Urban Flooding in Brazil Francisco Mendonça,Ariadne Farias,Elaiç Buffon,2023-04-24 This contributed volume analyzes flooding scenarios in Brazilian cities using a geographic and spatiotemporal approach to explore impacts and ways to mitigate future disasters. The problem of urban flooding is growing in Brazilian cities due to the increasing number of natural disasters in the context of global climate change; this is a topic that poses challenges to urban planners and academics. Through three sections, this volume offers theoretical-conceptual, methodological and technical case studies, as well as cases

that explore urban socio-environmental problems associated with flooding. Throughout the book, the concepts of risk, vulnerability and adaptation are used to explore future flood scenarios in Brazil. The integrated vision offered in this volume covers the floods themselves, evaluation of flood impacts, and the management process before, during, and after the flood event. The case studies presented here elucidate the concept of comprehensive urban flood management, offering a technical and diagnostic basis for the problem in different cities in Brazil. The present and future challenges presented by these chapters offer widely-transferable lessons that can be applied to making cities around the world more sustainable and disaster-resilient.

O clima e as cidades Francisco Jablinski Castelhana,2020-01-01 Nas últimas décadas, o crescimento populacional observado nas regiões urbanas foi excepcionalmente intenso. Dentre os problemas que essa explosão demográfica trouxe, as mudanças climáticas certamente estão entre os mais preocupantes. Considerando a relevância desse tema e a urgência em discutir o que está por trás das alterações climáticas que temos testemunhado, esta obra investiga os impactos térmicos, hídricos e de qualidade do ar que derivam do clima urbano na atualidade. Junte-se a nós numa análise geográfica crítica e detalhada sobre as situações climáticas mais graves e frequentes ao redor do globo.

The Crisis of the 14th Century Martin Bauch,Gerrit Jasper Schenk,2019-12-16 Pre-modern critical interactions of nature and society can best be studied during the so-called Crisis of the 14th Century. While historiography has long ignored the environmental framing of historical processes and scientists have over-emphasized nature's impact on the course of human history, this volume tries to describe the at times complex modes of the late-medieval relationship of man and nature. The idea of 'teleconnection', borrowed from the geosciences, describes the influence of atmospheric circulation patterns often over long distances. It seems that there were 'teleconnections' in society, too. So this volume aims to examine man-environment interactions mainly in the 14th century from all over Europe and beyond. It integrates contributions from different disciplines on impact, perception and reaction of environmental change and natural extreme events on late Medieval societies. For humanists from all historical disciplines it offers an approach how to integrate written and even scientific evidence on environmental change in established and new fields of historical research. For scientists it demonstrates the contributions scholars from the humanities can provide for discussion on past environmental changes.

Acidification and its Policy Implications T. Schneider,1986-11-01 Providing a wealth of reference material for research scientists and policy makers, these proceedings address the extremely complex problem of acidification - a phenomenon which is causing serious deterioration of natural environments in Europe and North America. Papers review the effects of acidification on the aquatic environment, flora, fauna and vegetation, and materials, and also review cultural properties, the

ecology as a whole and the economic impact of acidification. The papers on forest-dieback cover potential stress factors and the effects on materials and cultural properties. Scientific research results are presented which deal with models as tools for abatement strategies, and underline the application of models in policy-making. The review papers of scientific research on acidification are followed by the official report of the conference, and presentations by representatives of the EEC member countries giving an overview of national research programmes and policies regarding acidification.

South Brazilian Grasslands Gerhard Ernst Overbeck, Valério De Patta Pillar, Sandra Cristina Müller, Glayson Ariel Bencke, 2023-12-15 This volume explores the South Brazilian grasslands, a unique complex of ecosystems in Brazil. Despite high biodiversity and many important ecosystem services, their biodiversity and conservation are neglected, both nationally, and globally. This book provides a state-of-the-art synthesis of knowledge on the biodiversity and its drivers in South Brazilian grasslands and associated ecosystems. Further, the book discusses conservation challenges and options, as well as management strategies that help to maintain the region's uniqueness. The chapters present information on biodiversity and ecological features of the region, and put this information into the context of historical and current human land uses, allowing for links to global discussions of conservation and sustainable development. Altogether, the book contains 20 chapters organized in four sections. The book is directed at researchers, students and professionals working with biodiversity and sustainable development in southern Brazil, as well as to the international scientific and conservation community interested in grasslands and associated ecosystems, particularly in tropical and subtropical regions.

Por conseguinte, este trabalho busca abordar as consequências que os ruídos acima do normal, ou seja, 50 dB, acarretam ao ser humano. Observam-se na cidade de Manaus, em áreas residenciais, muitas edificações que se destinam ao lazer, diversão, alimentação e outros. Conquanto seja da natureza humana e pertinente ao cidadão o direito ao lazer, tais usos deverão respeitar a vizinhança, garantindo níveis de pressão sonora confortáveis, que expressem a normalidade dessas comunidades.
