction to be deployed at the edge of fog

devices on a cloud. Current research and development efforts generally focus on big data analytics and overlook the difficulty of facilitating fog data analytics (FDA). This book presents a model that addresses various research challenges, such as accessibility, scalability, fog nodes communication, nodal collaboration, heterogeneity, reliability, and quality of service (QoS) requirements, and includes case studies demonstrating its implementation. Focusing on FDA in IoT and requirements related to Industry 4.0, it also covers all aspects required to manage the complexity of FDA for IoT applications and also develops a comprehensive taxonomy.

Multimedia Big Data Computing for IoT Applications Sudeep Tanwar,Sudhanshu Tyagi,Neeraj Kumar,2019-07-17 This book considers all aspects of managing the complexity of Multimedia Big Data Computing (MMBD) for IoT applications and develops a comprehensive taxonomy. It also discusses a process model that addresses a number of research challenges associated with MMBD, such as scalability, accessibility, reliability, heterogeneity, and Quality of Service (QoS) requirements, presenting case studies to demonstrate its application. Further, the book examines the layered architecture of MMBD computing and compares the life cycle of both big data and MMBD. Written by leading experts, it also includes numerous solved examples, technical descriptions, scenarios, procedures, and algorithms.

Internet of Things (IoT) BK Tripathy,J Anuradha,2017-10-10 The term IoT, which was first proposed by Kevin Ashton, a British technologist, in 1999 has the potential to impact everything from new product opportunities to shop floor optimization to factory worker efficiency gains, that will power top-line and bottom-line gains. As IoT technology is being put to diversified use, the current technology needs to be improved to enhance privacy and built secure devices by adopting a security-focused approach, reducing the amount of data collected, increasing transparency and providing consumers with a choice to opt out. Therefore, the current volume has been compiled, in an effort to draw the various issues in IoT, challenges faced and existing solutions so far. Key Points: • Provides an overview of basic concepts and technologies of IoT with communication

technologies ranging from 4G to 5G and its architecture. • Discusses recent security and privacy studies and social behavior of human beings over IoT. • Covers the issues related to sensors, business model, principles, paradigms, green IoT and solutions to handle relevant challenges. • Presents the readers with practical ideas of using IoT, how it deals with human dynamics, the ecosystem, the social objects and their relation. • Deals with the challenges involved in surpassing diversified architecture, protocol, communications, integrity and security.

Building Wireless Sensor Networks Smain Femmam,2017-09-26 Building Wireless Sensor Networks: Application to Routing and Data Diffusion discusses challenges involved in securing routing in wireless sensor networks with new hybrid topologies. An analysis of the security of real time data diffusion—a protocol for routing in wireless sensor networks—is provided, along with various possible attacks and possible countermeasures. Different applications are introduced, and new topologies are developed. Topics include audio video bridging (AVB) switched Ethernet, which uses the representation of a network of wireless sensors by a grayscale image to construct routing protocols, thereby minimizing energy consumption and data sharing in vehicular ad-hoc networks. Existing wireless networks aim to provide communication services between vehicles by enabling the vehicular networks to support wide range applications. New topologies are proposed first, based on the graphiton models, then the wireless sensor networks (WSN) based on the IEEE 802.15.4 standard (ZigBee sensors, and finally the Pancake graphs as an alternative to the Hypercube for interconnecting processors in parallel computer networks. - Presents an analysis and protocol for routing in wireless sensor networks - Presents ways to prevent attacks against this protocol - Introduces different applications - Develops new topologies
