Since publication in 1979 Isabel Rivers' sourcebook has established itself as the essential guide to English Renaissance poetry. It: provides an account of the main classical and Christian ideas, outlining their meaning, their origins and their transmission to the Renaissance; illustrates the ways in which Renaissance poetry drew on classical and Christian ideas; contains extracts from key classical and Christian texts and relates these to the extracts of the English poems which draw on them; includes suggestions for further reading, and an invaluable bibliographical appendix.

Latin was for many centuries the common literary language of Europe, and Latin literature of immense range, stylistic power and social and political significance was produced throughout Europe and beyond from the time of Petrarch (c.1400) well into the eighteenth century. This is the first available work devoted specifically to the enormous wealth and variety of neo-Latin literature, and offers both essential background to the understanding of this material and sixteen chapters by leading scholars which are devoted to individual forms. Each contributor relates a wide range of fascinating but now little-known texts to the handful of more familiar Latin works of the period, such as Thomas More's *Utopia*, Milton's Latin poetry and the works of Petrarch and Erasmus. All Latin is translated throughout the volume.

Almost three centuries have passed since the oldest manuscript of "The Thousand and One Nights" arrived in Europe. Since then, the "Nights" have occupied the minds of scholars world-wide, in particular the questions of origin, composition, language and literary form. In this book, Muhsin Mahdi, whose critical edition of the text brought so much praise, explores the complex literary history of the "Nights," bringing to fruition the search for the archetype that constituted the core of the surviving editions, and treating the fascinating story of the growth of the collection of stories that we now know as "The Thousand and One Nights,"

Rufus of Ephesus' treatise *On Melancholy* represents perhaps the most influential medical monograph from the late first century AD, since his notion of melancholy links two diverse aspects: black bile as a cause for madness and depression and as a sign of intellectual genius. Rufus combines concepts of melancholy developed in the Aristotelian philosophy with concepts of famous physicians such as Hippocrates and Diocles. His ideas strongly influenced subsequent generations of physicians, and especially Galen, and dominated discourses on the topic during the Middle Ages and the Renaissance. Moreover, the

reception of Rufus' concepts was not limited to the Western world; in medieval Muslim culture, in particular, his work enjoyed great fame and favor, and many intellectuals read it eagerly. In this volume, the Greek, Latin and Arabic fragments of this work, lost in the original, have been collected for the first time. Arabic sources in particular yield hitherto unknown fragments, thus allowing for new interpretations of this work. The English introduction, translation and commentary reconstruct the main arguments of this important treatise, enabling the interested scholar to obtain easy access to it. Leading scholars contributed interpretative essays which investigate Rufus and his ideas about melancholy in antiquity, the Middle Ages, the Renaissance and the early modern period from different vantage points, including history, philosophy, literature, art history and psychiatry.

This exquisite, resonant novel by PEN/Faulkner winner James Salter is a brilliant portrait of a marriage by a contemporary American master. It is the story of Nedra and Viri, whose favored life is centered around dinners, ingenious games with their children, enviable friends, and near-perfect days passed skating on a frozen river or sunning on the beach. But even as he lingers over the surface of their marriage, Salter lets us see the fine cracks that are spreading through it, flaws that will eventually mar the lovely picture beyond repair. Seductive, witty, and elegantly nuanced, *Light Years* is a classic novel of an entire generation that discovered the limits of its own happiness—and then felt compelled to destroy it.

This new edition of *Anthology of Classical Myth* offers selections from key Near Eastern texts—the Babylonian Epic of Gilgamesh, Epic of Creation (Enuma Elish), and Atrahasis; the Hittite Song of Emergence; and the flood story from the book of Genesis—thereby enabling students to explore the many similarities between ancient Greek and Mesopotamian

The interaction between orator and audience, the passions and distrust held by many concerning the predominance of one individual, but also the individual's struggle as an advisor and political leader, these are the quintessential elements of 4th century rhetoric. As an individual personality, the orator draws strength from his audience, while the rhetorical texts mirror his own thoughts and those of his audience as part of a

two-way relationship, in which individuality meets, opposes, and identifies with the masses. For the first time, this volume systematically compares minor orators with the major figures of rhetoric, Demosthenes and Isocrates, taking into account other findings as well, such as extracts of Hyperides from the Archimedes Palimpsest. Moreover, this book provides insight into the controversy surrounding the art of discourse in the rhetorical texts of Anaximenes, Aristotle, and especially of Isocrates who took up a clear stance against the philosophy of the 4th century.

