strategy, with real-world examples that illustrate how mergers work and how to take advantage of them. Author Thomas Kirchner, founder of the Pennsylvania Avenue Event-Driven Fund, discusses the factors that drove him to invest solely in merger arbitrage and other event-driven strategies, and details the methods used to incorporate merger arbitrage into traditional investment strategies. And while there is always a risk that a deal will fall through, the book explains how minimal such risks really are when the potential upside is factored in. Early chapters of the book focus on the basics of the merger arbitrage strategy, including an examination of mergers and the incorporation of risk into the arbitrage decision. Following chapters detail deal structures, financing, and legal aspects to provide the type of in-depth knowledge required to execute an effective investment strategy. The updated second edition stresses new, increasingly relevant information like: Worldwide legal deal regimes UK takeover code UK takeover code global offspring Regulators around the world The book provides clear, concise guidance on critical considerations including leverage and options, shorting stocks, and legal recourse for inadequate merger consideration, allowing readers to feel confident about trying a new investment strategy. In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures,

policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

The true story of Lois Jenson, a petite single mother, who was among the first women hired by a northern Minnesota iron mine in 1975. In this brutal workplace, female miners were relentlessly threatened with pornographic graffiti, denigrating language, stalking, and physical assaults. Terrified of losing their jobs, the women kept their problems largely to themselves—until Lois, devastated by the abuse, found the courage to file a complaint against the company in 1984. Despite all of the obstacles the legal system threw at them, Lois and her fellow plaintiffs enlisted the aid of a dedicated team of lawyers and ultimately prevailed. Weaving personal stories with legal drama, *Class Action* shows how these terrifically brave women made history, although not without enormous personal cost. Told at a thriller's pace, this is the story of how one woman pioneered and won the first sexual harassment class action suit in the United States, a legal milestone that immeasurably improved working conditions for American women.

Class action lawsuits--allowing one or a few plaintiffs to represent many who seek redress--have long been controversial. The current controversy, centered on lawsuits for money damages, is characterized by sharp disagreement among stakeholders about the kinds of suits being filed, whether plaintiffs' claims are meritorious, and whether resolutions to class actions are fair or socially desirable. Ultimately, these concerns lead many to wonder, Are class actions worth their costs to society and to business? Do they do more harm than good? To describe the landscape of current damage class action litigation, elucidate problems, and identify solutions, the RAND Institute for Civil Justice conducted a study using qualitative and quantitative research methods. The researchers concluded that the controversy over damage class actions has proven intractable because it

implicates deeply held but sharply contested ideological views among stakeholders. Nevertheless, many of the political antagonists agree that class action practices merit improvement. The authors argue that both practices and outcomes could be substantially improved if more judges would supervise class action litigation more actively and scrutinize proposed settlements and fee awards more carefully. Educating and empowering judges to take more responsibility for case outcomes--and ensuring that they have the resources to do so--can help the civil justice system achieve a better balance between the public goals of class actions and the private interests that drive them.
