Endore's classic werewolf novel—now back in print for

the first time in over forty years—helped define a genre and set a new standard in horror fiction. The werewolf is one of the great iconic figures of horror in folklore, legend, film, and literature. And connoisseurs of horror fiction know that *The Werewolf of Paris* is a cornerstone work, a masterpiece of the genre that deservedly ranks with Mary Shelley's *Frankenstein*, Bram Stoker's *Dracula*, and Robert Louis Stevenson's *The Strange Case of Dr. Jekyll and Mr. Hyde*. Endore's classic novel has not only withstood the test of time since it was first published in 1933, but it boldly used and portrayed elements of sexual compulsion in ways that had never been seen before, at least not in horror literature. In this gripping work of historical fiction, Endore's werewolf, an outcast named Bertrand Caillet, travels across pre-Revolutionary France seeking to calm the beast within. Stunning in its sexual frankness and eerie, fog-enshrouded visions, this novel was decidedly influential for the generations of horror and science fiction authors who came afterward.

This volume concerns several aspects of China's changing market based economy. These include commercial contract enforcement, corporate structures, competition law and other issues related to China's membership in the WTO. In the past two decades, the

rapid integration of China's economy into the global marketplace has created obligations and expectations of non-discrimination and regulatory transparency in domestic markets. The Chinese government has responded by demanding better governance within major companies, market sectors and public administration generally. However, as the articles in this volume show, it has struggled to find a corporate structure capable of absorbing external equity investment and participation but still amenable to direct and indirect state guidance. It has also moved cautiously in creating legal controls over unfair competition. Moreover, the protection of state owned enterprises, which serve as vehicles for domestic economic, social and political policy, has been a recurring issue in China's WTO trade disputes.

This book is a money-making tool for both complete novices and well-established business professionals who want to invest in residential real estate in 90-days. For novices, it dispels common myths and provides a basic step-by-step approach to their first step in the field. For professionals, it offers insight into the key tools to value property as well as new promising trends to dig into. It also offers simple but proven investment strategies and rules of thumb to woo investors into the game.

A laboratory study that investigates how algorithms come into existence. Algorithms--often associated with the terms big data, machine learning, or artificial intelligence--underlie the technologies we use every day, and disputes over the consequences, actual or

potential, of new algorithms arise regularly. In this book, Florian Jatón offers a new way to study computerized methods, providing an account of where algorithms come from and how they are constituted, investigating the practical activities by which algorithms are progressively assembled rather than what they may suggest or require once they are assembled.

This book covers state-of-the-art topics on the practical implementation of Spoken Dialog Systems and intelligent assistants in everyday applications. It presents scientific achievements in language processing that result in the development of successful applications and addresses general issues regarding the advances in Spoken Dialog Systems with applications in robotics, knowledge access and communication. Emphasis is placed on the following topics: speaker/language recognition, user modeling / simulation, evaluation of dialog system, multi-modality / emotion recognition from speech, speech data mining, language resource and databases, machine learning for spoken dialog systems and educational and healthcare applications.

This volume is dedicated to Bill Helton on the occasion of his sixty fifth birthday. It contains biographical material, a list of Bill's publications, a detailed survey of Bill's contributions to operator theory, optimization and control and 19 technical

articles. Most of the technical articles are expository and should serve as useful introductions to many of the areas which Bill's highly original contributions have helped to shape over the last forty odd years. These include interpolation, Szegő limit theorems, Nehari problems, trace formulas, systems and control theory, convexity, matrix completion problems, linear matrix inequalities and optimization. The book should be useful to graduate students in mathematics and engineering, as well as to faculty and individuals seeking entry level introductions and references to the indicated topics. It can also serve as a supplementary text to numerous courses in pure and applied mathematics and engineering, as well as a source book for seminars.

This book is about modern algebraic geometry. The title *A Royal Road to Algebraic Geometry* is inspired by the famous anecdote about the king asking Euclid if there really existed no simpler way for learning geometry, than to read all of his work *Elements*. Euclid is said to have answered: "There is no royal road to geometry!" The book starts by explaining this enigmatic answer, the aim of the book being to argue that indeed, in some sense there is a royal road to algebraic geometry. From a point of departure in algebraic curves, the exposition moves on to the present shape of the field, culminating with Alexander Grothendieck's theory of schemes. Contemporary homological tools are explained. The reader will follow a directed path leading up to the main elements of modern algebraic geometry. When

the road is completed, the reader is empowered to start navigating in this immense field, and to open up the door to a wonderful field of research. The greatest scientific experience of a lifetime!

"A young boy asks his grandma where God is in their city. Where love, joy, peace, patience, kindness, goodness, faithfulness, gentleness, and self-control are, there too is God. An ordinary day in his city opens this young boy's eyes to God's Spirit at work all around him"--

As a young man Francis of Assisi renounced his wealthy background, dressed in coarse robes and lived in poverty. He believed every living creature and thing on earth was sacred and deserved respect. In this spirit, he founded the Franciscan Order, which endures today. Géraldine Elschner narrates in her poetic text the life and work of Francis of Assisi, one of the most famous saints of Christianity. Glowing reproductions of Italian frescoes and quotes by Pope Francis portray his life and works.

This is the first major study of the alternatives confronting Iraq as it seeks to rebuild its vital oil industry while simultaneously constructing a new political system. A key challenge facing the country is to allocate the revenues oil generates in a way that avoids economic and social instability. Reviewing the

present status of the industry, the authors - including Clement Henry, Massoud Karshenas, Roger Owen, Mona Said and John Sfakianakis - use comparative analysis to suggest how it might best be rebuilt. Oil and Democracy in Iraq is an important and timely assessment of Iraq's oil industry. 'Springborg's observations help understand the current stalemate in (or failure) to define the legal and administrative setting needed to undertake a real reconstruction of the national oil industry.' Maritza Cricorian, Istituto Affari Internazionali 'This book is exemplary, setting forth clear alternatives, as well as cautionary tales from the experiences of other states, and indeed of Iraq itself in an earlier incarnation.' Charles Tripp, School of Oriental and African Studies

He broke her heart. Now, he's back, and he's determined to show her what they had isn't over. . . and he can prove it with just one kiss. Single mother Carly Collins likes predictability. However, when her son Jaden's health is threatened, her neatly controlled world is tossed into a tailspin. Nothing is certain anymore, especially her feelings for Josh Dixon, Jaden's father, her first love and the man responsible for shattering her heart sixteen years ago. When Josh Dixon walked out of Harbor Pointe, he left behind his only shot at a real family. Now a successful tech mogul, the town rebel has found a cause--ensure his son's recovery and prove to Carly and Jaden that he's not the same guy he was back then. Carly and Josh are forced to wade through messy emotions and questions that have gone unanswered for years, which would be easier if not for the pesky feelings, every bit as strong and impossible to ignore as they ever were. Will forgiveness win, giving Carly and Josh a second chance at

love . . . or will the past prove too much to overcome? A small town romance about first love second chances and how our most beautiful life might look nothing like we planned.