Thirty years ago federal policy underwent a major change through the Bayh-Dole Act of 1980, which fostered greater uniformity in the way research agencies treat inventions arising from the work they sponsor. Before the Act, if government agencies funded university research, the funding agency retained ownership of the knowledge and technologies that resulted. However, very little federally funded research was actually commercialized. As a result of the Act's passage, patenting and licensing activity from such research has accelerated. Although the system created by the Act has remained stable, it has generated debate about whether it might impede other forms of knowledge transfer. Concerns have also arisen that universities might prioritize commercialization at the expense of their traditional mission to pursue fundamental knowledge--for example, by steering research away from curiosity-driven topics toward applications that could yield financial returns. To address these concerns, the National Research Council convened a committee of experts from universities, industry, foundations, and similar organizations, as well as scholars of the subject, to review experience and evidence of the technology transfer system's effects and to recommend improvements. The present volume summarizes the committee's principal findings and recommendations.

The emperor Nero is etched into the Western imagination as one of ancient Rome's most infamous villains, and Tacitus' *Annals* have played a central role in shaping the mainstream historiographical understanding of this flamboyant autocrat. This section of the text plunges us straight into the moral cesspool that Rome had apparently become in the later years of Nero's reign, chronicling the emperor's

fledgling stage career including his plans for a grand tour of Greece; his participation in a city-wide orgy climaxing in his publicly consummated 'marriage' to his toy boy Pythagoras; the great fire of AD 64, during which large parts of central Rome went up in flames; and the rising of Nero's 'grotesque' new palace, the so-called 'Golden House', from the ashes of the city. This building project stoked the rumours that the emperor himself was behind the conflagration, and Tacitus goes on to present us with Nero's gruesome efforts to quell these mutterings by scapegoating and executing members of an unpopular new cult then starting to spread through the Roman empire: Christianity. All this contrasts starkly with four chapters focusing on one of Nero's most principled opponents, the Stoic senator Thrasea Paetus, an audacious figure of moral fibre, who courageously refuses to bend to the forces of imperial corruption and hypocrisy. This course book offers a portion of the original Latin text, study aids with vocabulary, and a commentary. Designed to stretch and stimulate readers, Owen's and Gildenhard's incisive commentary will be of particular interest to students of Latin at both A2 and undergraduate level. It extends beyond detailed linguistic analysis and historical background to encourage critical engagement with Tacitus' prose and discussion of the most recent scholarly thought. The aim of this project is to provide a sustained

analysis of the concept of 'self' in Statius' Thebaid. It is this project's contention that the poem is profoundly interested in ideas of identity and selfhood. The poem stages itself as a metapoetic exploration of the difficulties for a belated epicist in finding a place in the literary canon; it shows the impossibility of squaring large-scale epic poetics with small-scale, finely-wrought Callimacheanism; it reflects the violent disjunction between Statius' authorial pose as a poet without power and the extreme violence of his poetics; it opens up the intricacies of constructing original, coherent characters out of intertextual, exemplary models. The central tenet of the project is that Statius in the Thebaid stages his own 'death', but does so that his poem may live. This book is intended for an academic audience including undergraduate and graduate students as well as specialists in the field. Although the project will be of primary importance to readers of Flavian literature, it will also be of interest to those who study intertextuality and characterisation in Roman literature more generally, selfhood and identity in Roman literature and culture and the reception of Roman literature. This is a collection of the standard texts of ancient Greek which are important components of what we know about Greek myth, religion, language and culture. Hercules, Zeus, Thor, Gilgamesh--these are the figures that leap to mind when we think of myth. But to David Leeming, myths are more than stories of deities and fantastic beings from non-Christian cultures. Myth is at once the most particular and the most universal feature of civilization, representing common concerns that each society voices in its own idiom. Whether an Egyptian story of creation or the big-bang theory of modern physics, myth is metaphor, mirroring our deepest sense of ourselves in relation to existence itself. Now, in *The World of Myth*, Leeming provides a sweeping anthology of

myths, ranging from ancient Egypt and Greece to the Polynesian islands and modern science. We read stories of great floods from the ancient Babylonians, Hebrews, Chinese, and Mayans; tales of apocalypse from India, the Norse, Christianity, and modern science; myths of the mother goddess from Native American Hopi culture and James Lovelock's Gaia. Leeming has culled myths from Aztec, Greek, African, Australian Aboriginal, Japanese, Moslem, Hittite, Celtic, Chinese, and Persian cultures, offering one of the most wide-ranging collections of what he calls the collective dreams of humanity. More important, he has organized these myths according to a number of themes, comparing and contrasting how various societies have addressed similar concerns, or have told similar stories. In the section on dying gods, for example, both Odin and Jesus sacrifice themselves to renew the world, each dying on a tree. Such traditions, he proposes, may have their roots in societies of the distant past, which would ritually sacrifice their kings to renew the tribe. In *The World of Myth*, David Leeming takes us on a journey "not through a maze of falsehood but through a marvellous world of metaphor," metaphor for "the story of the relationship between the known and the unknown, both around us and within us." Fantastic, tragic, bizarre, sometimes funny, the myths he presents speak of the most fundamental human experience, a part of what Joseph Campbell
